# The Problem

## Asked at 10:48 PM. Forgotten.

A receptionist asks for leave on WhatsApp at night. The manager reads it, means to reply, forgets. On 12 Nov two receptionists are off and the queue is out of the door.

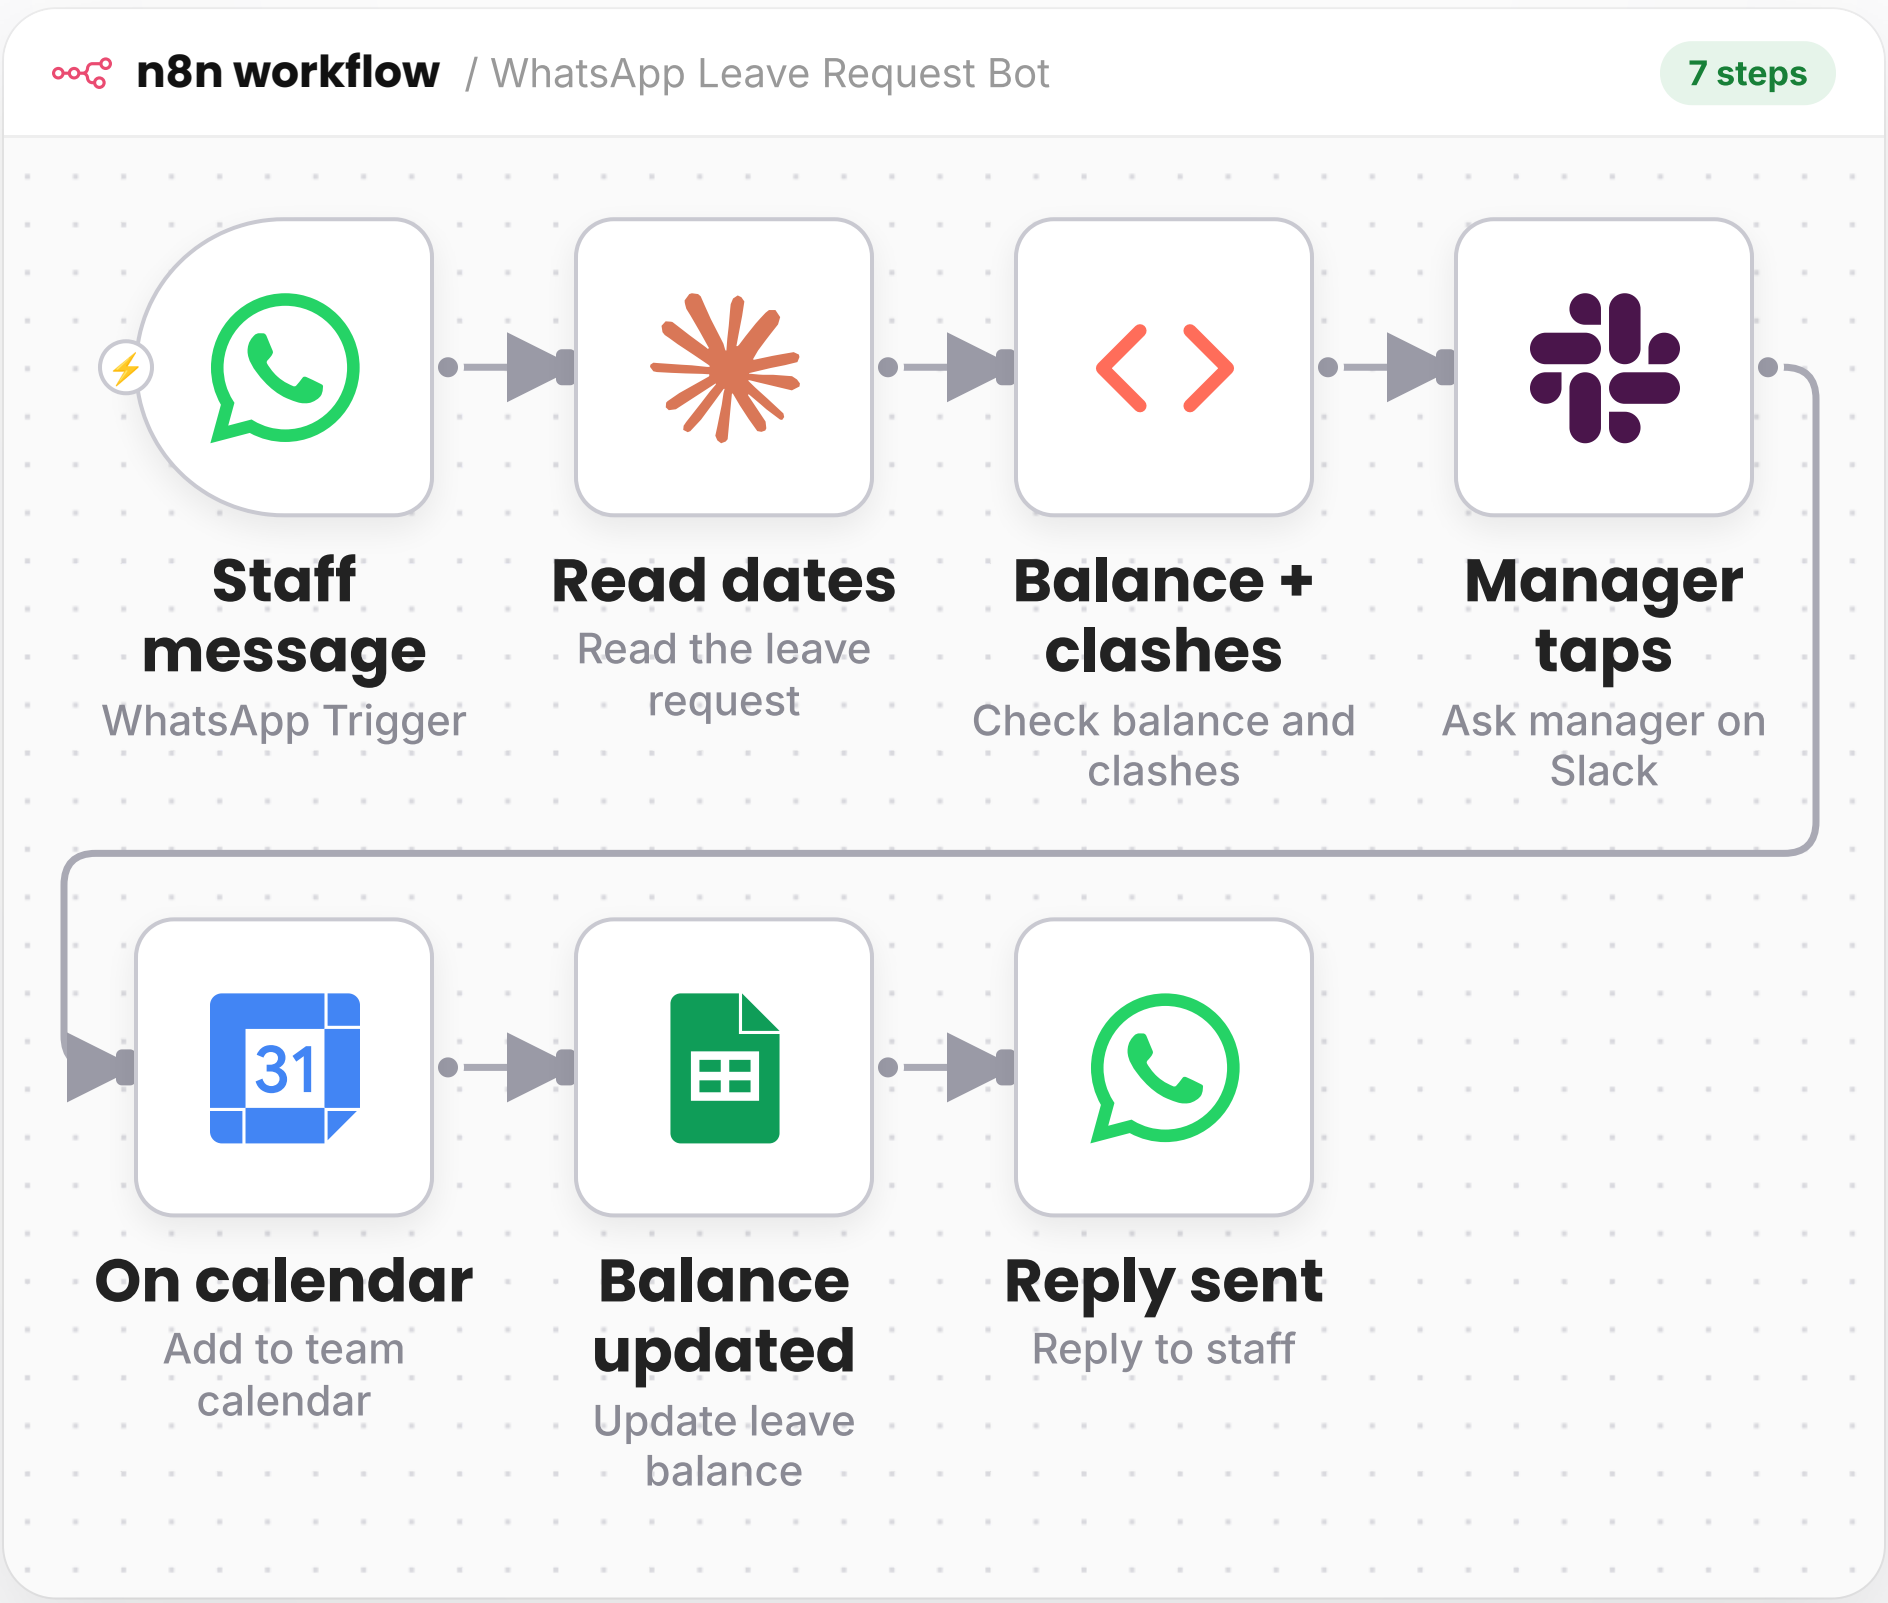

and Ravi was off too

# The Workflow

## WhatsApp Leave Request Bot

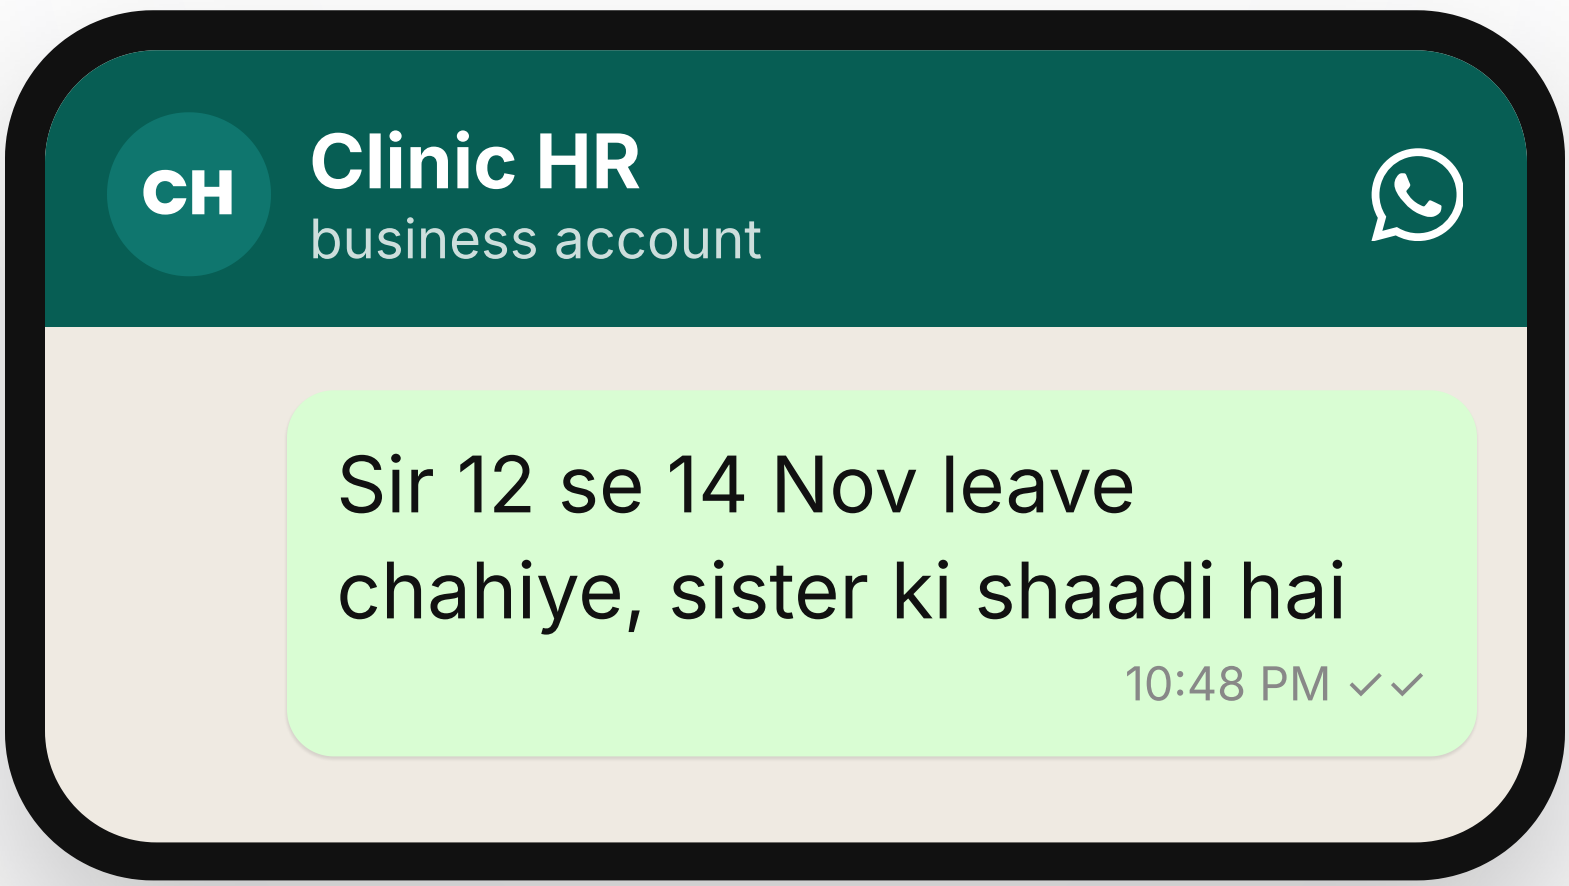

Every box below is a node in the free workflow.

# Step 1

## Staff just WhatsApp the number

Staff send a normal WhatsApp to the business number. n8n checks the sender is on your Staff sheet, ignores repeats, and everyone else is left alone.

no app, no form

N8N NODES

WhatsApp Trigger · Clean up message · Skip repeats · Find staff member · Known staff?

# Step 2

## Claude reads "12 se 14 Nov"

Claude turns the message into fixed fields: leave or balance question, type, from date, to date, half day, reason. It understands Hinglish, "kal" and "next Monday".

N8N NODES

Read the leave request

Claude

Leave fields

Leave or balance?

# Step 3

## Balance and clashes checked

A Code node counts the working days, checks the leave balance, and looks for anyone in the same team already approved on those dates.

- [x] 3 working days (Sunday skipped)
- [x] Casual balance: 5 left
- [x] Clash: Ravi (Reception) off 13 Nov
- [x] Dates are in the future

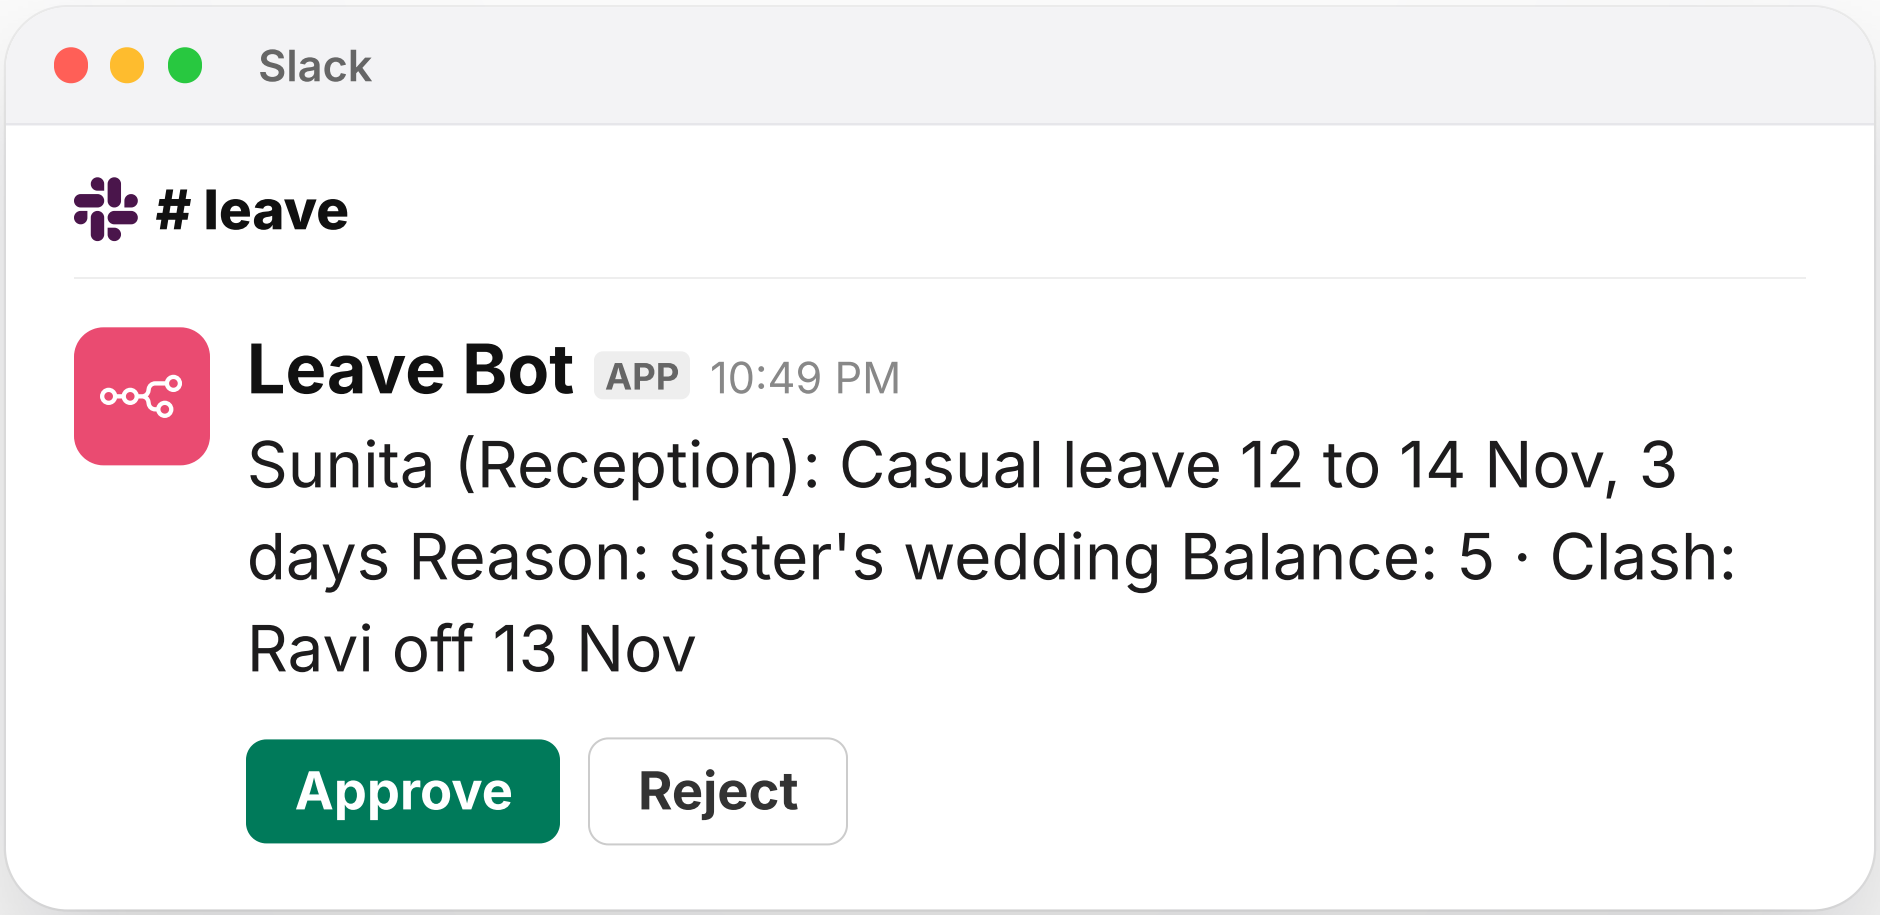

*the clash you'd have missed*

N8N NODES · Get approved leave · Check balance and clashes

# Step 4

## Manager approves in one tap

The manager gets one Slack message with name, dates, days, balance and clashes, and taps Approve or Reject.

N8N NODES

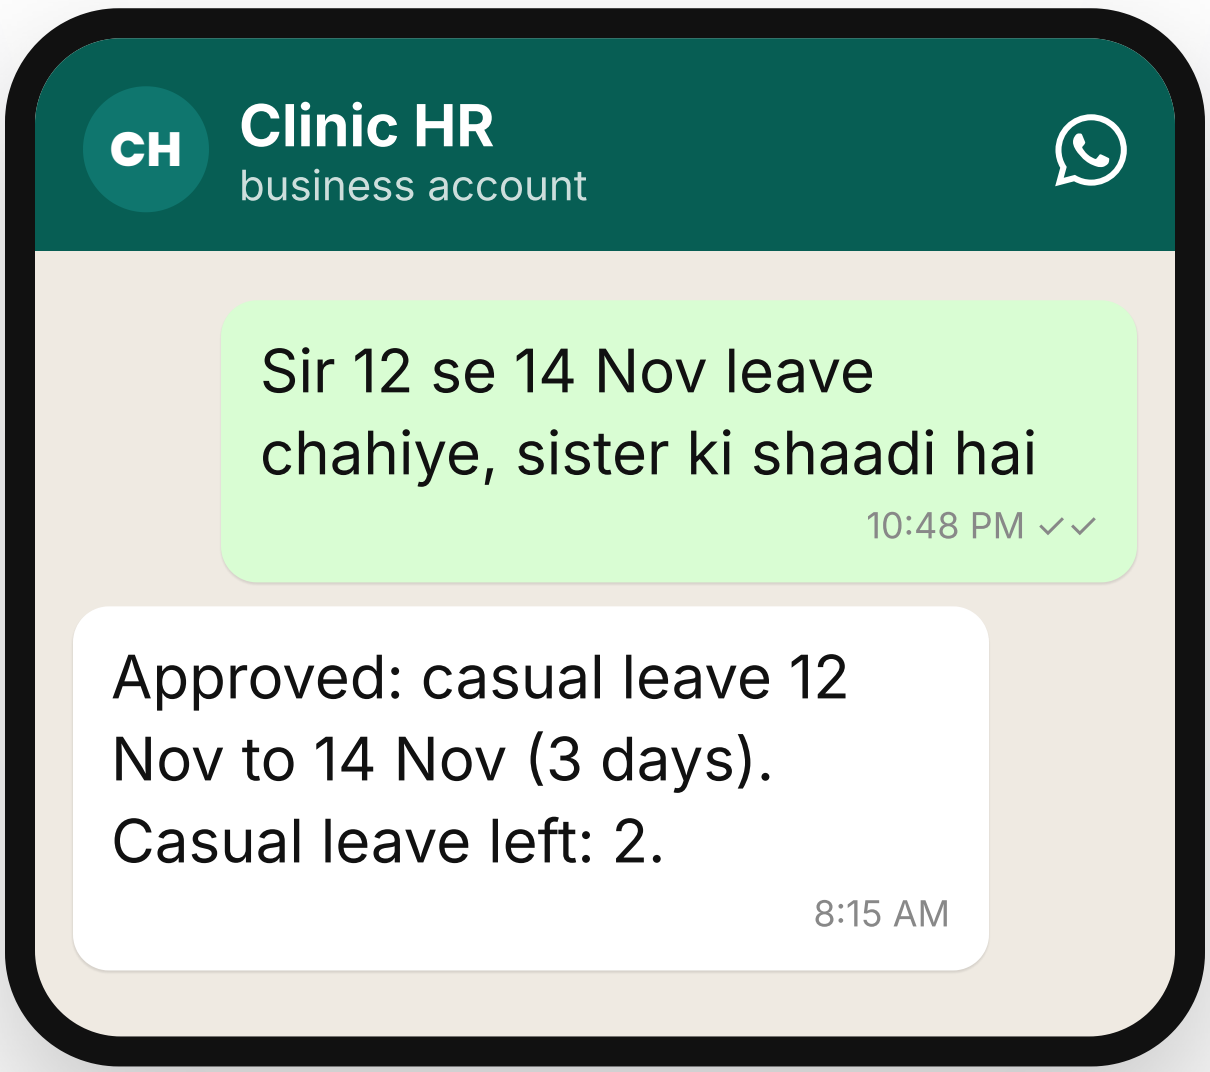

Ask manager on Slack

Approved?

# Step 5

## Calendar, sheet and reply, done

Approved leave goes on the team calendar, the balance is reduced, the Leave sheet is updated, and the staff member gets a WhatsApp reply with what is left. Balance questions get an instant answer.

N8N NODES

- Add to team calendar
- Update leave balance
- Log leave
- Reply to staff
- Reply failed alert
- Reply with balance
- Pass to manager

# What Changes

## Before and after the workflow

**BEFORE**

- Leave asked in random chats
- Balances in someone's register
- Clashes found on the day

**AFTER**

- One WhatsApp, one Slack tap
- Balance updated automatically
- Clashes shown before approval

**STAYS HUMAN**

**Claude only reads the dates. Every leave is approved or rejected by the manager, never by the bot.**
