The Problem

Monday, 9:30 AM. "How was last week?"

Sales are in a sheet, payments in Razorpay, leads in WhatsApp, overdue bills in Tally. Getting one honest answer means opening four apps and a calculator.

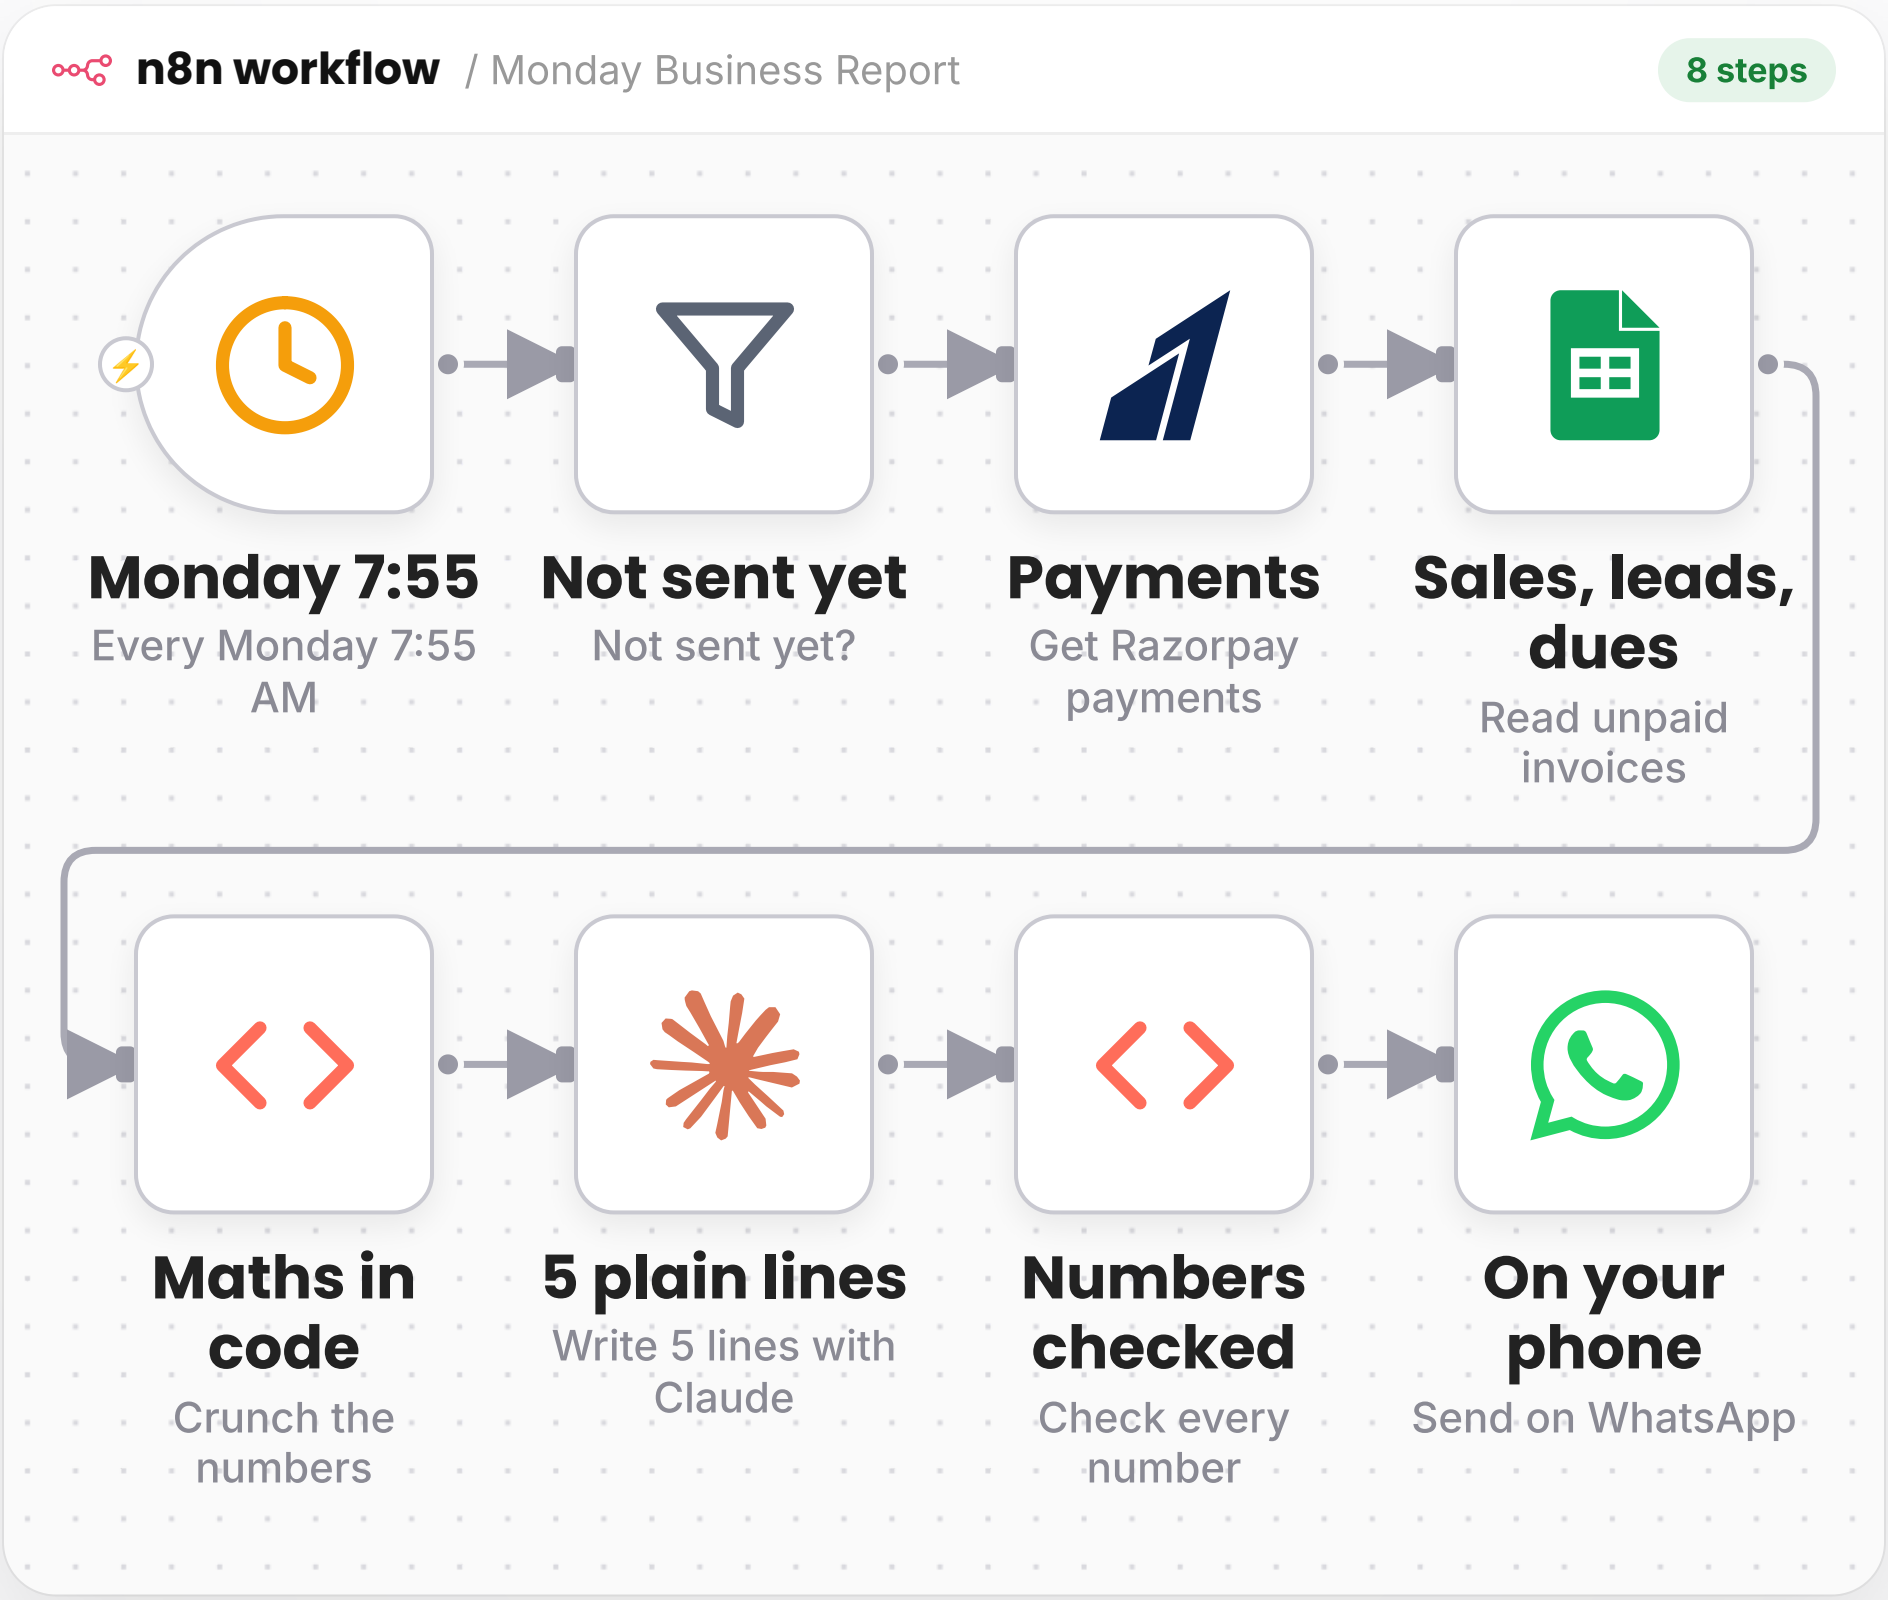

1. Open Razorpay dashboard
2. Filter the Orders sheet by date
3. Count leads in WhatsApp
4. Ask accounts for overdue list
5. Still guessing at 11 AM

The Workflow

Monday Business Report

Every box below is a node in the free workflow.

Step 1

Wake up on Monday, once

At 7:55 AM every Monday, n8n works out last week's dates and checks the Weekly sheet. If this week's report already went out, it stops. No double reports on a re-run.

Output · JSON

```
{
  "weekKey": "2026-W43",
  "label": "19 Oct to 25 Oct",
  "alreadySent": false
}
```

N8N NODES

Every Monday 7:55 AM

Set report week

Already sent this week?

Not sent yet?

Step 2

Pull from every tool

Razorpay payments, the Orders, Leads and Invoices sheets, and last week's saved row. Plain code does all the maths: totals, counts, overdue, up or down.

Google Sheets

Last week

	Metric	Value	vs last
1	Sales	₹4,82,300	+12%
2	Orders	61	
3	Collected	₹3,96,000	
4	New leads	23	-4%
5	**Overdue**	**₹1,48,500**	

AI never does the maths

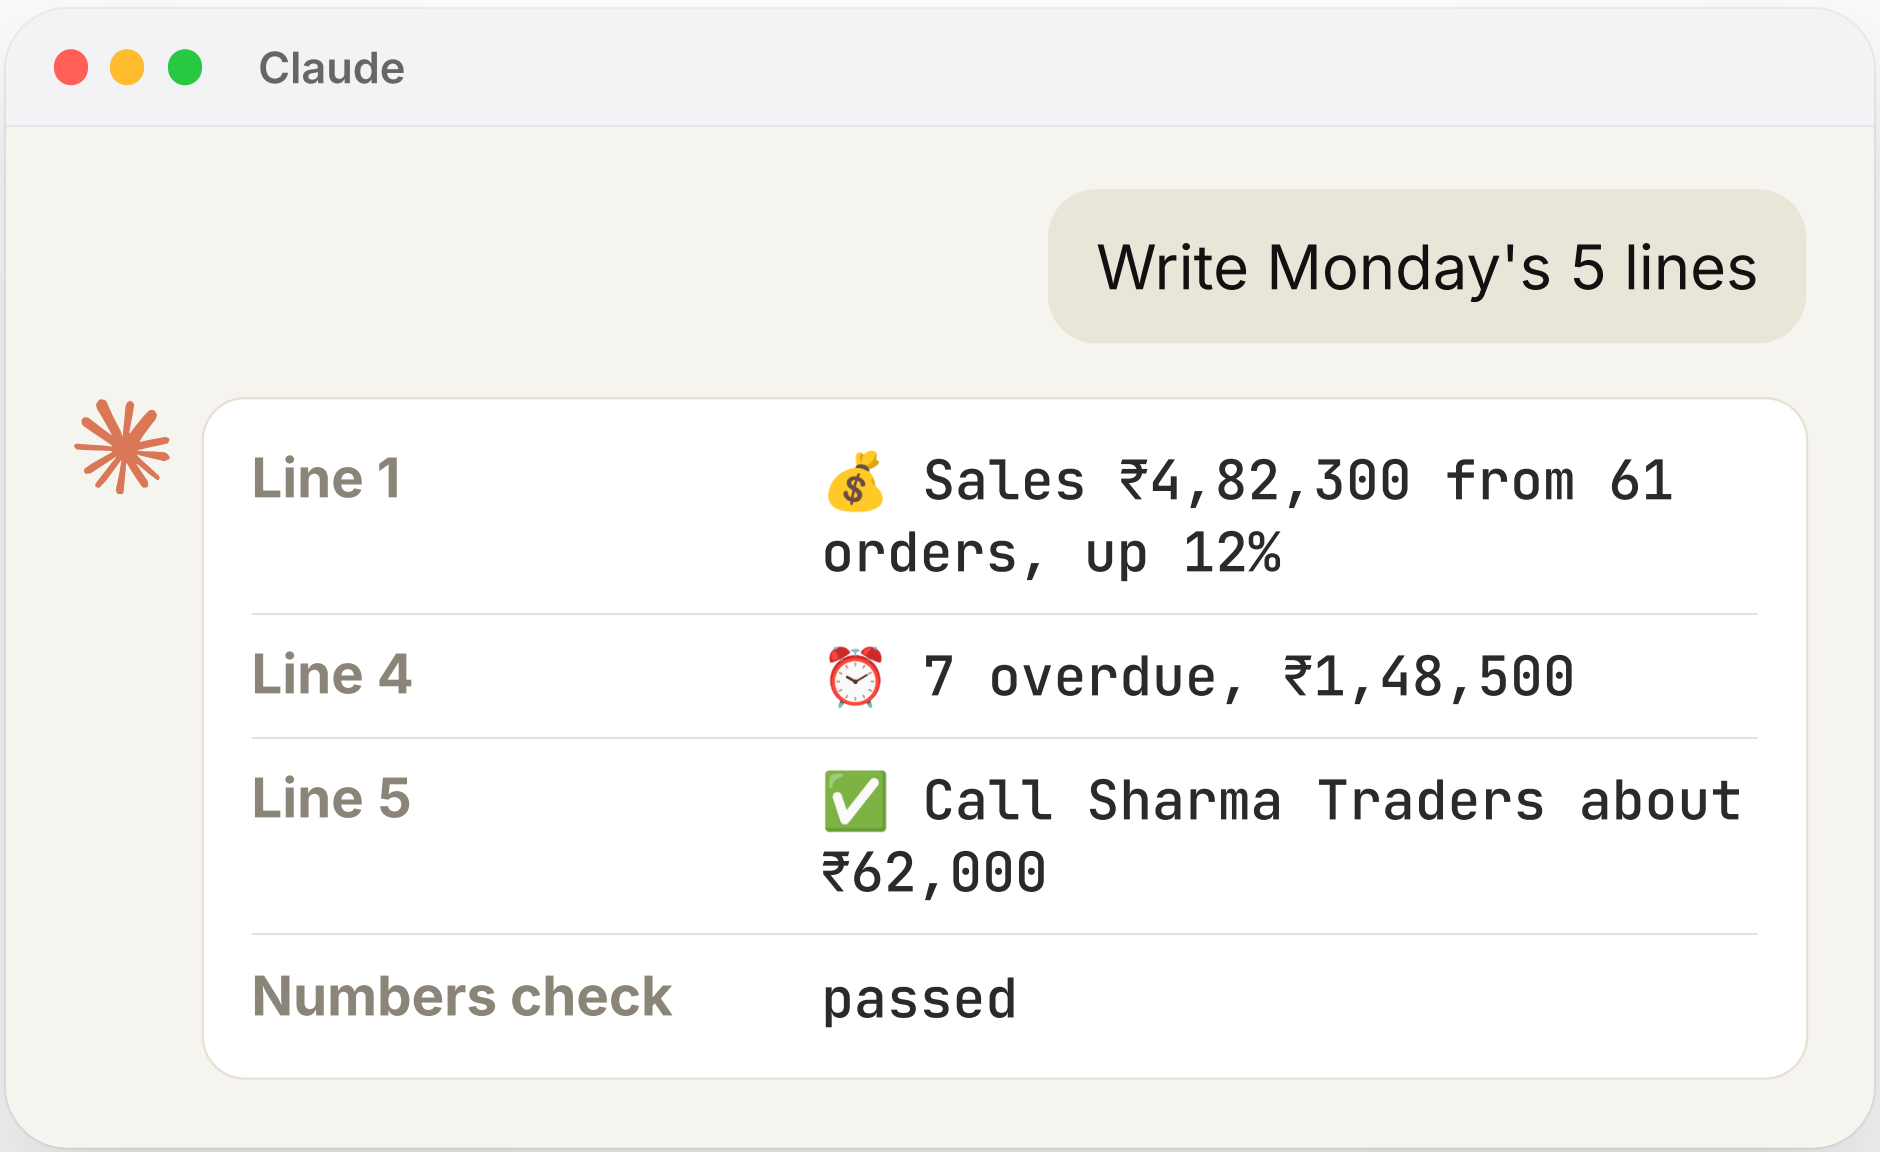

N8N NODES

Get Razorpay payments · Read orders · Read new leads · Read unpaid invoices · Read last week · Crunch the numbers

Step 3

Claude writes 5 lines

Claude turns the numbers into 5 short lines and one thing to do today. Then code checks every number it wrote against the data. One wrong figure and a plain version goes instead.

every number is checked

N8N NODES

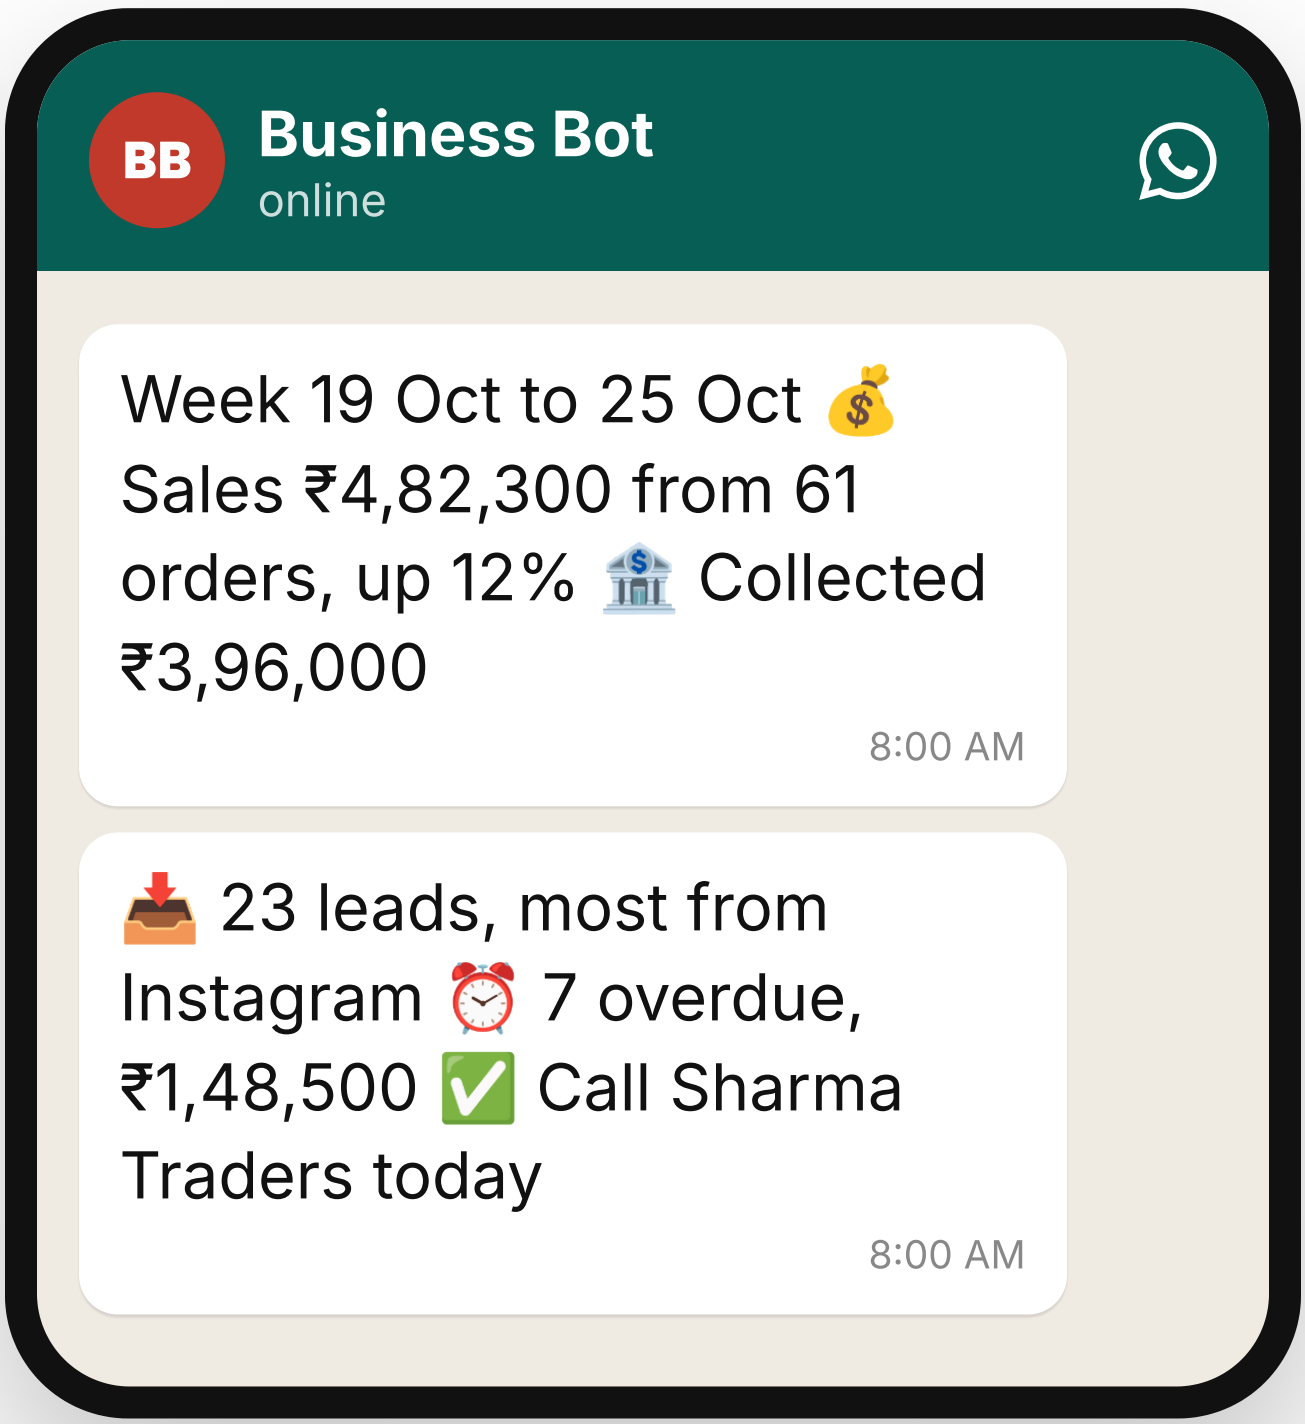

Write 5 lines with Claude

Check every number

Step 4

On your WhatsApp at 8 AM

The week's numbers are saved for next Monday's comparison, and the 5 lines land on your WhatsApp. If WhatsApp refuses, the same report goes to Slack.

N8N NODES

Save this week's numbers

Send on WhatsApp

Fallback: post to Slack

What Changes

Before and after the workflow

BEFORE

- 4 apps every Monday
- Numbers from memory
- Overdue found too late

AFTER

- 5 lines at 8 AM
- Every number checked
- One clear task for today

STAYS HUMAN

Code does every calculation and checks every number Claude writes. If one does not match, you get the plain numbers instead.
