Order photos become rows

(n8n + Claude vision)

Google Sheets

Orders

	Written	SKU	Qty	Status
1	5 peti Parle G	PG-800	5	OK
2	2 dz Surf 1kg	SF-1K	24	OK
3	**Maggi masala**	**MG-70**	**?**	**Check**

Swipe →

The Problem

8:15 AM. 40 order photos.

Kirana owners send photos of notebook pages: '5 peti Parle G, 2 dz Surf'. Someone in your office retypes every line into the billing software. One misread '3' becomes an '8'.

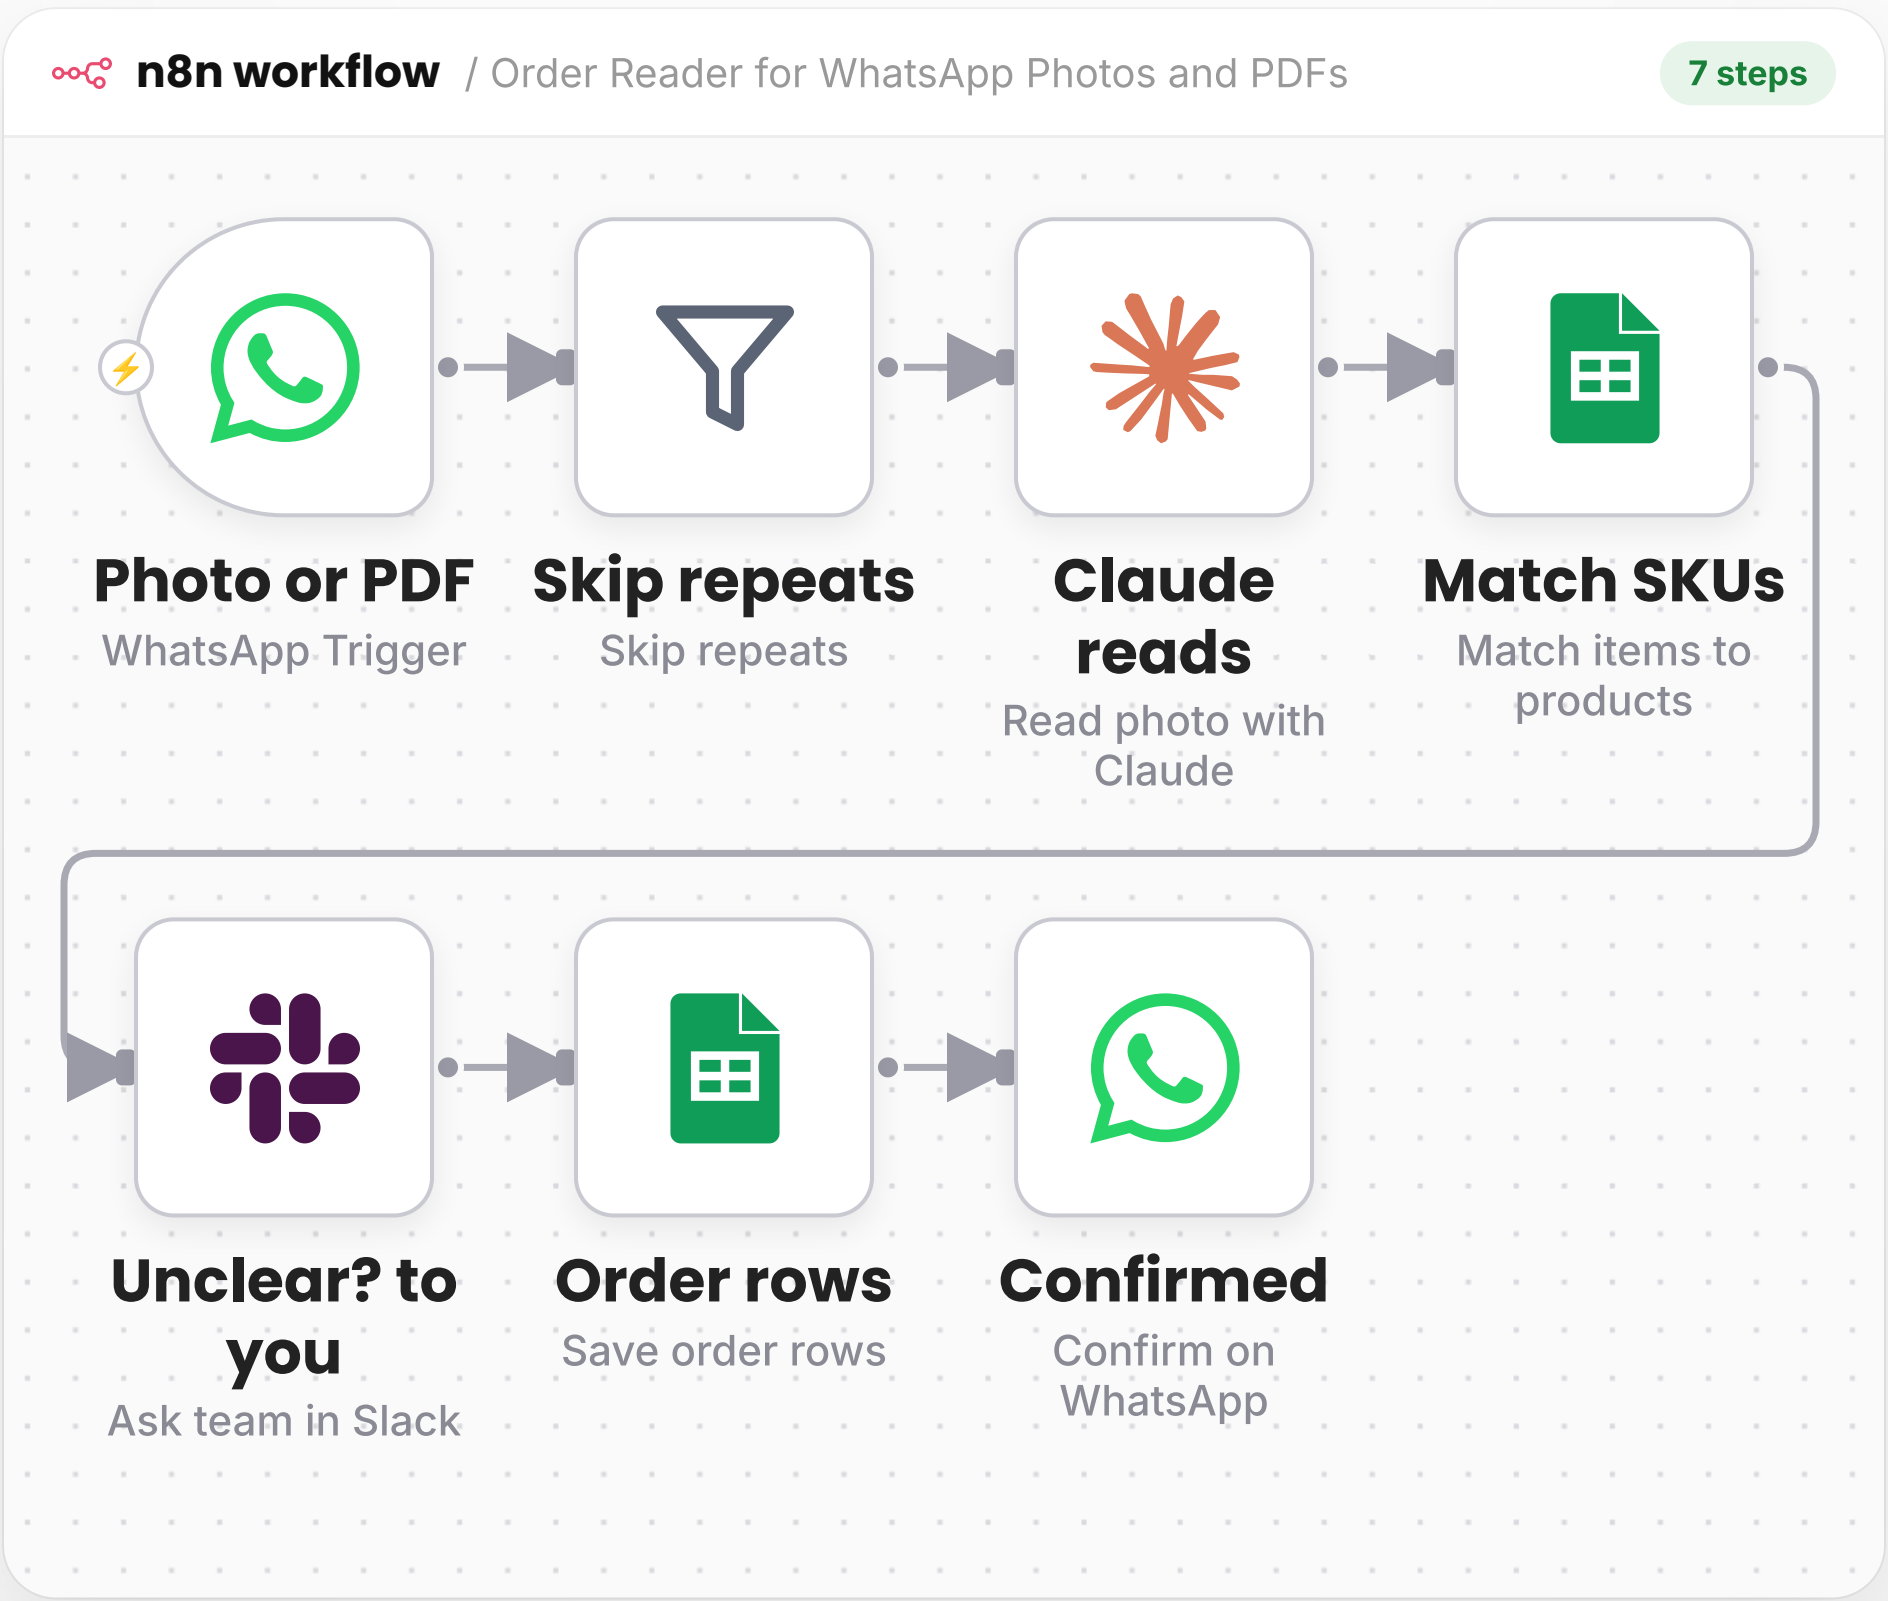

retyped, line by line

The Workflow

Order Reader for WhatsApp Photos and PDFs

Every box below is a node in the free workflow.

Step 1

Catch the photo or PDF

When a customer sends a photo or a PDF order on WhatsApp, n8n skips anything it has seen before, gets the file from WhatsApp and downloads it.

- [x] Photo or PDF? continue
- [x] Text message? ignored
- [x] Seen before? skipped
- [x] File downloaded

N8N NODES

WhatsApp Trigger · Photos and PDFs only · Skip repeats · Get media URL · Download file

Step 2

Claude reads every line

Photos go to Claude's vision, PDFs to text first. Claude returns each line as written, the product, quantity and unit. Hard to read? It marks the line unclear instead of guessing.

N8N NODES

- PDF or photo?
- Extract PDF text
- Read PDF with Claude
- Read photo with Claude

Step 3

Match to your product list

Code matches each line to a SKU using names and the aliases customers really write, adds rate and amount, and flags lines with no match or no quantity.

Google Sheets

Products

	SKU	Name	Aliases	Rate
1	**PG-800**	**Parle-G 800g**	**parle g, pg**	**₹1,150**
2	SF-1K	Surf Excel 1kg	surf	₹128
3	MG-70	Maggi Masala 70g	maggi	₹14

N8N NODES

Read product list

Match items to products

Anything unclear?

Step 4

Saved, confirmed, flagged

Clean orders become one row per line and the customer gets a confirmation. Orders with flagged lines reach Slack first: save with flags, or call the customer.

Slack

orders

Order Reader APP 8:03 AM

Order WA-261028 from Gupta Kirana · 12 lines, 1 needs a look 3. "Maggi masala" (quantity missing)

Save with flags | **Call customer**

a person checks the doubtful ones

N8N NODES

Ask team in Slack · Team approved? · One row per item · Save order rows · Confirm on WhatsApp · Tell customer we'll call · Alert: confirm failed

What Changes

Before and after the workflow

BEFORE

- Every photo retyped
- A 3 read as an 8
- Customers ask 'order mila?'

AFTER

- Rows in seconds
- Doubtful lines flagged
- Confirmation on WhatsApp

STAYS HUMAN

Unclear lines are flagged, never guessed, and any order with a flag waits for your team in Slack.
