The Problem

₹47,040 vs ₹48,000

3rd of the month at a CA office. Neha is ticking 412 statement lines against invoices with a highlighter. "NEFT CR-SHARMA TRAD" for ₹47,040 matches nothing, because the client deducted 2% TDS.

Google Sheets

Statement vs Invoices

	Bank line	Credit	Invoice?	Note
1	**NEFT CR-SHARMA TRAD**	**47,040**	**?**	**no match**
2	IMPS-MEHTA FOODS	1,18,000	INV-2305	ok
3	UPI/ravi.k/advance	5,000	?	who?
4	NEFT-ANAND & CO	20,000	?	partial?

The Workflow

Bank Reconciliation Helper

Every box below is a node in the free workflow.

Step 1

Drop the statement in Drive

Download the bank statement as CSV and drop it in a Drive folder. n8n reads every line, cleans dates and amounts, skips lines it has seen before and keeps only the credits.

Google Sheets

Statement_Nov.csv

	Date	Narration	Credit	Ref
1	**03/11**	**NEFT CR-SHARMA TRAD-INV2291**	**47,040.00**	**N307…**
2	03/11	UPI/ravi.k@okhdfc/advance	5,000.00	330…
3	04/11	IMPS-MEHTA FOODS PVT	1,18,000.00	4091…
4	04/11	ACH D- LIC PREMIUM		…

no more highlighter

N8N NODES

New statement in Drive · Download statement · Read CSV rows · Clean bank lines · Skip lines already seen · Credits only

Step 2

Code matches the exact ones

A Code node matches a credit to an unpaid invoice when the amount is the same and the invoice number or customer name is in the narration. Every line is logged.

- ₹1,18,000 · MEHTA FOODS → INV-2305: exact
- ₹22,420 · INV2298 in narration: exact
- ₹47,040 · SHARMA TRAD: no exact amount
- ₹5,000 · UPI advance: no invoice

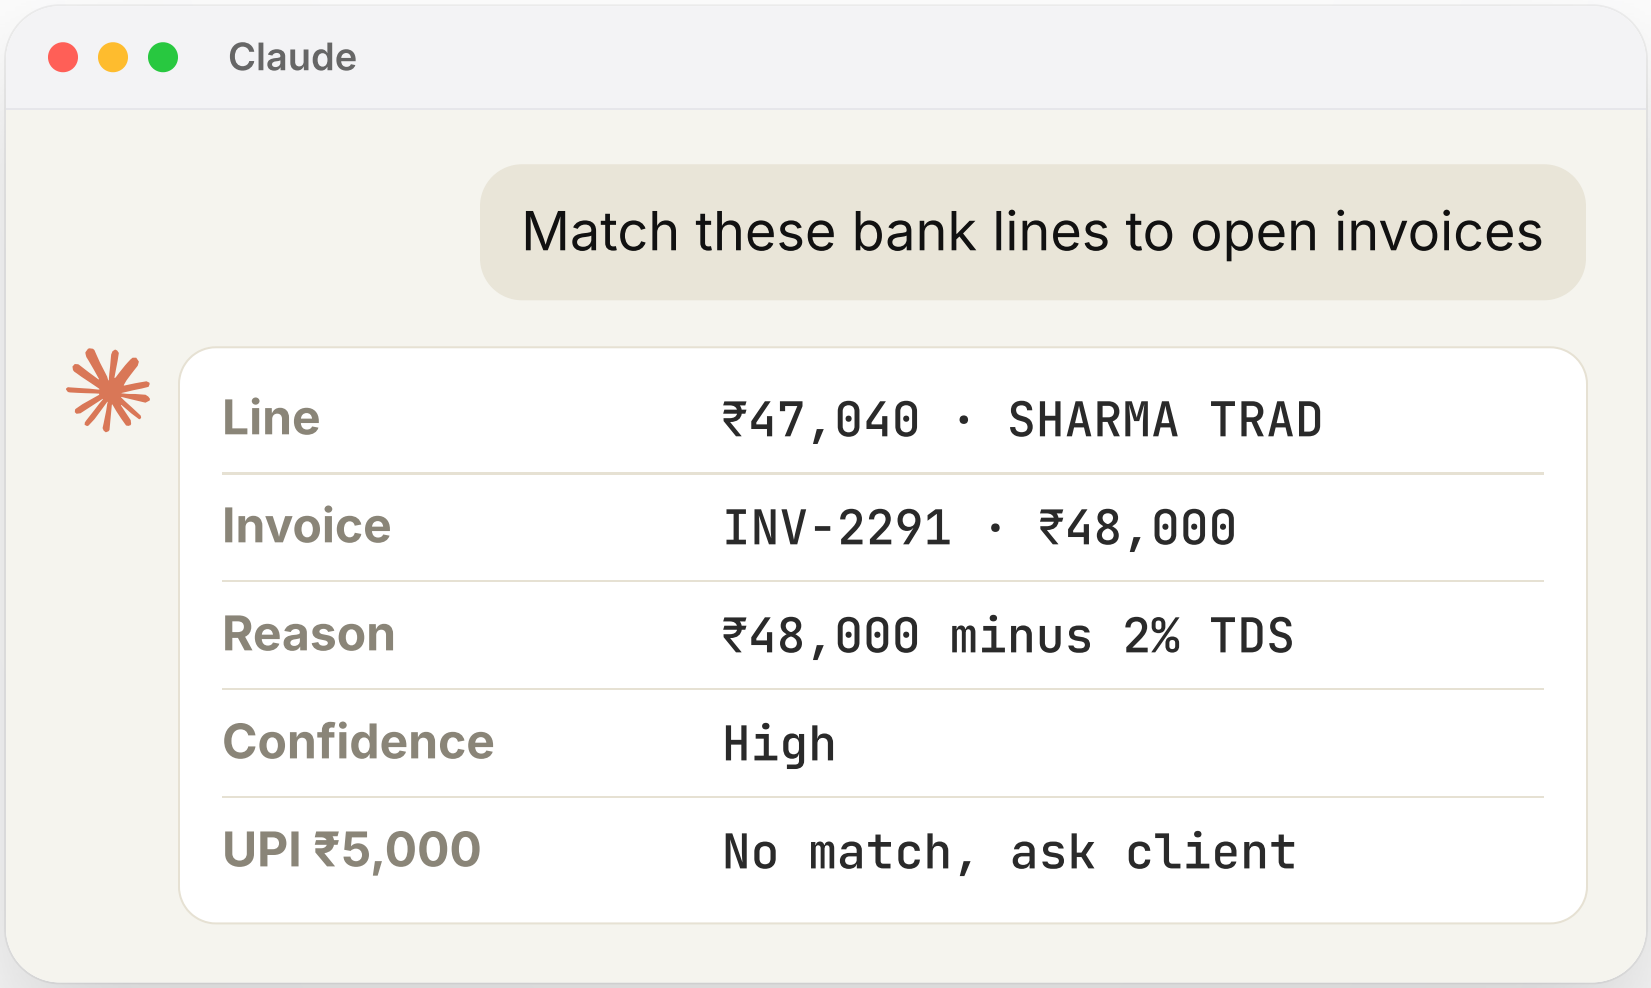

N8N NODES

Get open invoices | Match exact amounts | Log every line | Exact match?

Step 3

Claude suggests the messy ones

Lines with no exact match go to Claude 25 at a time with your open invoices. It suggests a match with a reason, like an invoice minus 2% TDS or two invoices paid together.

TDS cuts break every Excel formula

N8N NODES

- Loop 25 lines at a time
- Pack lines for Claude
- Suggest matches with Claude
- Claude
- Suggestions format
- One row per suggestion
- Log suggestions

Step 4

Only exceptions reach you

You get one email: how many lines matched, the suggestions to check, and the credits with no invoice. Approve marks the matched invoices paid. Reject changes nothing.

N8N NODES

- Both lists in
- Build exception report
- Approve marking paid
- Approved?

Step 5

Invoices marked paid after your OK

On Approve, every exact and high-confidence match is marked Paid in the Invoices sheet with the bank date and reference. If the sheet update fails, you get an email.

Google Sheets

Invoices

	Invoice	Customer	Amount	Status
1	**INV-2291**	**Sharma Traders**	**₹48,000**	**Paid 3 Nov (TDS)**
2	INV-2305	Mehta Foods	₹1,18,000	Paid 4 Nov
3	INV-2310	Anand & Co	₹35,400	Unpaid (part)

N8N NODES · Paid list · Mark invoices paid · Update failed alert

What Changes

Before and after the workflow

BEFORE

- 412 lines ticked with a highlighter
- TDS and part payments break matching
- Unpaid invoices found late

AFTER

- Exact matches done by code
- Messy lines come with a reason
- You review only the exceptions

STAYS HUMAN

Claude only suggests. No invoice is marked paid until you tap Approve.
