The Problem

Video's live. Posts? Never.

Sunday: Kavya publishes a 14-minute video on GST for freelancers. Monday, 11 PM: the LinkedIn box is still empty. The X thread and the IG caption never happen.

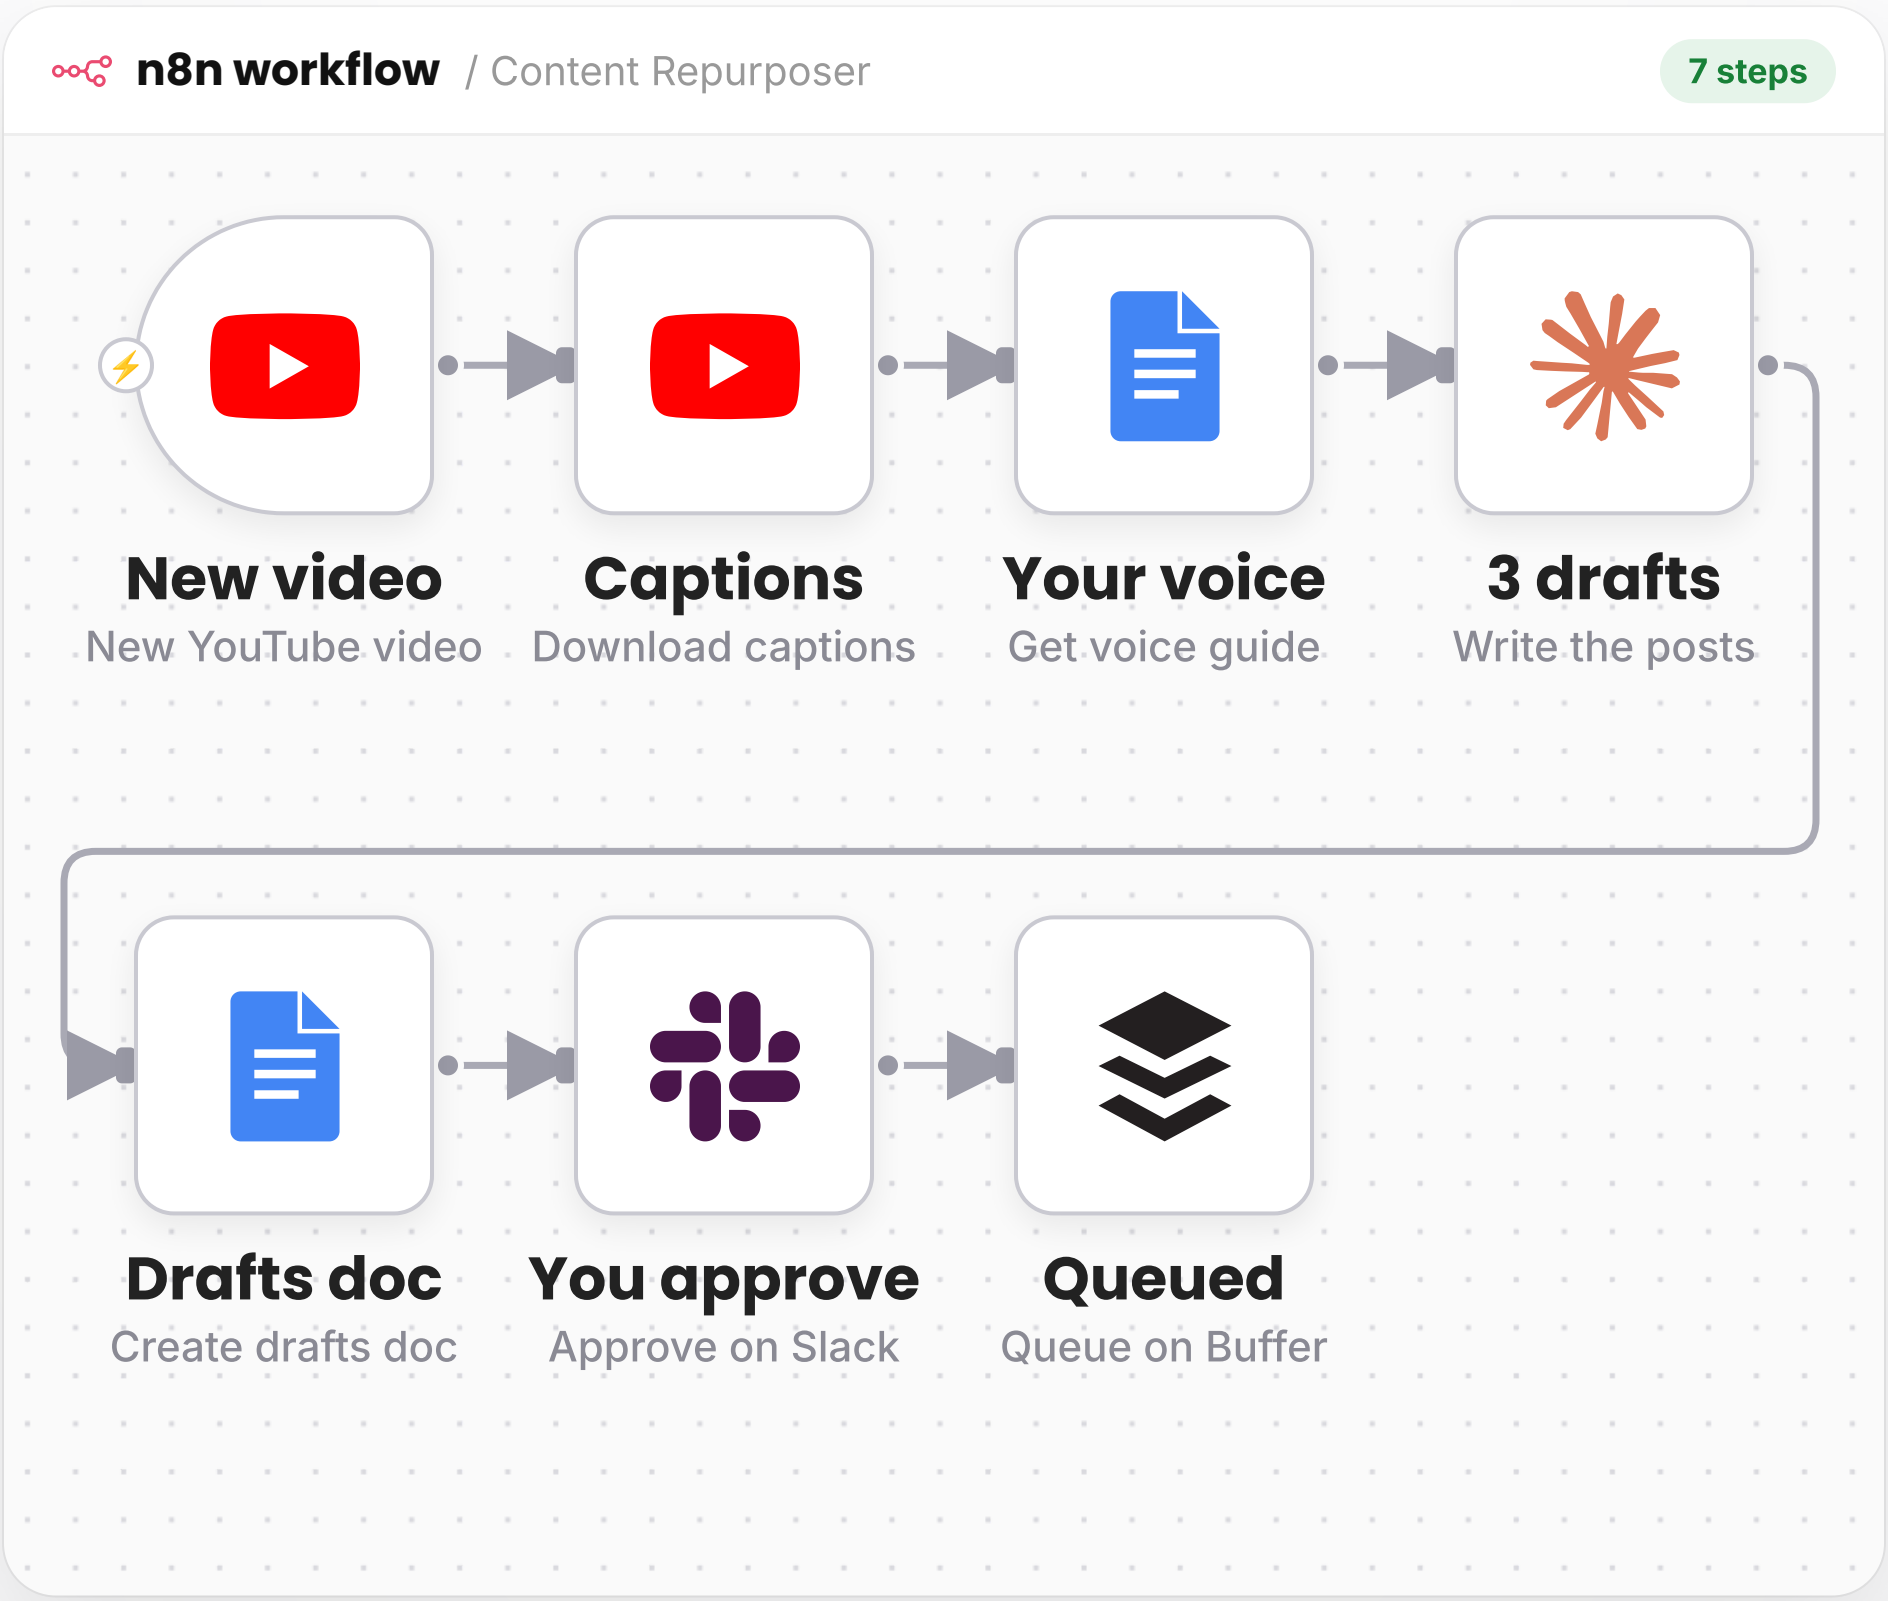

1. Record video: done
2. Edit + upload: done
3. LinkedIn post: not started
4. X post: not started
5. IG caption: not started

The Workflow

Content Repurposer

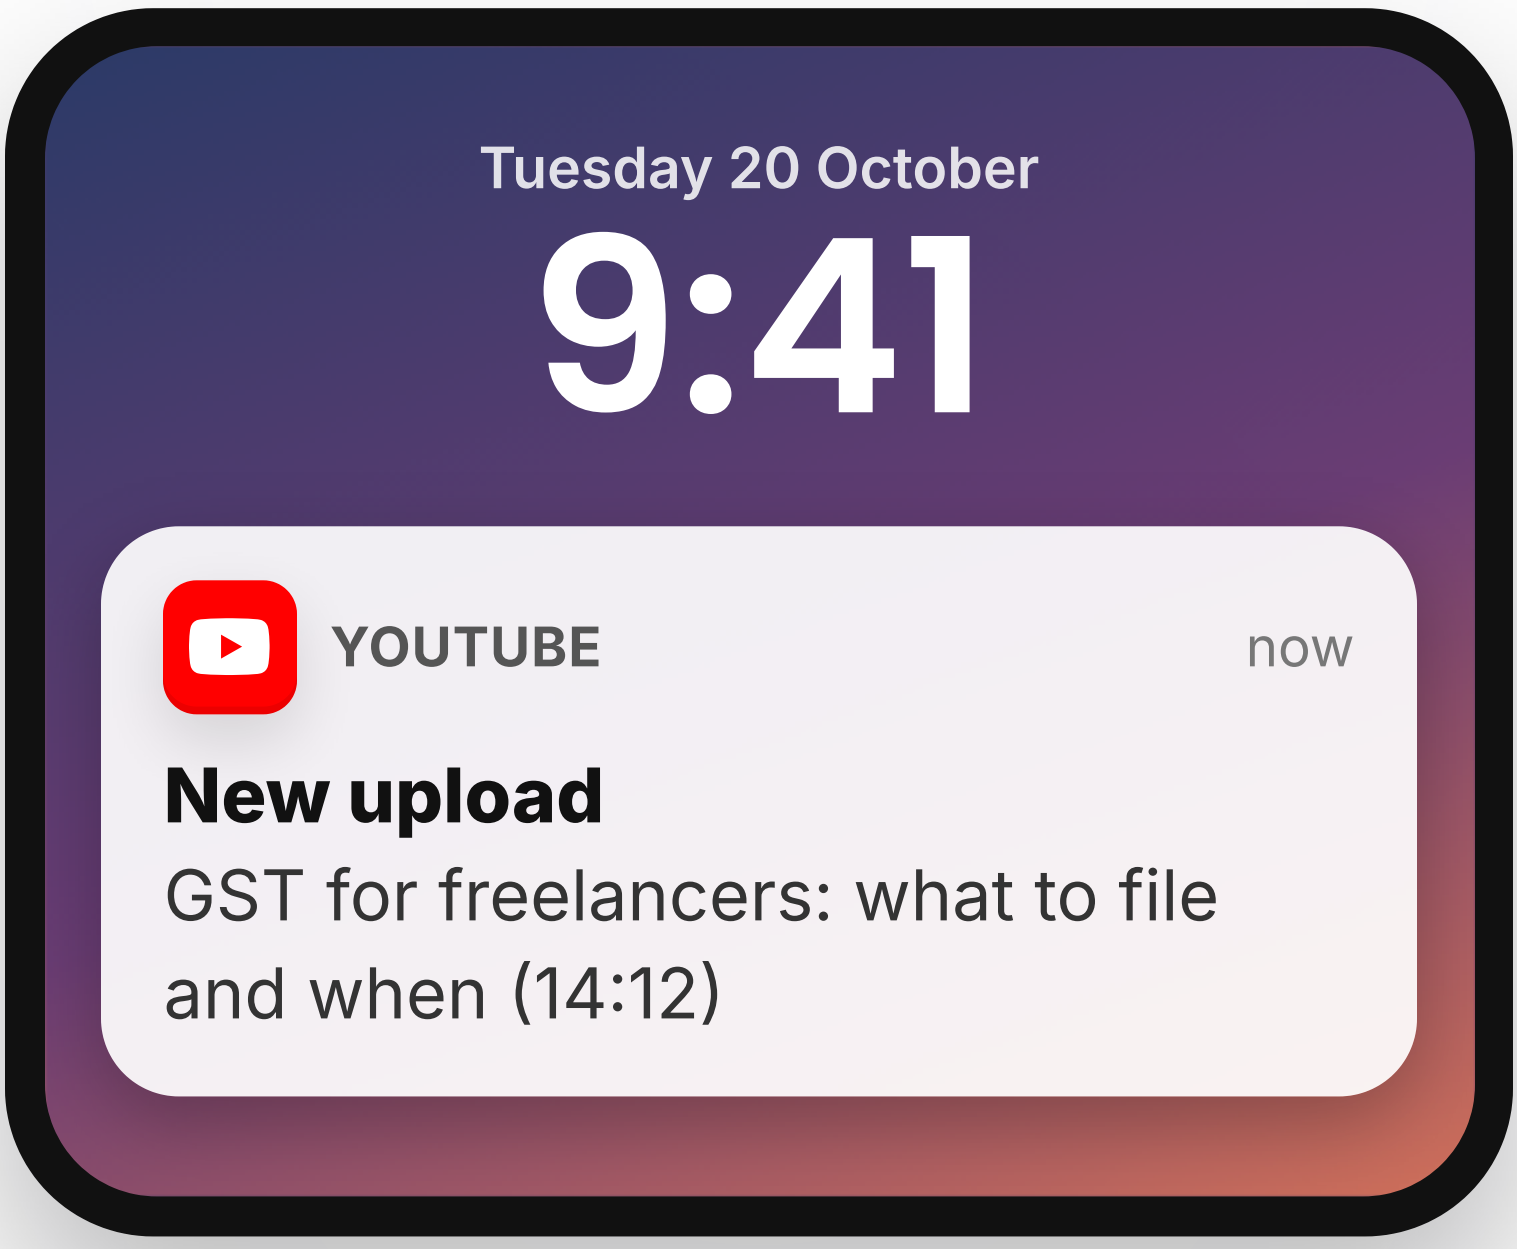

Every box below is a node in the free workflow.

Step 1

New video spotted

n8n watches your YouTube channel's feed. When a new video goes live, it checks the Content log so the same video is never repurposed twice.

you just hit Publish

N8N NODES

- New YouTube video
- Clean up video details
- Check content log
- New video?

Step 2

Transcript and your voice

n8n downloads the video's captions from YouTube, cleans them into plain text, and reads your Voice guide doc: past posts you liked and words you never use.

- Captions: English, 14 min
- Timestamps removed
- Voice guide: 6 past posts
- Never: "game-changer", emojis in LinkedIn

N8N NODES

List caption tracks

Download captions

Clean transcript

Get voice guide

Step 3

Claude drafts three posts

Claude writes a LinkedIn post, an X post and an Instagram caption from the transcript, in your voice, plus three hook options. A Code check enforces length and hashtag limits.

Claude

Repurpose this video in Kavya's voice

LinkedIn	Most freelancers think GST starts at ₹20 lakh...
X	Freelancer + foreign client = GST? 🧵
IG caption	Save this before you file...
Hooks	3 options
X length	241 / 280

N8N NODES

Write the posts

Claude

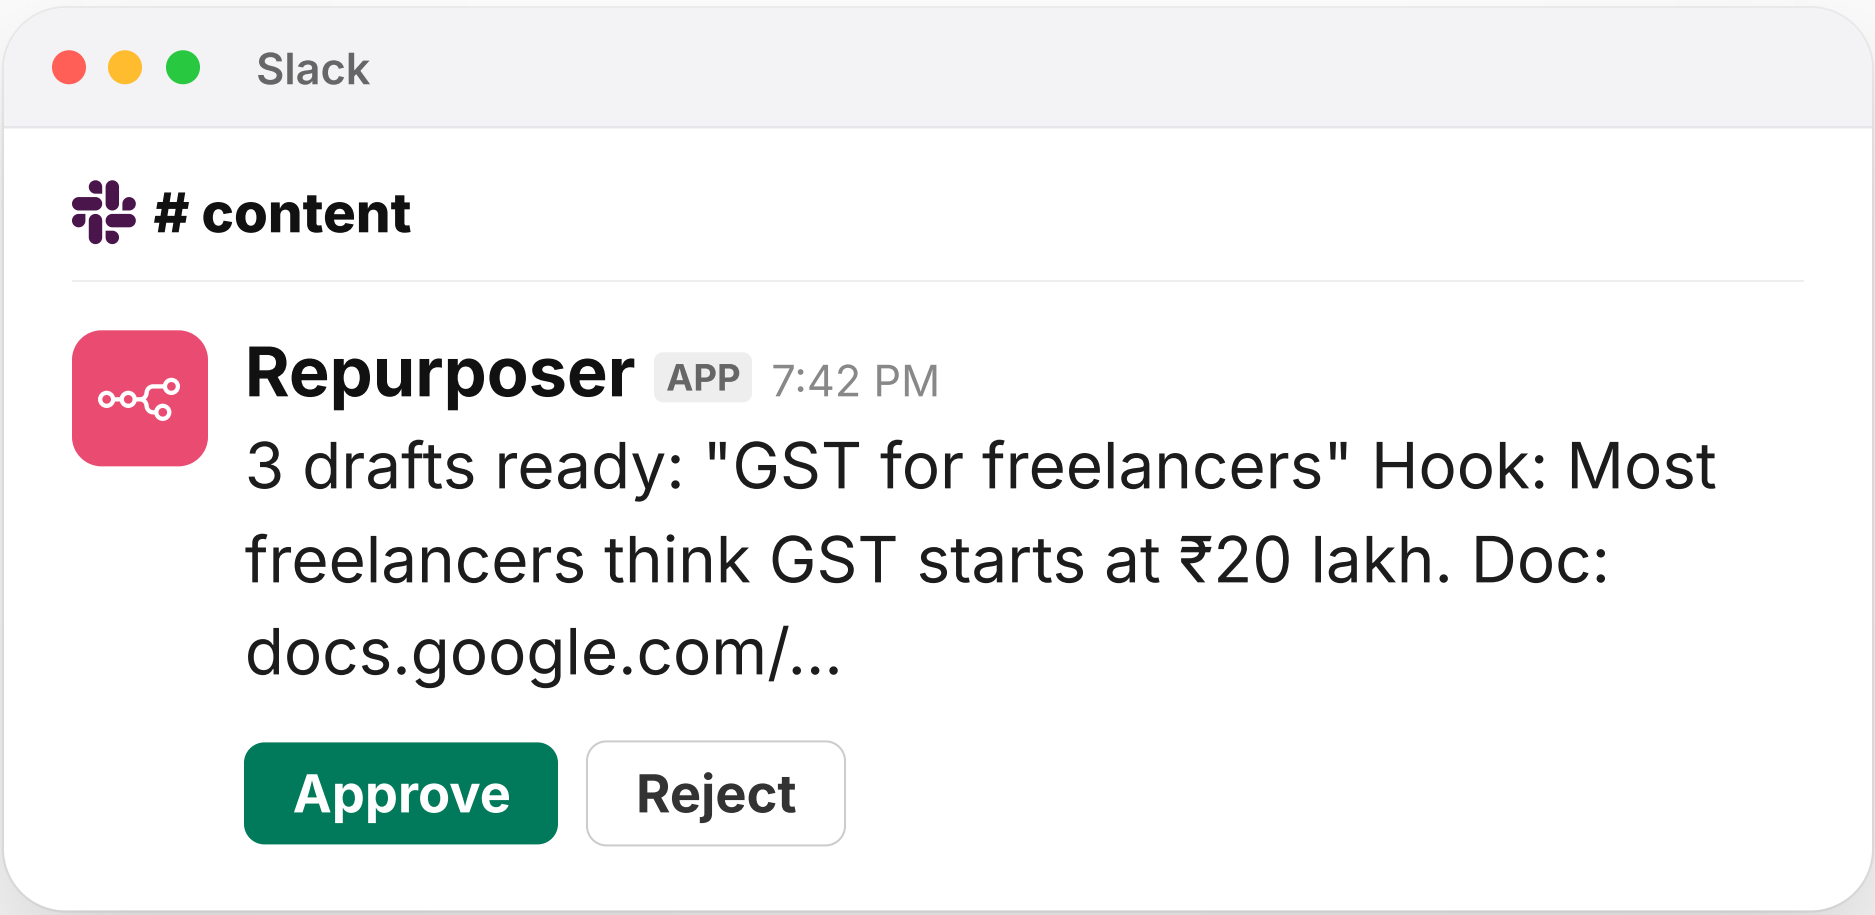

Posts format

Check post rules

Step 4

Drafts doc and one-tap approval

All drafts go into one Google Doc you can read on your phone. Slack shows the hooks and the doc link with Approve and Reject.

your eyes before anything posts

N8N NODES

Create drafts doc

Write drafts into doc

Approve on Slack

Approved?

Step 5

Queued on Buffer, logged

Approve puts the LinkedIn and X posts in your Buffer queue.
The IG caption waits in the doc for when you post the reel.
The Content log records the video, doc and status.

Google Sheets

Content log

	Video	Doc	Status	Date
1	**GST for freelancers**	**Drafts doc**	**Queued**	**17 Nov**
2	Invoice in 2 minutes	Drafts doc	Queued	10 Nov
3	Pricing your work	Drafts doc	Rejected	3 Nov

N8N NODES

- One post per channel
- Queue on Buffer
- Log content
- Problem alert

What Changes

Before and after the workflow

BEFORE

- One video, zero posts
- Blank LinkedIn box at 11 PM
- Ideas stuck inside a 14-minute video

AFTER

- 3 drafts the same evening
- Written from your transcript, in your voice
- Approve once, Buffer queues it

STAYS HUMAN

Nothing is queued until you tap Approve, and queued posts can still be edited in Buffer.
