The Problem

Month end. 63 PDFs.

Your accountant wants every purchase bill with GSTIN, HSN and tax split. They are spread across email threads, and someone types each one into Excel, line by line.

The Workflow

AI Invoice Reader for GST Bills

Every box below is a node in the free workflow.

Step 1

Catch every bill in email

Every 15 minutes, n8n finds emails with PDF bills, splits out each PDF, skips any it has seen before, and files the original in your Drive Bills folder.

- [x] Email has a PDF bill
- [x] One item per PDF
- [x] Seen before? skipped
- [x] Original saved to Drive

3 PDFs in one mail? 3 rows

Step 2

Claude reads the GST fields

The PDF text goes to Claude, which copies GSTIN, invoice number, date, HSN, taxable value, CGST, SGST, IGST and total exactly as printed. Scanned bills go to a review tab.

Step 3

Code checks the maths

Plain code, not AI, checks the GSTIN format, that taxable plus tax equals the total, and that CGST/SGST or IGST matches the supplier's state. Problems and big bills are flagged.

- ✓ GSTIN format valid
- ✓ 40,898 + 7,362 = 48,260
- ✓ Same state: CGST + SGST
- ✓ Total under ₹50,000

Step 4

You approve, it logs

Flagged or big bills reach Slack with the PDF link and OK to pay or Hold. Every bill becomes one row in the Bills sheet your accountant can download.

Google Sheets

Bills · Oct

	Supplier	Invoice	Total	Status
1	Sharma Traders	ST/2291	₹48,260	Checked, OK
2	Kumar Packaging	KP-118	₹12,744	Checked, OK
3	**Mehta Logistics**	**554**	**₹9,440**	**On hold**
4	Rao Steel	RS/77	₹1,18,000	OK to pay

What Changes

Before and after the workflow

BEFORE

- 63 PDFs typed by hand
- GST typos found at filing
- Bills lost in threads

AFTER

- Every bill read on arrival
- Maths checked by code
- One sheet for the accountant

STAYS HUMAN

Claude only copies what is printed. Code checks the maths, and big or flagged bills wait for your OK.
