The Problem

The complaint sat there all weekend

Saturday, 9:40 PM. A family of six waits 35 minutes for biryani and types "Never again" into your feedback form. It lands in a sheet nobody opens until Monday.

The Workflow

AI Customer Feedback Radar

Every box below is a node in the free workflow.

Step 1

Catch every form reply

Your Google Form already drops answers into a sheet. n8n picks up each new row, cleans the phone number, skips blank forms and never reads the same reply twice.

Step 2

Claude reads the mood

Claude reads the rating and the comment together, so a 5 star with an angry comment still counts as unhappy. It returns mood, topics, urgency and a one-line summary. Every reply is logged.
