Never run out of stock again (n8n + Claude)

Swipe →

The Problem

Friday, 7:15 PM. No oat milk.

The café is full and the barista opens the last carton. The stock sheet has said '2 left' since Wednesday, but nobody looked. The supplier is shut on Sunday, so oat lattes are off the menu all weekend.

Google Sheets

Stock

	Item	In stock	Reorder at	Supplier
1	Coffee beans 1kg	9	4	Blue Hills
2	**Oat milk 1L**	**2**	**12**	**Fresh Dairy**
3	Paper cups 8oz	140	300	PackPro
4	Sugar sachets	800	500	PackPro

the sheet knew. nobody looked.

The Workflow

Low Stock Alert and Purchase Order

Every box below is a node in the free workflow.

Step 1

Check stock every morning

At 8 AM n8n reads your Stock sheet and the purchase orders already sent. Text like '12 pcs' becomes a number, and days of stock left are worked out from average daily sales.

Google Sheets

Stock · 8:00 AM

	Item	Left	Reorder at	Days left
1	**Oat milk 1L**	**2**	**12**	**1**
2	Paper cups 8oz	140	300	3
3	Coffee beans 1kg	9	4	6
4	Vanilla syrup	1	3	on order

N8N NODES

Every morning at 8

Read open POs

Read stock sheet

Clean numbers

Step 2

Find what's running low

Anything at or below its reorder level that isn't already on order is picked out. Items are grouped by supplier, so each supplier gets one purchase order with its own PO number.

- [x] Oat milk: 2 left, reorder at 12
- [x] Paper cups: 140 left, reorder at 300
- [x] Coffee beans: fine
- [x] Vanilla syrup: already on order, skipped
- [x] 2 suppliers, 2 POs

no double orders

N8N NODES

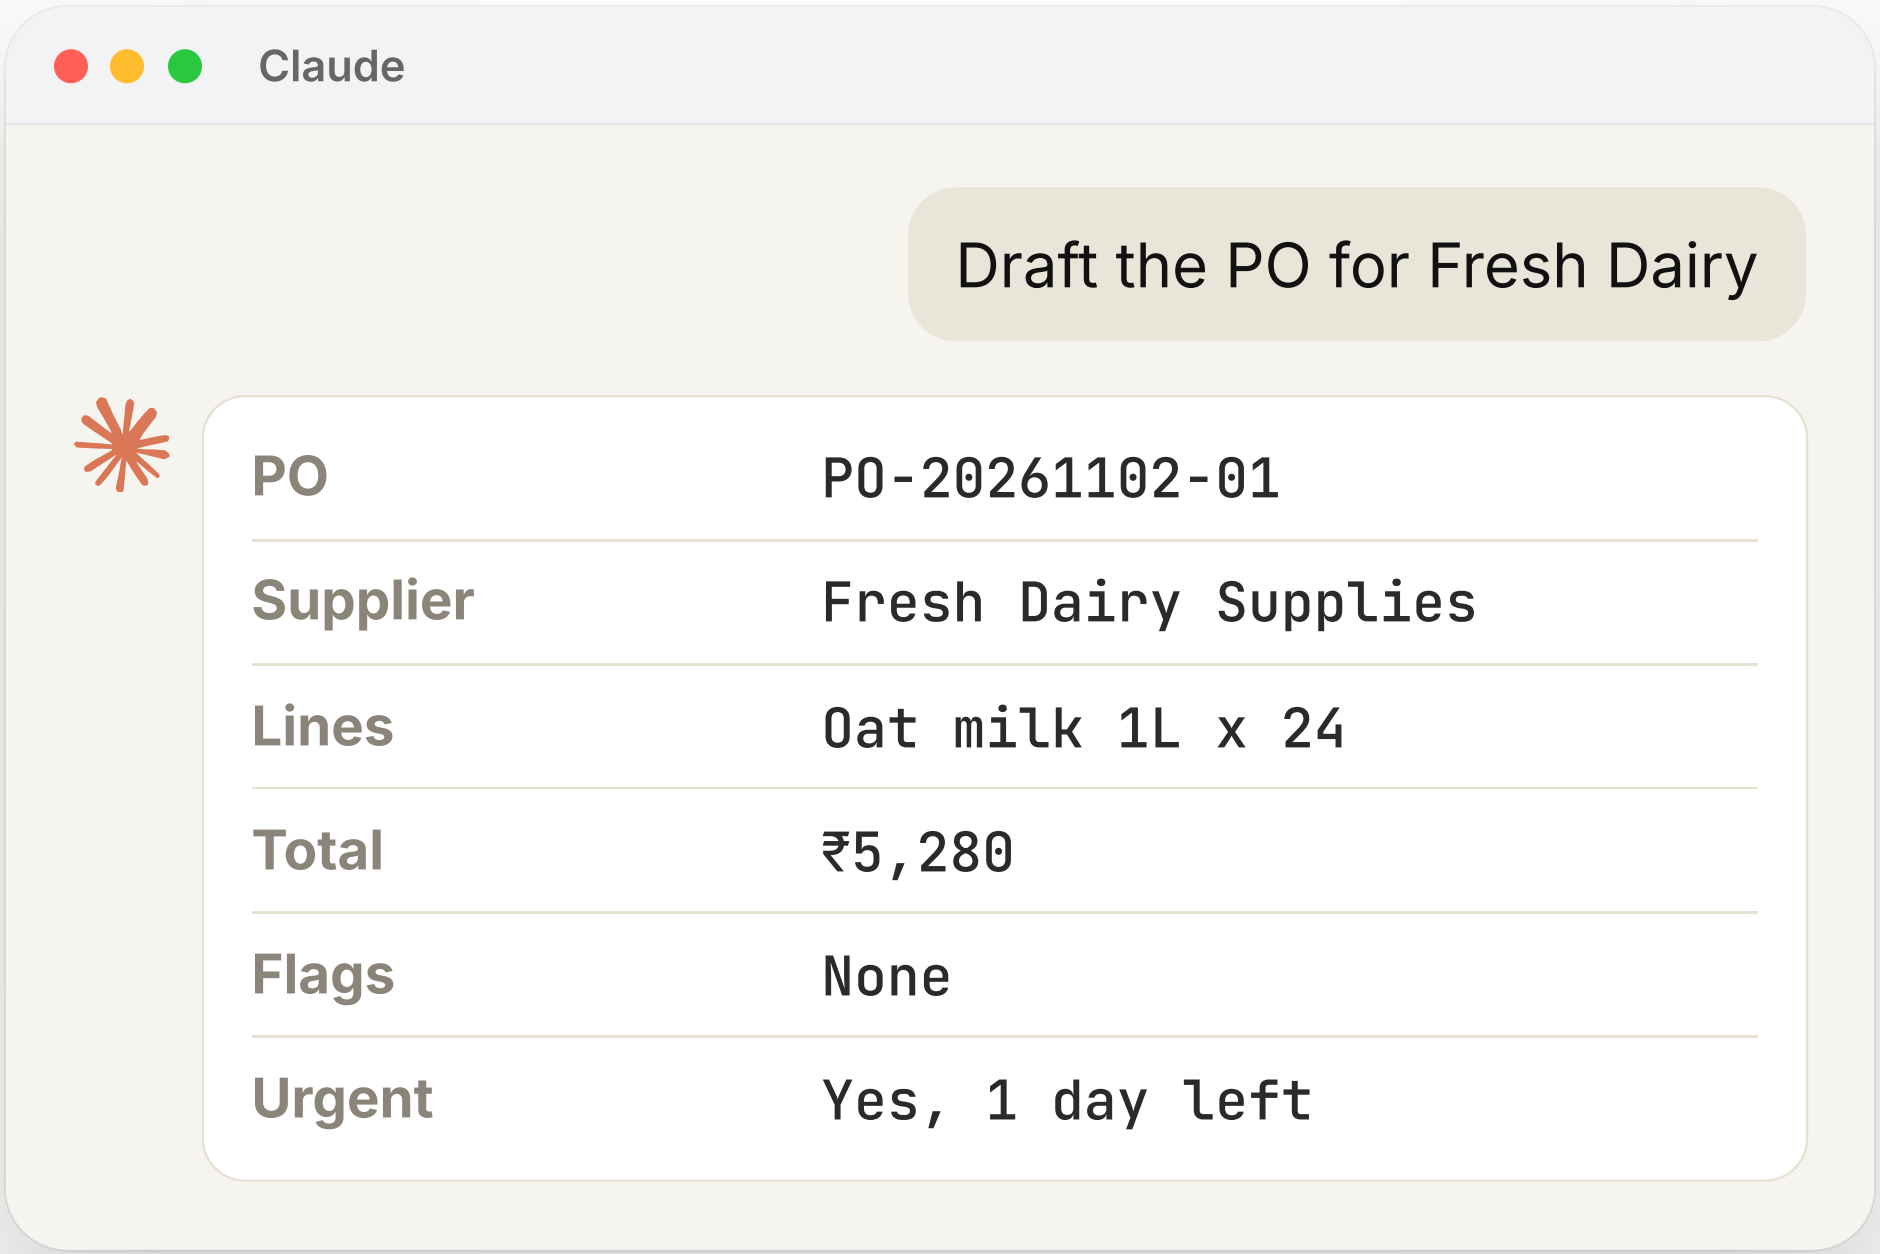

Low and not on order?

Group by supplier

Step 3

Claude drafts each purchase order

One supplier at a time, Claude writes a short, polite WhatsApp PO with items, quantities and last rates, and asks for a delivery date. It flags anything odd and never changes your numbers.

N8N NODES · One supplier at a time · Draft PO with Claude

Step 4

You approve on Slack

The PO comes to Slack with the lines, the total and the exact WhatsApp text. Send PO sends it. Skip today logs it as skipped, and it comes back tomorrow if stock is still low.

Slack

purchase

Stock Guard APP 8:02 AM

URGENT PO-20261102-01 to Fresh Dairy (approx ₹5,280) Oat milk 1L: order 24, 2 left, about 1 day

Send PO | Skip today

your money, your tap

N8N NODES

Approve purchase order

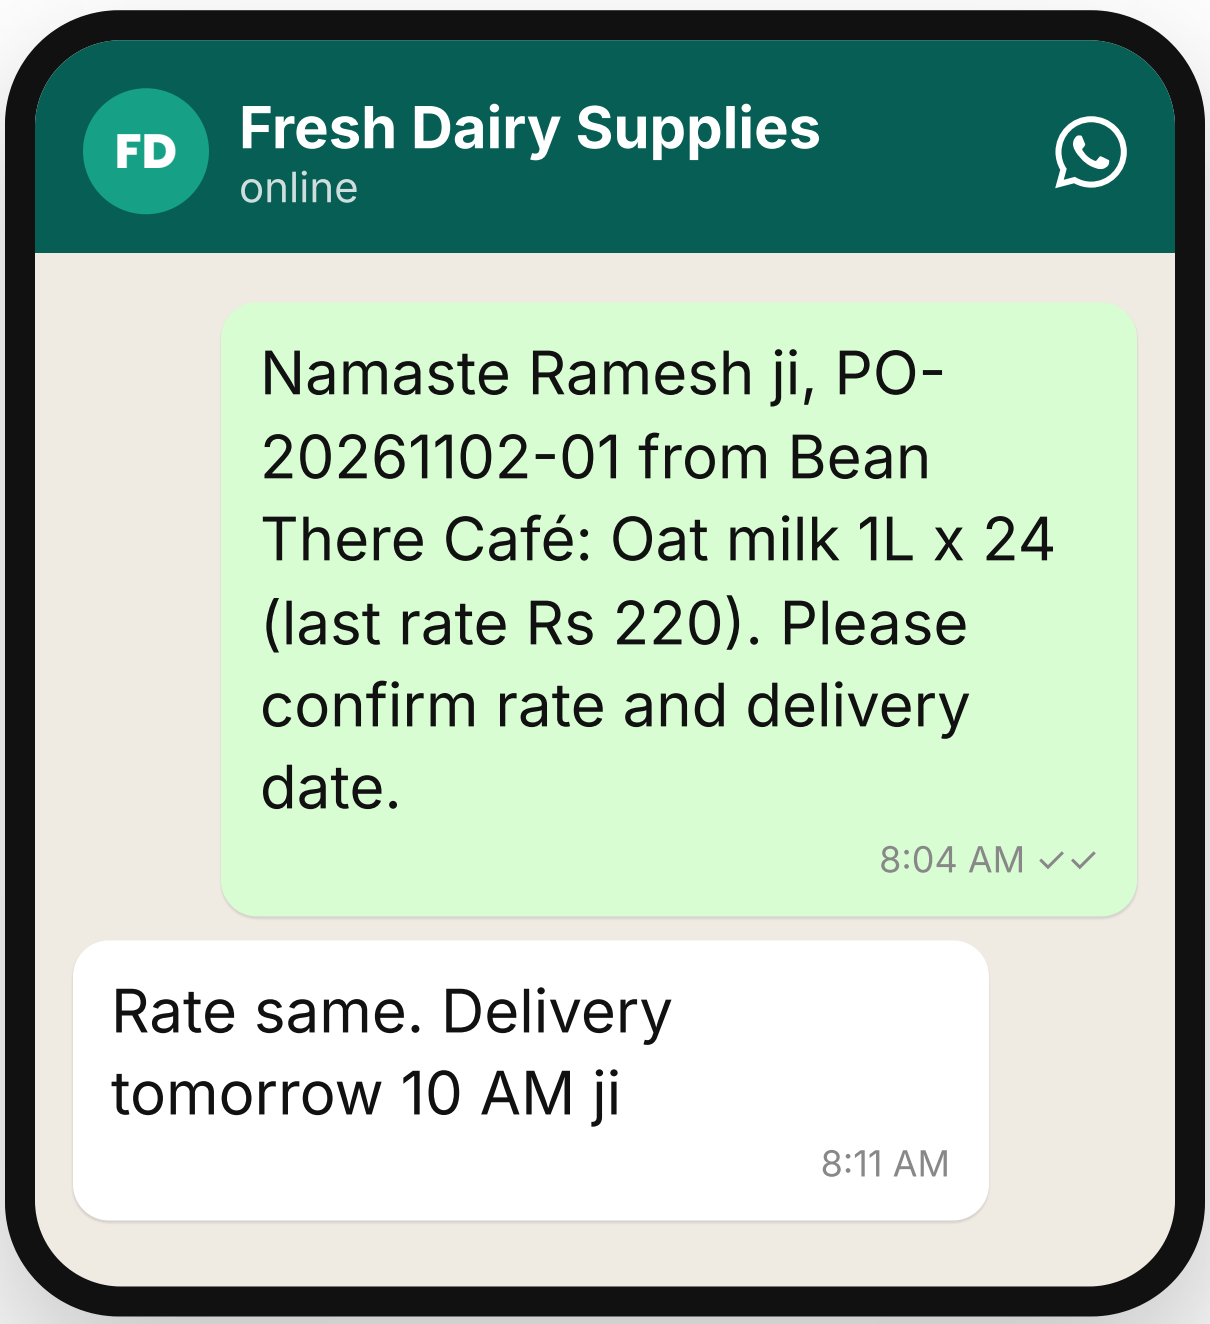

Approved?

Log as skipped

Step 5

PO goes to the supplier

The supplier gets the PO on WhatsApp and a copy by email. It is logged as Sent, so the same items are not ordered twice. If WhatsApp fails you get an alert, and a one-line summary lands in Slack.

N8N NODES

- Send PO on WhatsApp
- Email PO copy
- Log purchase order
- Alert owner
- Morning summary

What Changes

Before and after the workflow

BEFORE

- Reorders on sticky notes
- Found out when it ran out
- Same item ordered twice

AFTER

- Checked at 8 every morning
- PO drafted before it runs out
- Open orders never repeated

STAYS HUMAN

No purchase order reaches a supplier until you tap Send PO in Slack.
