Snap the bill, AI files it

(n8n + Claude)

The Problem

28 March. 'Send all bills.'

Your CA wants every expense bill for the year. They're in your WhatsApp 'Me' chat, a wallet of fuel slips, two Swiggy invoices in email and a Drive folder called 'bills new'. Tonight you match photos to bank entries.

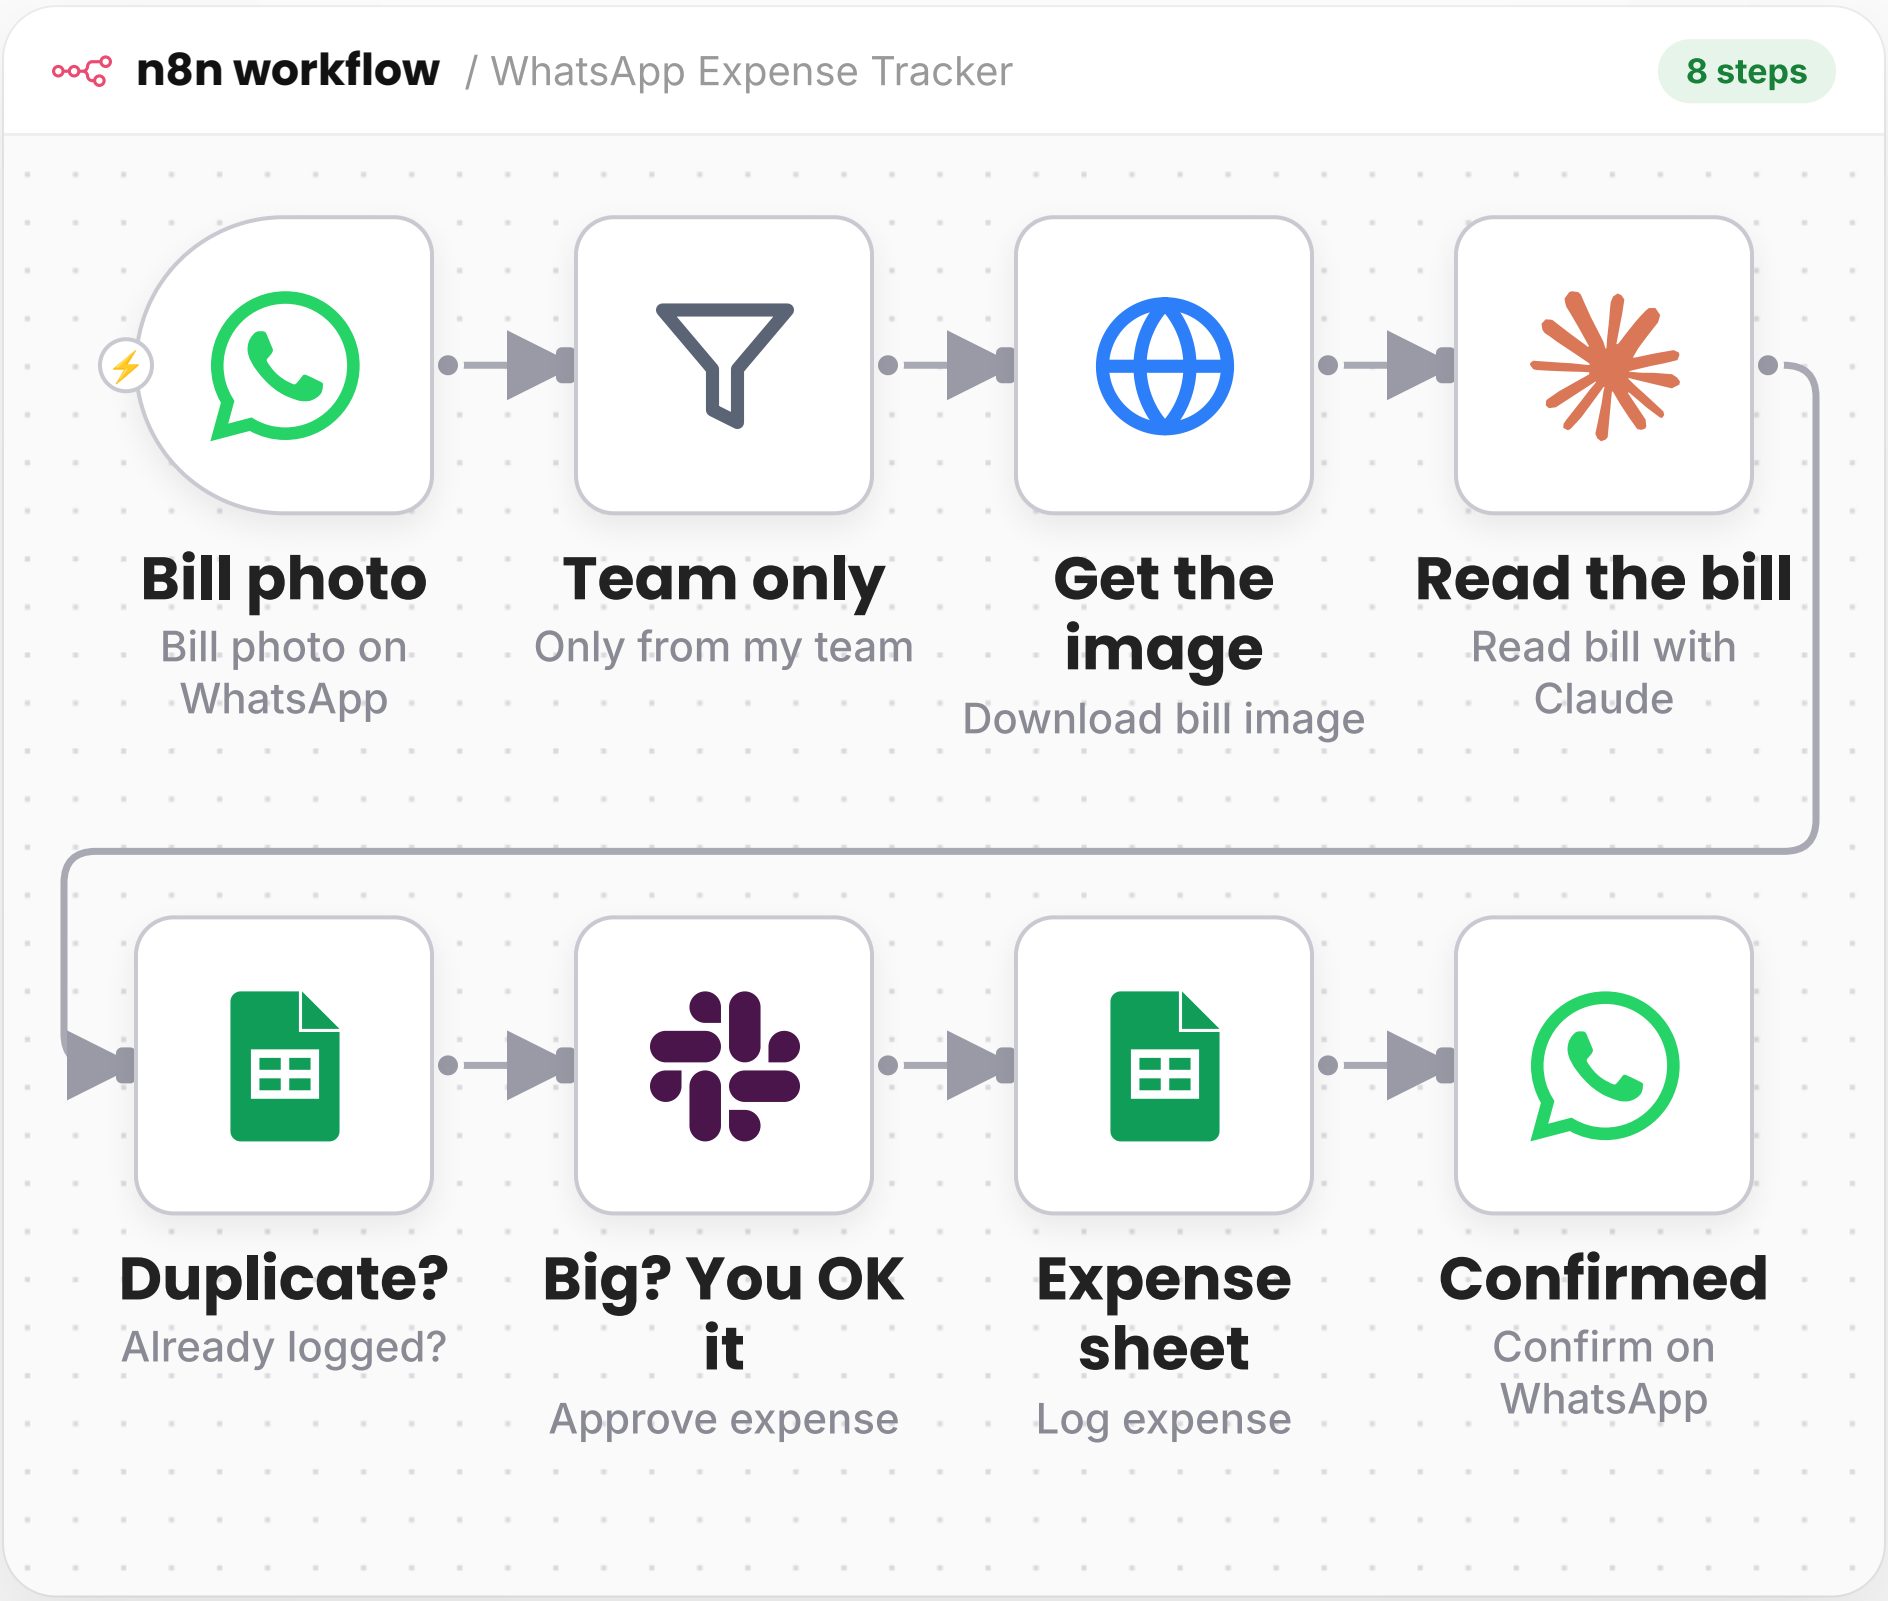

a whole year, in one night

The Workflow

WhatsApp Expense Tracker

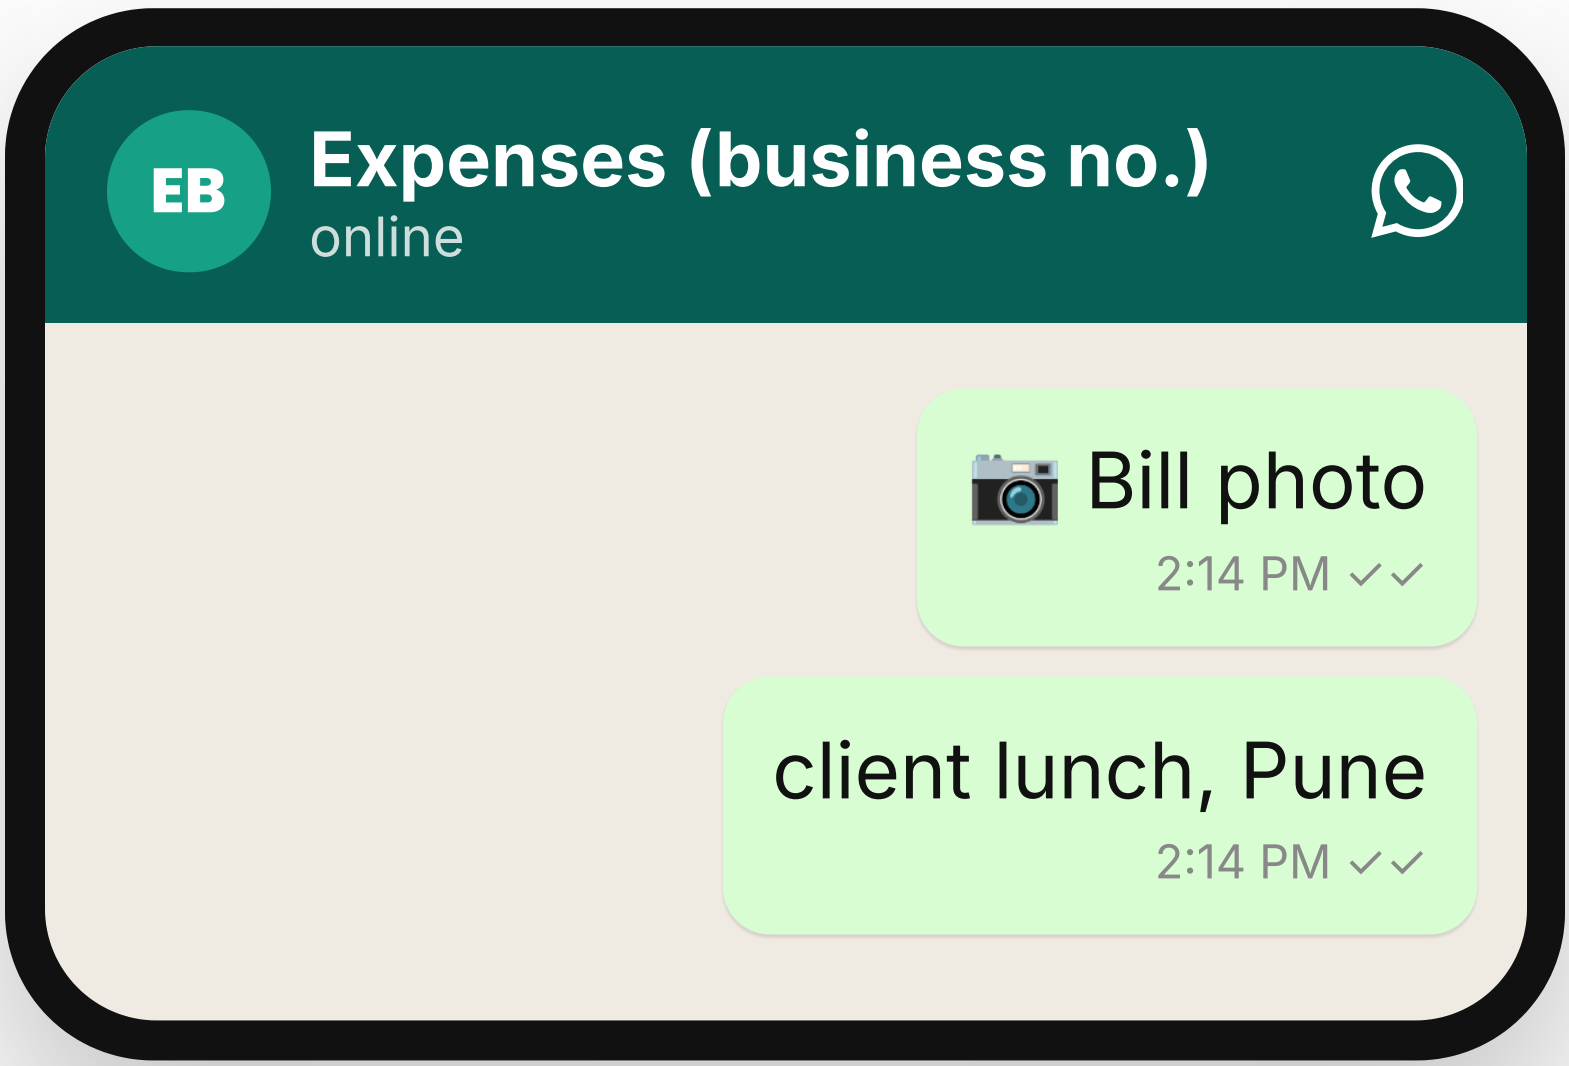

Every box below is a node in the free workflow.

Step 1

Snap the bill on WhatsApp

Anyone on your team sends a bill photo to your business WhatsApp number, with a note if they like. n8n accepts photos only from team numbers you list, skips repeats, and downloads the image.

Step 2

Claude reads the bill

The photo is saved to your Bills folder in Drive. Claude reads vendor, date, bill number, GSTIN, taxable amount, GST, total and payment mode, and picks a category. n8n then checks the date, the GSTIN format and the GST maths.

Step 3

The same bill never counts twice

Each bill gets a key made from vendor, bill number and total. If that key is already in your expense sheet, the sender gets an 'already logged' reply instead of a double entry.

- Key: cafemocha | 4471 | 2360
- Looked up in Expenses
- New? Goes on
- Already there? '🔁 Already logged'

Step 4

Big or unclear bills come to you

Bills of ₹10,000 or more, blurry photos, or anything that failed a check go to Slack with the photo link. Tap Log it to add it. Everything else is logged straight away.

Step 5

Logged, confirmed, summed up for your CA

The expense goes into your sheet with the Drive photo link, and the sender gets a WhatsApp confirmation. On the 1st of every month, n8n totals last month by category and saves a draft email to your CA.

2	Food	22	₹980	₹19,650

STAYS HUMAN

Big or unclear bills are logged only after you approve. The CA email is a draft you send yourself.
