The Problem

Sunday, 10 PM. 63 PDFs.

Neha posted one accounts job on Naukri and LinkedIn. Her inbox now has 63 attachments, half named resume_final(2).pdf. The two strongest people applied on day one. By the time she reaches them, they have joined somewhere else.

jobs@ · 63 unread

RP	**Rohit P.** Application: Accounts Exec	9:41 PM
N	**Naukri** 12 new applicants for you	8:02 PM
AR	**Ananya R.** Resume for Accounts role	Mon Strong
S	**Sameer** resume_final(2).pdf	Mon
IK	**Imran K.** Applying, 3 yrs Tally + GST	Mon Strong

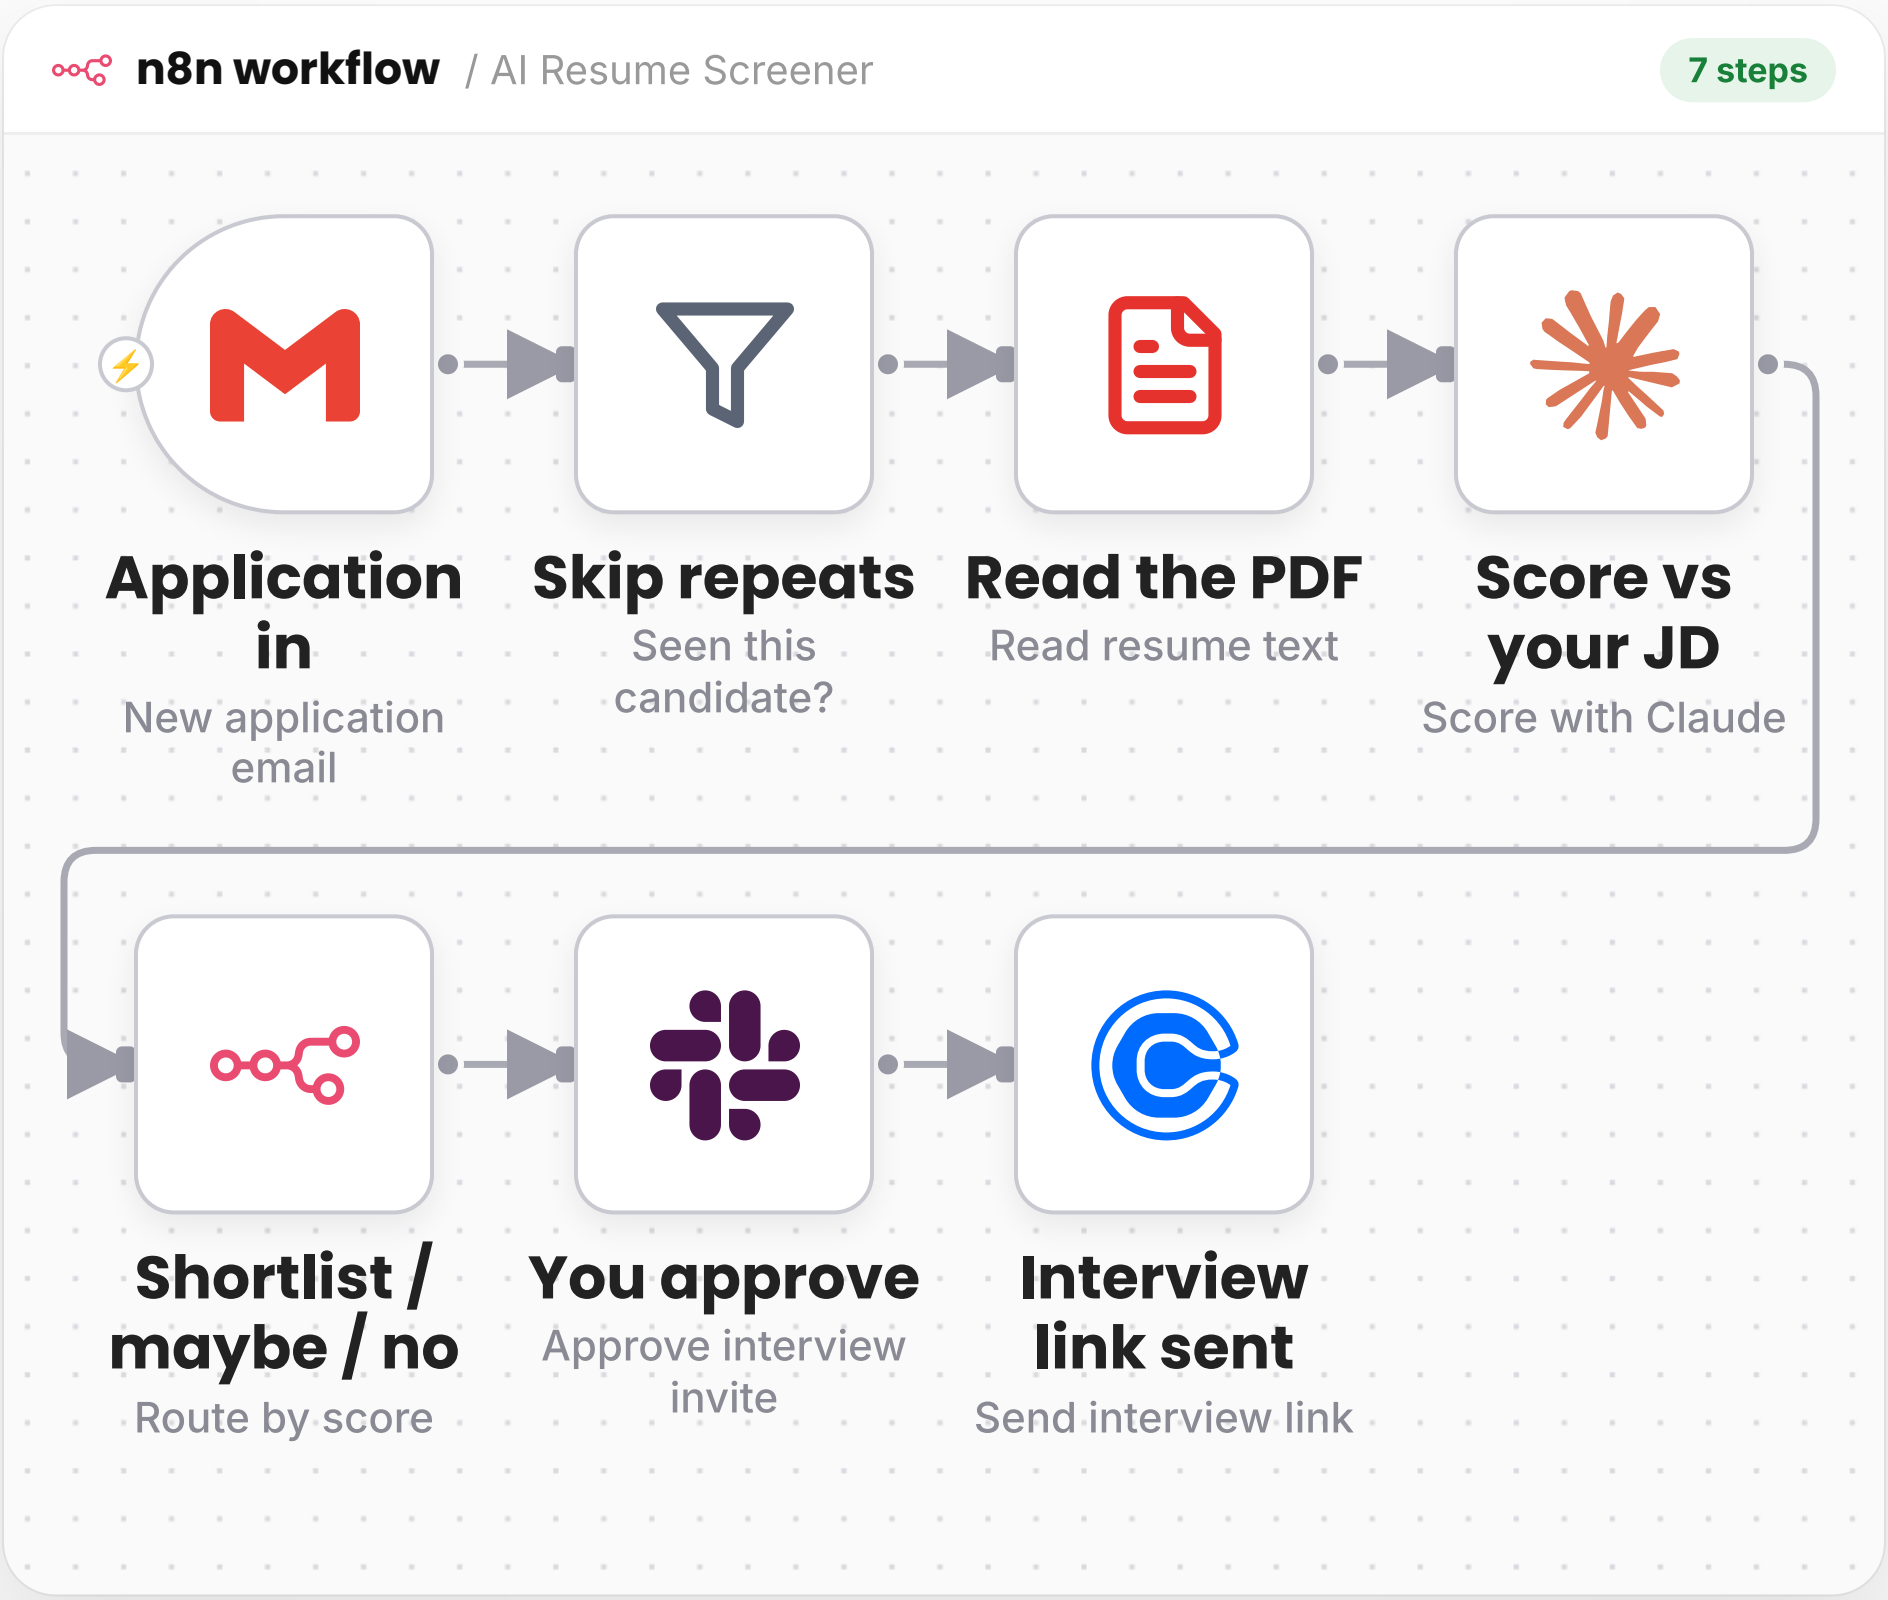

the best one was resume #4

The Workflow

AI Resume Screener

Every box below is a node in the free workflow.

Step 1

Catch every application

Applications from your jobs inbox and your careers form land in one pipeline. n8n keeps name, email, role and the PDF, skips anyone it has already screened for that role, and politely asks for a PDF if there isn't one.

- [x] Jobs inbox or careers form
- [x] Name, email, role picked out
- [x] Same person, same role? Skipped
- [x] No PDF? Polite ask
- [x] PDF goes on to be read

two doors, one pipeline

N8N NODES

New application email · Careers page form · Normalise application · Seen this candidate? · PDF attached? · Ask for a PDF

Step 2

Read the resume and the job

The PDF is saved to your Applicants folder in Drive and turned into text. The job's must-haves come from your Roles sheet, so every candidate is judged against the same list.

Google Sheets

Roles

	Role	Must haves	Exp	Location
1	**Accounts Exec**	**Tally, GST returns**	**2+ yrs**	**Pune**
2	Sales Exec	B2B calling, Hindi	1+ yrs	Pune

N8N NODES

Save resume to Drive

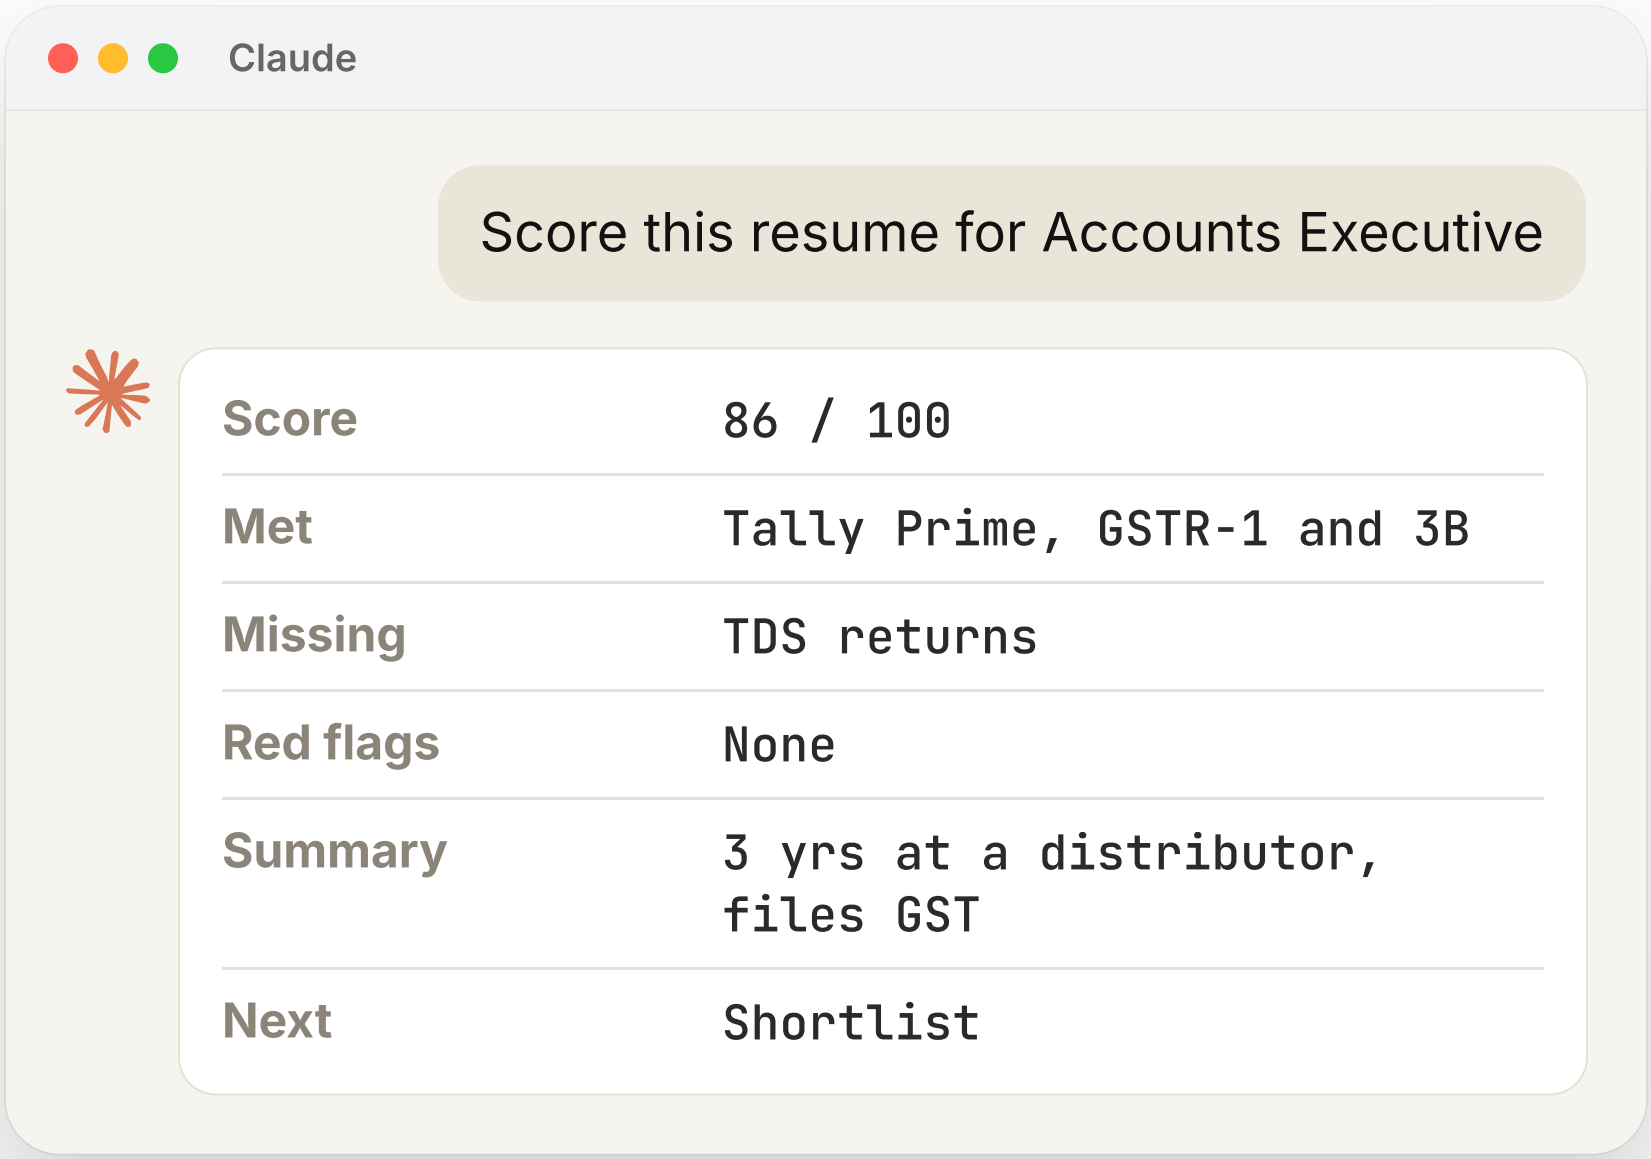

Read resume text

Load job description

Step 3

Claude scores it against your JD

Claude gives a score out of 100, which must-haves are met and which are missing, any red flags and a two-line summary. It is told to ignore name, gender, age, photo and college.

skills, not surnames

N8N NODES

Score with Claude

Log to Candidates sheet

Step 4

Shortlist, maybe or no

Every candidate becomes a row in your Candidates sheet. 75 and above goes to the shortlist, 50 to 74 lands in a maybe pile on Slack, and below 50 gets a polite regret saved as a Gmail draft. Nobody is rejected automatically.

Google Sheets

Candidates

	Name	Score	Missing	Status
1	**Ananya R.**	**86**	**TDS**	**Shortlist**
2	Imran K.	79	None	Shortlist
3	Vikram S.	71	GST returns	Maybe
4	Rohit P.	38	Tally, GST	Draft

N8N NODES

- Route by score
- Post to maybe pile
- Draft polite regret

Step 5

You approve, the invite goes out

Shortlisted candidates come to Slack with the score, the reasons and the resume link. Tap Invite and they get your interview booking link by email, and the sheet says Invited. If Gmail fails, you get an alert.

Slack

hiring

Resume Screener APP 10:14 PM

Shortlist: Ananya R. (86/100, 3 yrs) Met: Tally Prime, GST returns Missing: TDS returns Resume: Drive link

Invite to interview | Not now

you still choose who you meet

N8N NODES

Approve interview invite | Approved? | Send interview link | Mark as invited | Alert hiring manager | Mark as held back

What Changes

Before and after the workflow

BEFORE

- 63 PDFs, read one by one
- Best people gone by week two
- No record of who was seen

AFTER

- Every resume scored with reasons
- Top picks invited the same day
- One sheet with every candidate

STAYS HUMAN

No one is invited until you tap Invite, and no one is rejected unless you send the draft yourself.
