The Problem

Monday, 10:40 AM. 38 tickets.

A refund, five 'where is my order' messages and one 'third time I'm writing, I'll post a review' sit across the support inbox and WhatsApp. The team answers top to bottom. The angry one is number 31.

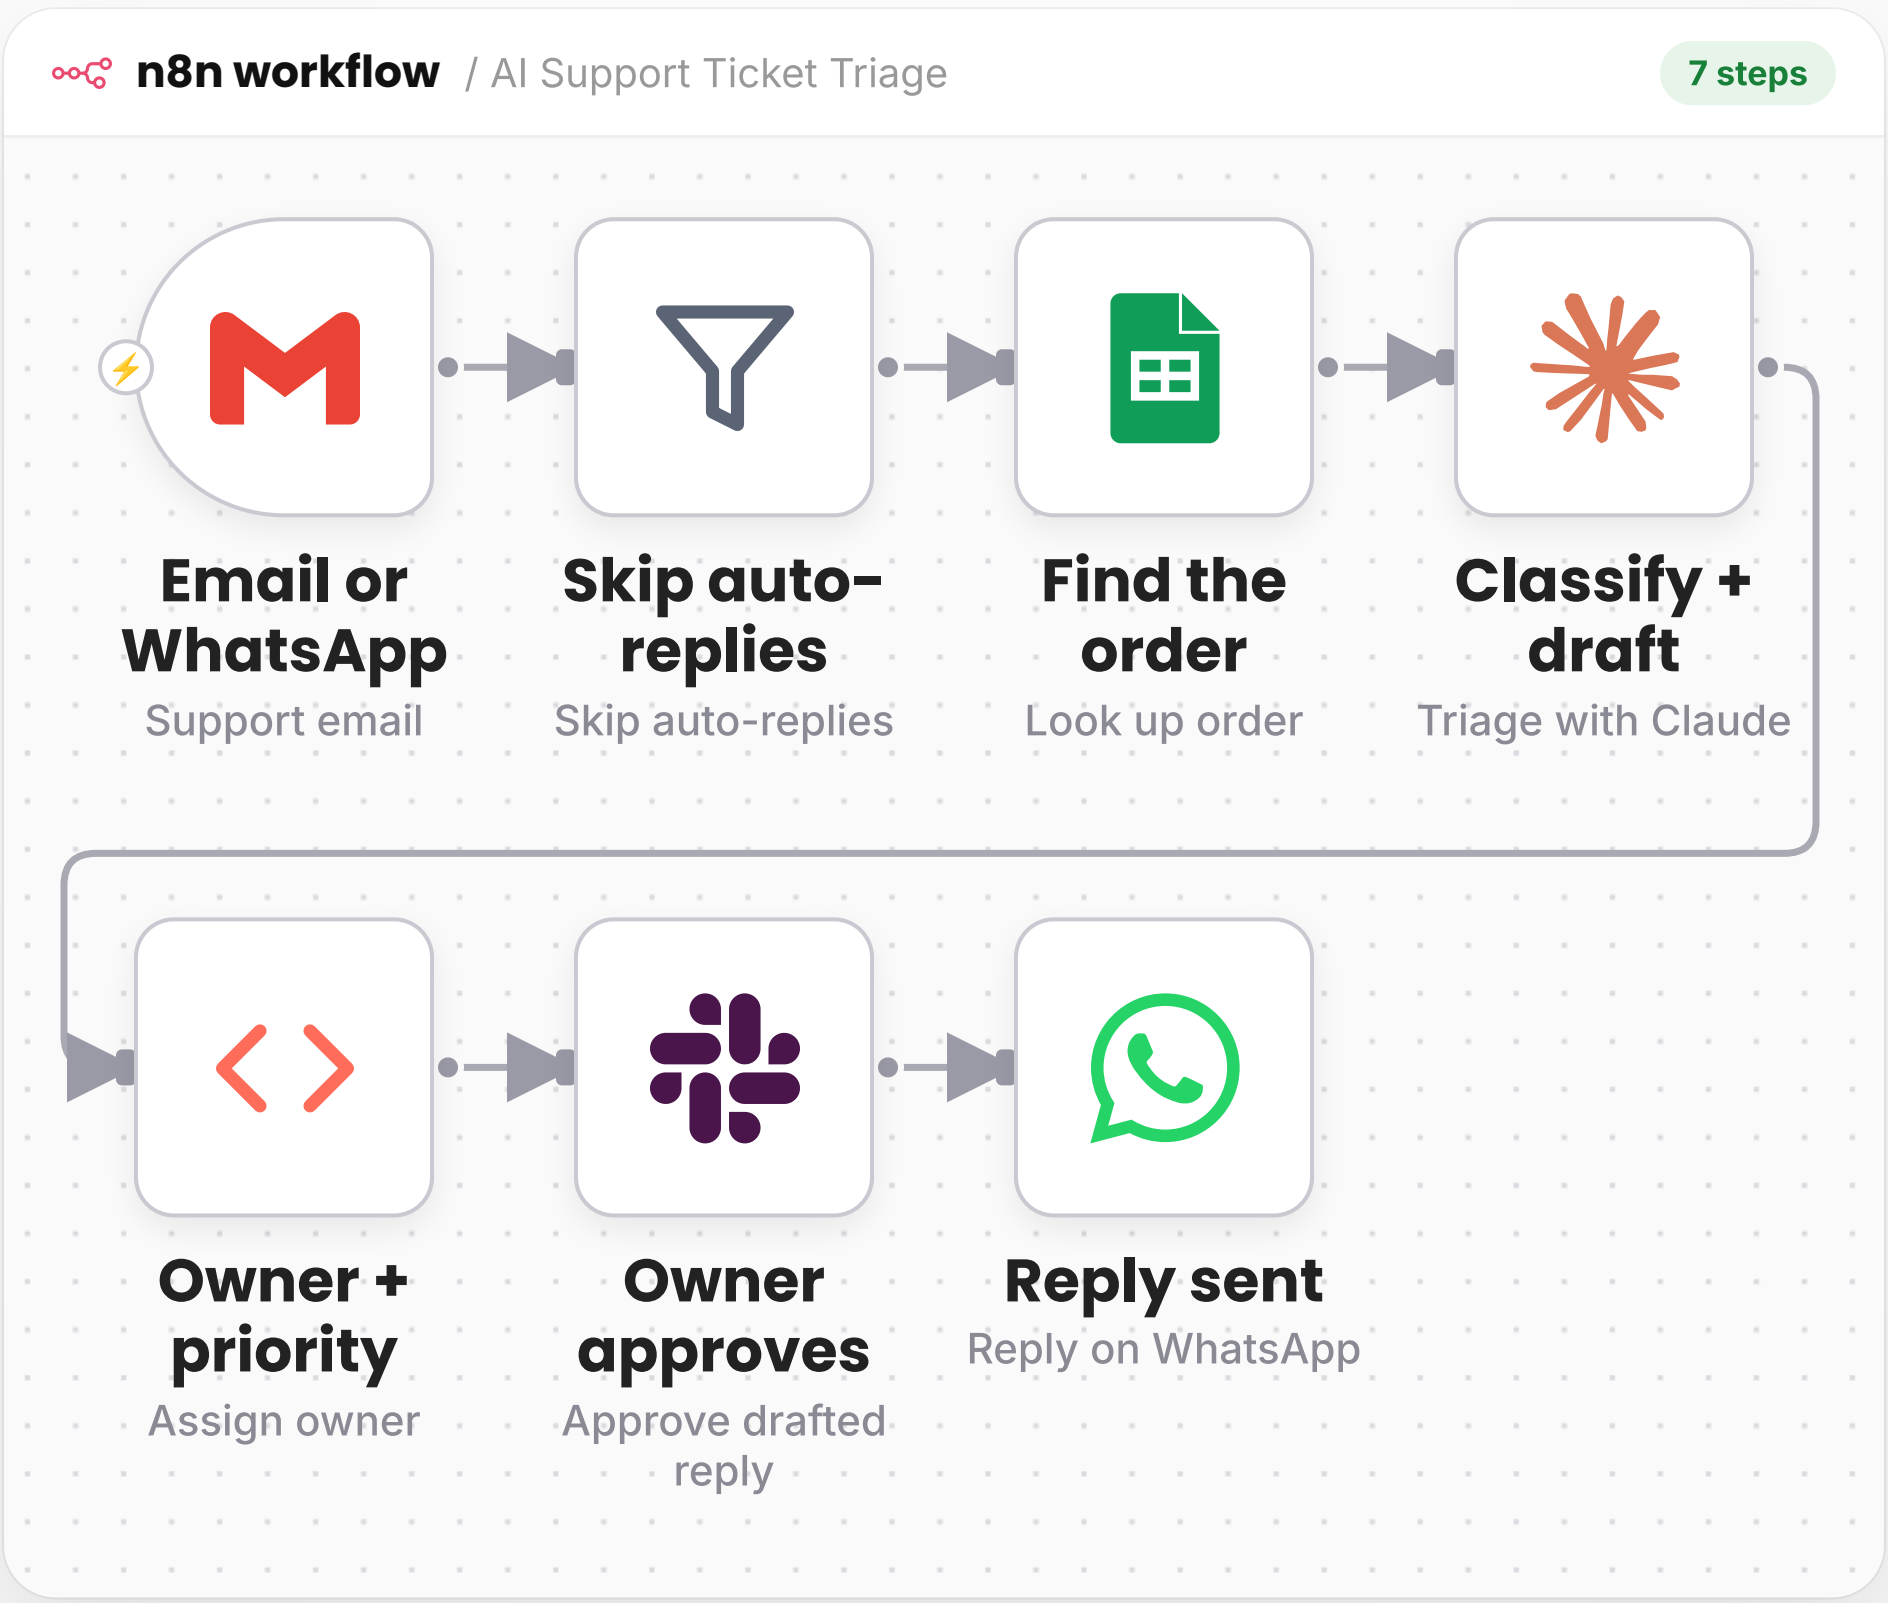

answered last, by accident

The Workflow

AI Support Ticket Triage

Every box below is a node in the free workflow.

Step 1

Catch every message

Support emails and WhatsApp messages become one ticket format: who, which channel, what they wrote. Out-of-office replies, no-reply mail and anything already ticketed are dropped before any AI cost.

- ✓ support@ inbox + WhatsApp number
- ✓ One ticket format for both
- ✓ Out-of-office? Dropped
- ✓ Already a ticket? Dropped
- ✓ Rest goes to Claude

two channels, one queue

N8N NODES

Support email · Support WhatsApp · Normalise ticket · Skip auto-replies · Already a ticket?

Step 2

Claude reads it with the order

n8n first finds the customer's order in your Orders sheet. Claude then labels the ticket refund, order status, bug, how-to or complaint, sets P1 to P3, spots anger, and drafts a reply using the real order status.

Claude

Triage this ticket

Category	Order status
Priority	P1
Mood	Angry
Order	#4417 · shipped 24 Oct
Draft	Hi Meera, I'm so sorry for the wait...
Confidence	0.93

real order data, no guessing

N8N NODES

Look up order

Triage with Claude

Step 3

Right owner, right priority

Each category has an owner and a time limit. The ticket is logged with who owns it and when it is due. Angry or P1 tickets also ping #support-escalations straight away.

Google Sheets

Tickets

	Customer	Type	Owner	Due
1	**Meera S.**	**P1 order**	**Arjun**	**12:40**
2	Karan	Refund	Priya	2:21
3	Dev	Bug	Dev team	5:47
4	Ritu	How-to	Support	6:02

N8N NODES

- Assign owner
- Log ticket
- Angry or urgent?
- Ping escalation

Step 4

The owner approves the reply

The draft lands in the owner's Slack channel with the customer's message and order details. Send reply sends it. 'I'll reply myself' marks the ticket for a manual reply, with the draft kept in the sheet.

Slack

support-orders

Ticket Agent APP 10:41 AM

Order status · P1 · angry (WhatsApp) Meera S., order #4417, shipped 24 Oct Draft: Hi Meera, I'm so sorry for the wait. Your order is with the courier...

Send reply | I'll reply myself

a human hits send

N8N NODES

Approve drafted reply | Approved? | Reply channel? | Mark for manual reply

Step 5

Reply goes back where it came from

Email tickets get a reply in the same Gmail thread. WhatsApp tickets get a WhatsApp reply. The sheet says Replied with the time. If a send fails, the support lead gets an alert.

Alert support lead

What Changes

Before and after the workflow

BEFORE

- Answered top to bottom
- Angry customer waits longest
- Nobody owns the refund

AFTER

- Angry and P1 seen first
- Every ticket has an owner
- Drafts use real order data

STAYS HUMAN

Every reply waits for the owner's tap in Slack.
The AI never promises a refund, amount or date.
