(n8n + Claude)

The Problem

The third "kab aayega?" today

11:20 AM at a small D2C brand. The founder is copying AWB numbers into the tracking page and replying one by one. The parcel was already out for delivery.

the complaint waits behind 3 WISMOs

The Workflow

Where Is My Order Agent

Every box below is a node in the free workflow.

Step 1

Shiprocket tells n8n first

Every time a shipment changes status, Shiprocket calls an n8n webhook. n8n checks the secret token, cleans up the event, skips statuses it already handled and finds the order in your sheet.

Output · JSON

```
{
  "awb": "1912XXXXXX",
  "order_id": "KB-1043",
  "current_status": "OUT FOR DELIVERY",
  "courier_name": "Delhivery",
  "etd": "2026-11-19"
}
```
