Closing report at 9:01 PM

(n8n + Claude)

The Problem

"Aaj kitna hua?" at 10:40 PM

The owner is at the second outlet. The staff send a blurry photo of the register. Nobody knows the UPI total, the drawer is ₹600 short, and the butter ran out by 7 PM.

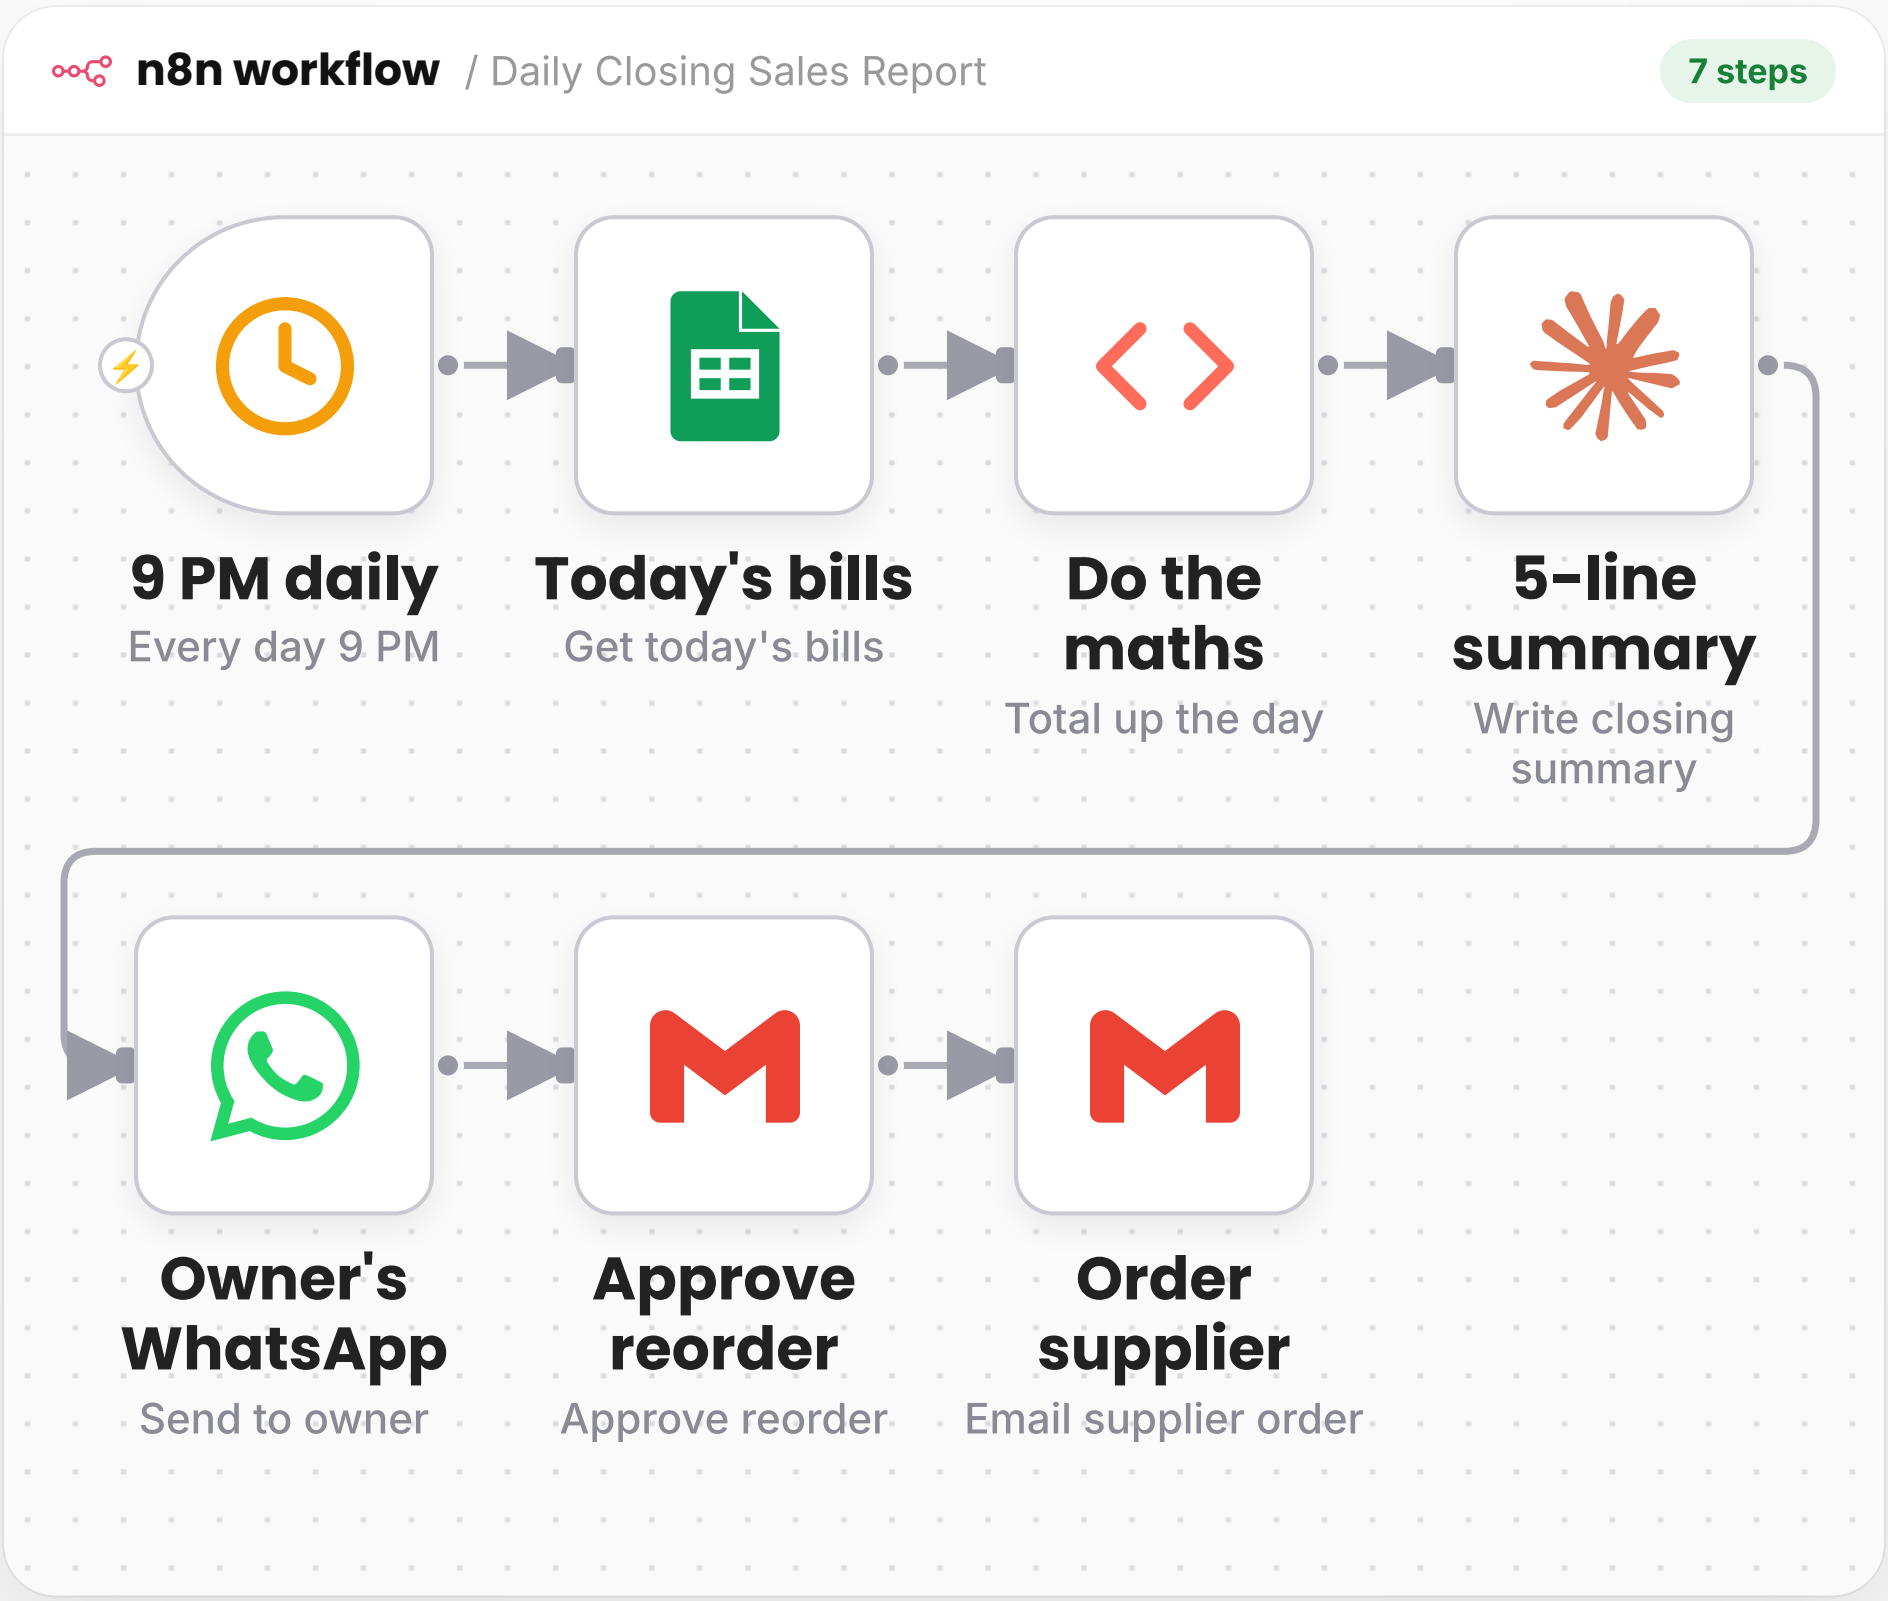

every single night

The Workflow

Daily Closing Sales Report

Every box below is a node in the free workflow.

Step 1

At 9 PM, n8n pulls the day

Every night at 9 PM n8n reads today's bills from your POS export sheet, the stock tab and the cash your cashier counted. If tonight's report already went out, it stops.

Google Sheets

Sales · today

	Bill	Item	Amount	Paid by
1	B-2231	Amul Butter 500g	₹285	UPI
2	**B-2232**	**Aashirvaad Atta 10kg**	**₹520**	**Cash**
3	B-2233	Tata Salt x2	₹56	UPI
4	B-2234	Fortune Oil 1L	₹165	Card

no typing at closing time

N8N NODES

Every day 9 PM · Set report date · Check report log · Already sent today? · Get today's bills · Get stock levels · Get counted cash · Get last week's total

Step 2

Code does the maths, not AI

A Code node adds it all up: total sales, bill count, cash vs UPI vs card, top 5 items, voided bills, low stock, and the gap between counted cash and expected cash.

Output · JSON

```
{
  "total": 48260,
  "bills": 212,
  "cash": 14900, "upi": 30110,
  "card": 3250,
  "cash_gap": -600,
  "low_stock": ["Amul Butter 500g"]
}
```

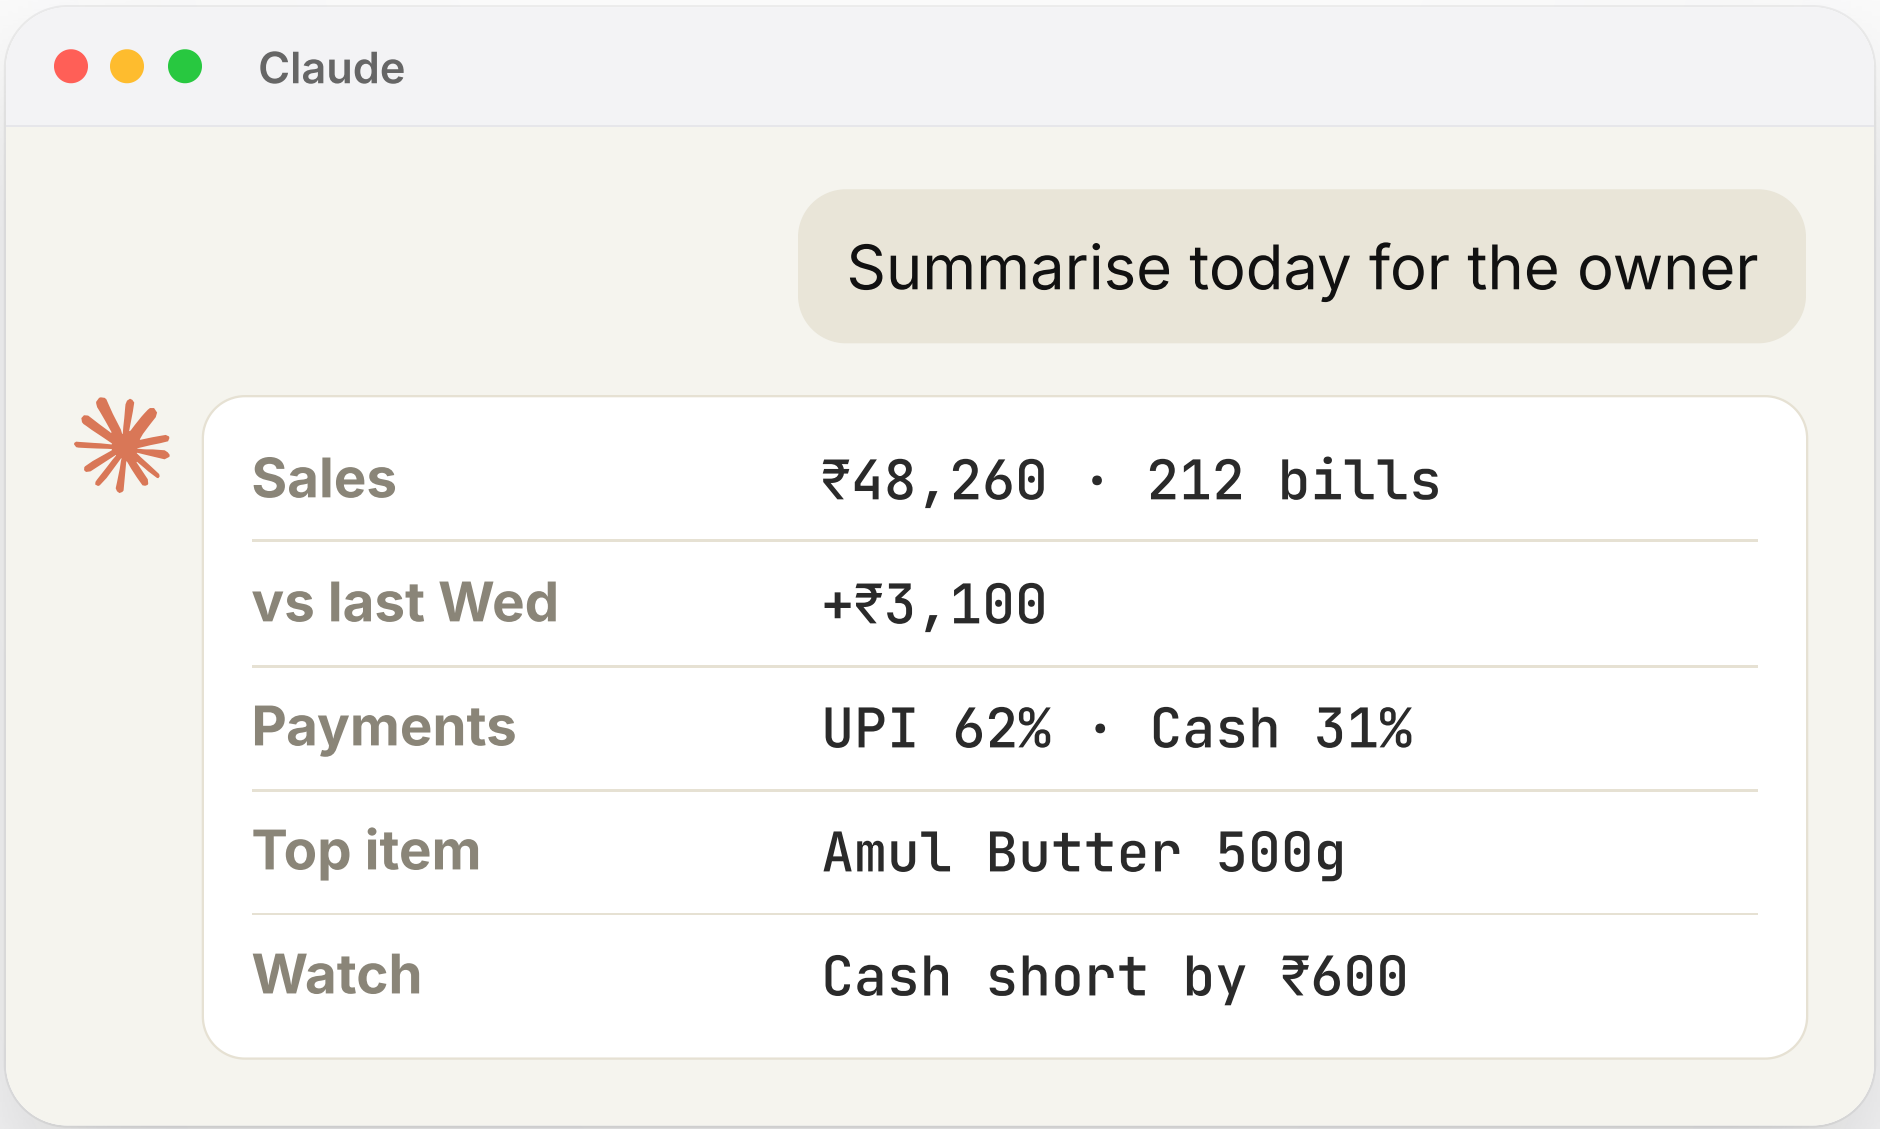

numbers never come from AI

N8N NODES Total up the day

Step 3

Claude writes 5 lines you can read

Claude turns the numbers into five short lines and one thing to watch, like a cash gap or an item about to run out. A check makes sure its total matches the Code total.

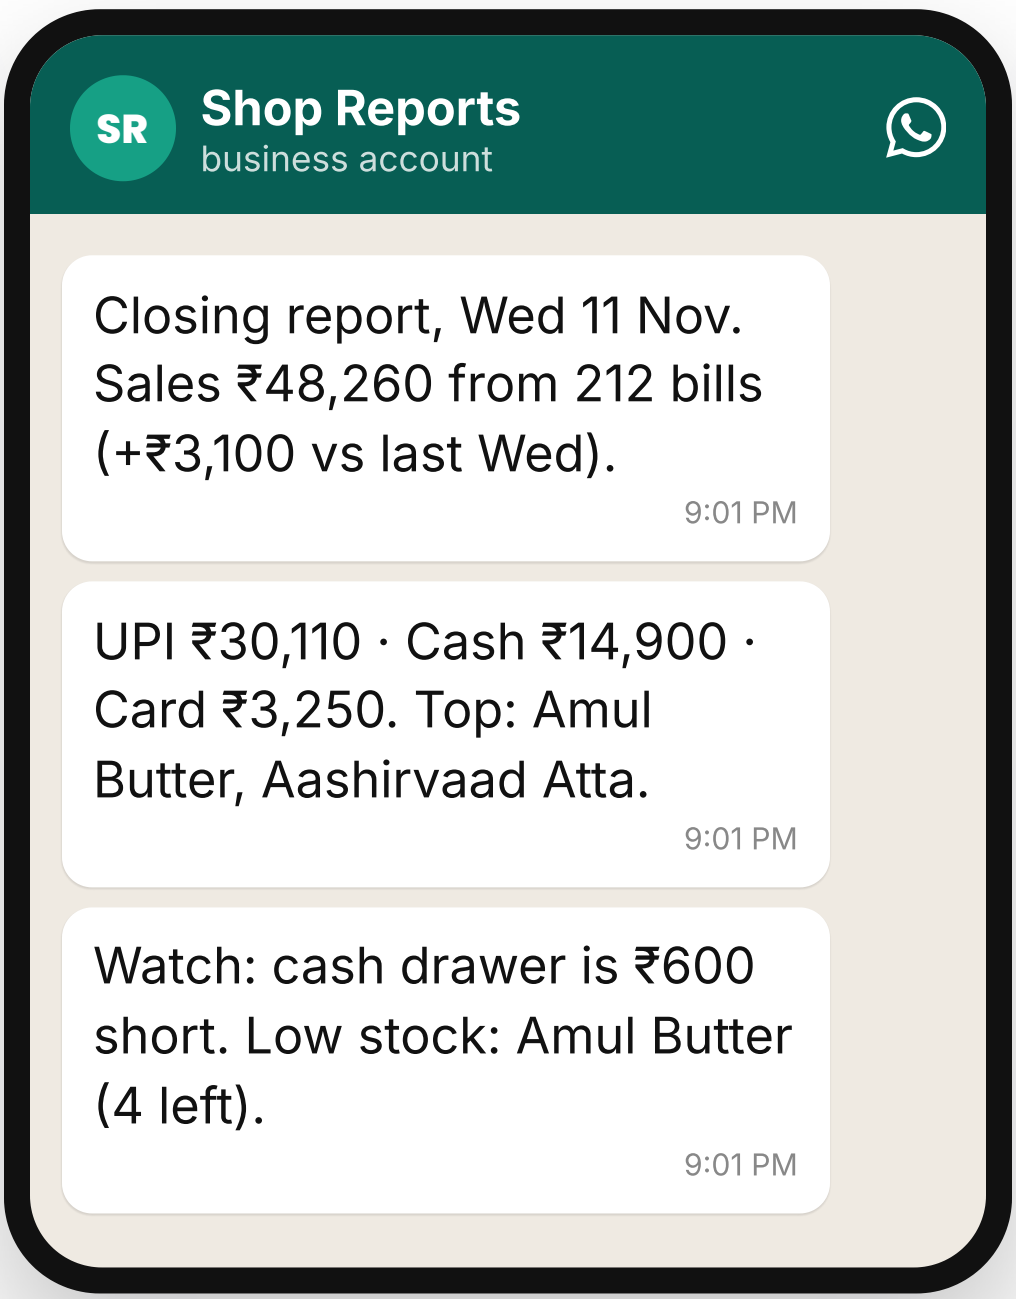

N8N NODES

- Write closing summary
- Claude
- Summary format
- Check Claude's numbers

Step 4

The report lands on WhatsApp

The summary goes to the owner's WhatsApp as an approved template message and the day is logged in the Reports tab. If WhatsApp fails, the report comes by email instead.

before the shutter is down

N8N NODES

Send to owner

Log the day

Report failed alert

Step 5

Reorder with one tap

If anything is below its reorder level, you get an email with the list and Approve / Reject buttons. Approve, and the order goes to your distributor. Nothing is ordered without your tap.

Gmail

Approve tonight's reorder (3 items)

n8n
to you

Amul Butter 500g: 4 left, order 24
Tata Salt 1kg: 6 left, order 30
Maggi 12-pack: 2 left, order 10

[Approve] [Reject]

N8N NODES

Any low stock?

Approve reorder

Reorder approved?

Email supplier order

What Changes

Before and after the workflow

BEFORE

- Calling staff at 10 PM for totals
- UPI vs cash checked next morning
- Stock-outs found by customers

AFTER

- Report on WhatsApp at 9:01 PM
- Cash gap flagged the same night
- Reorder list ready to approve

STAYS HUMAN

Code does every sum. Claude only words it, and nothing is ordered until you tap Approve.
