Out of coffee?

Reorder in 1 tap

(n8n + Claude)

The Problem

Day 26. Out of coffee.

Rohan orders 500 g of your coffee roughly every 24 days. On day 26 the bag is empty, it's 8 AM, and there's a supermarket downstairs. He buys whatever is on the shelf. Nobody knew he was due.

Google Sheets

Repeat customers

	Customer	Last order	Usually	Reminded?
1	**Rohan S.**	**14 Oct**	**every 24 days**	**No**
2	Meera K.	2 Oct	every 30 days	No
3	Arjun P.	20 Oct	every 21 days	No

not unhappy. just empty.

The Workflow

Repeat-Customer Reorder Reminders

Every box below is a node in the free workflow.

Step 1

Learn each customer's rhythm

Every morning n8n reads 6 months of Shopify orders and your refill rules: which products run out, and how many days a pack lasts. Each order becomes one row per product per customer.

Google Sheets

Refill rules

	Product	Lasts	Remind
1	**Coffee 500 g**	**24 days**	**Yes**
2	RO filter	150 days	Yes
3	Dog food 3 kg	30 days	Yes
4	French press	-	No

N8N NODES

Every morning at 10

Load refill rules

Get recent orders

Flatten line items

Step 2

Who runs out in the next 3 days?

For customers who ordered twice or more, n8n uses their own average gap. For first-timers, it uses pack size times days per pack. Anyone due in the next 3 days who opted in to messages is picked.

Google Sheets

Due soon

	Customer	Product	Basis	Due
1	**Rohan S.**	**Coffee 500 g**	**his gap: 24 days**	**7 Nov**
2	Meera K.	RO filter	1 pack: 150 days	9 Nov
3	Arjun P.	Dog food 3 kg	his gap: 21 days	10 Nov

his rhythm, not a guess

N8N NODES

Work out due date

Due in next 3 days?

Opted in only

Step 3

Never twice in one cycle

Your Reminders log is checked, so each customer gets one reminder per refill cycle, and at most one message a day, even if the workflow runs again.

- [x] Rohan, coffee, due 7 Nov: not sent yet
- [x] Meera, filter: sent yesterday, skipped
- [x] One message per customer per day
- [x] Reordered already? Not due any more

N8N NODES

Read reminder log

Not reminded this cycle

Step 4

Claude writes it, you approve the list

Claude writes one personal line per customer, like 'your 500 g Monsoon Malabar should be running low around now'. The whole day's list comes to Slack once: Send all, or Not today.

Slack

retention

Reorder Bot APP 10:01 AM

3 reorder reminders ready for today • Rohan: Coffee 500 g, due 7 Nov (every 24 days) • Meera: RO filter, due 9 Nov • Arjun: Dog food 3 kg, due 10 Nov

Send all | Not today

one tap for the whole list

N8N NODES

Write reminder with Claude → Combine reminder → Collect today's list → Approve today's reminders → Approved?

Step 5

One tap to reorder

Each customer gets an approved WhatsApp template with their personal line and a Shopify link that opens checkout with the same product and quantity. Every reminder is logged, and failures alert you.

N8N NODES

- One row per customer
- Send reorder reminder
- Log reminder
- Alert owner

What Changes

Before and after the workflow

BEFORE

- Customers run out, buy elsewhere
- No idea who is due
- Same blast to everyone

AFTER

- Reminded 1 to 3 days before
- Based on their own rhythm
- One tap back to the same order

STAYS HUMAN

Only opted-in customers are messaged, once per cycle, and only after you approve the day's list.
