The Problem

Copy, paste, wrong client

Thursday, 7:40 PM. The discovery call went well at 11 AM and the client wants a proposal tomorrow. You copy last month's proposal and change the name. Except on page 3.

Gmail

Re: Proposal for Patel Foods

RP

Riya (Patel Foods)
to You

Thanks for sending this. Quick question: page 3 says "Prepared for Sharma Traders". Is this the right document?

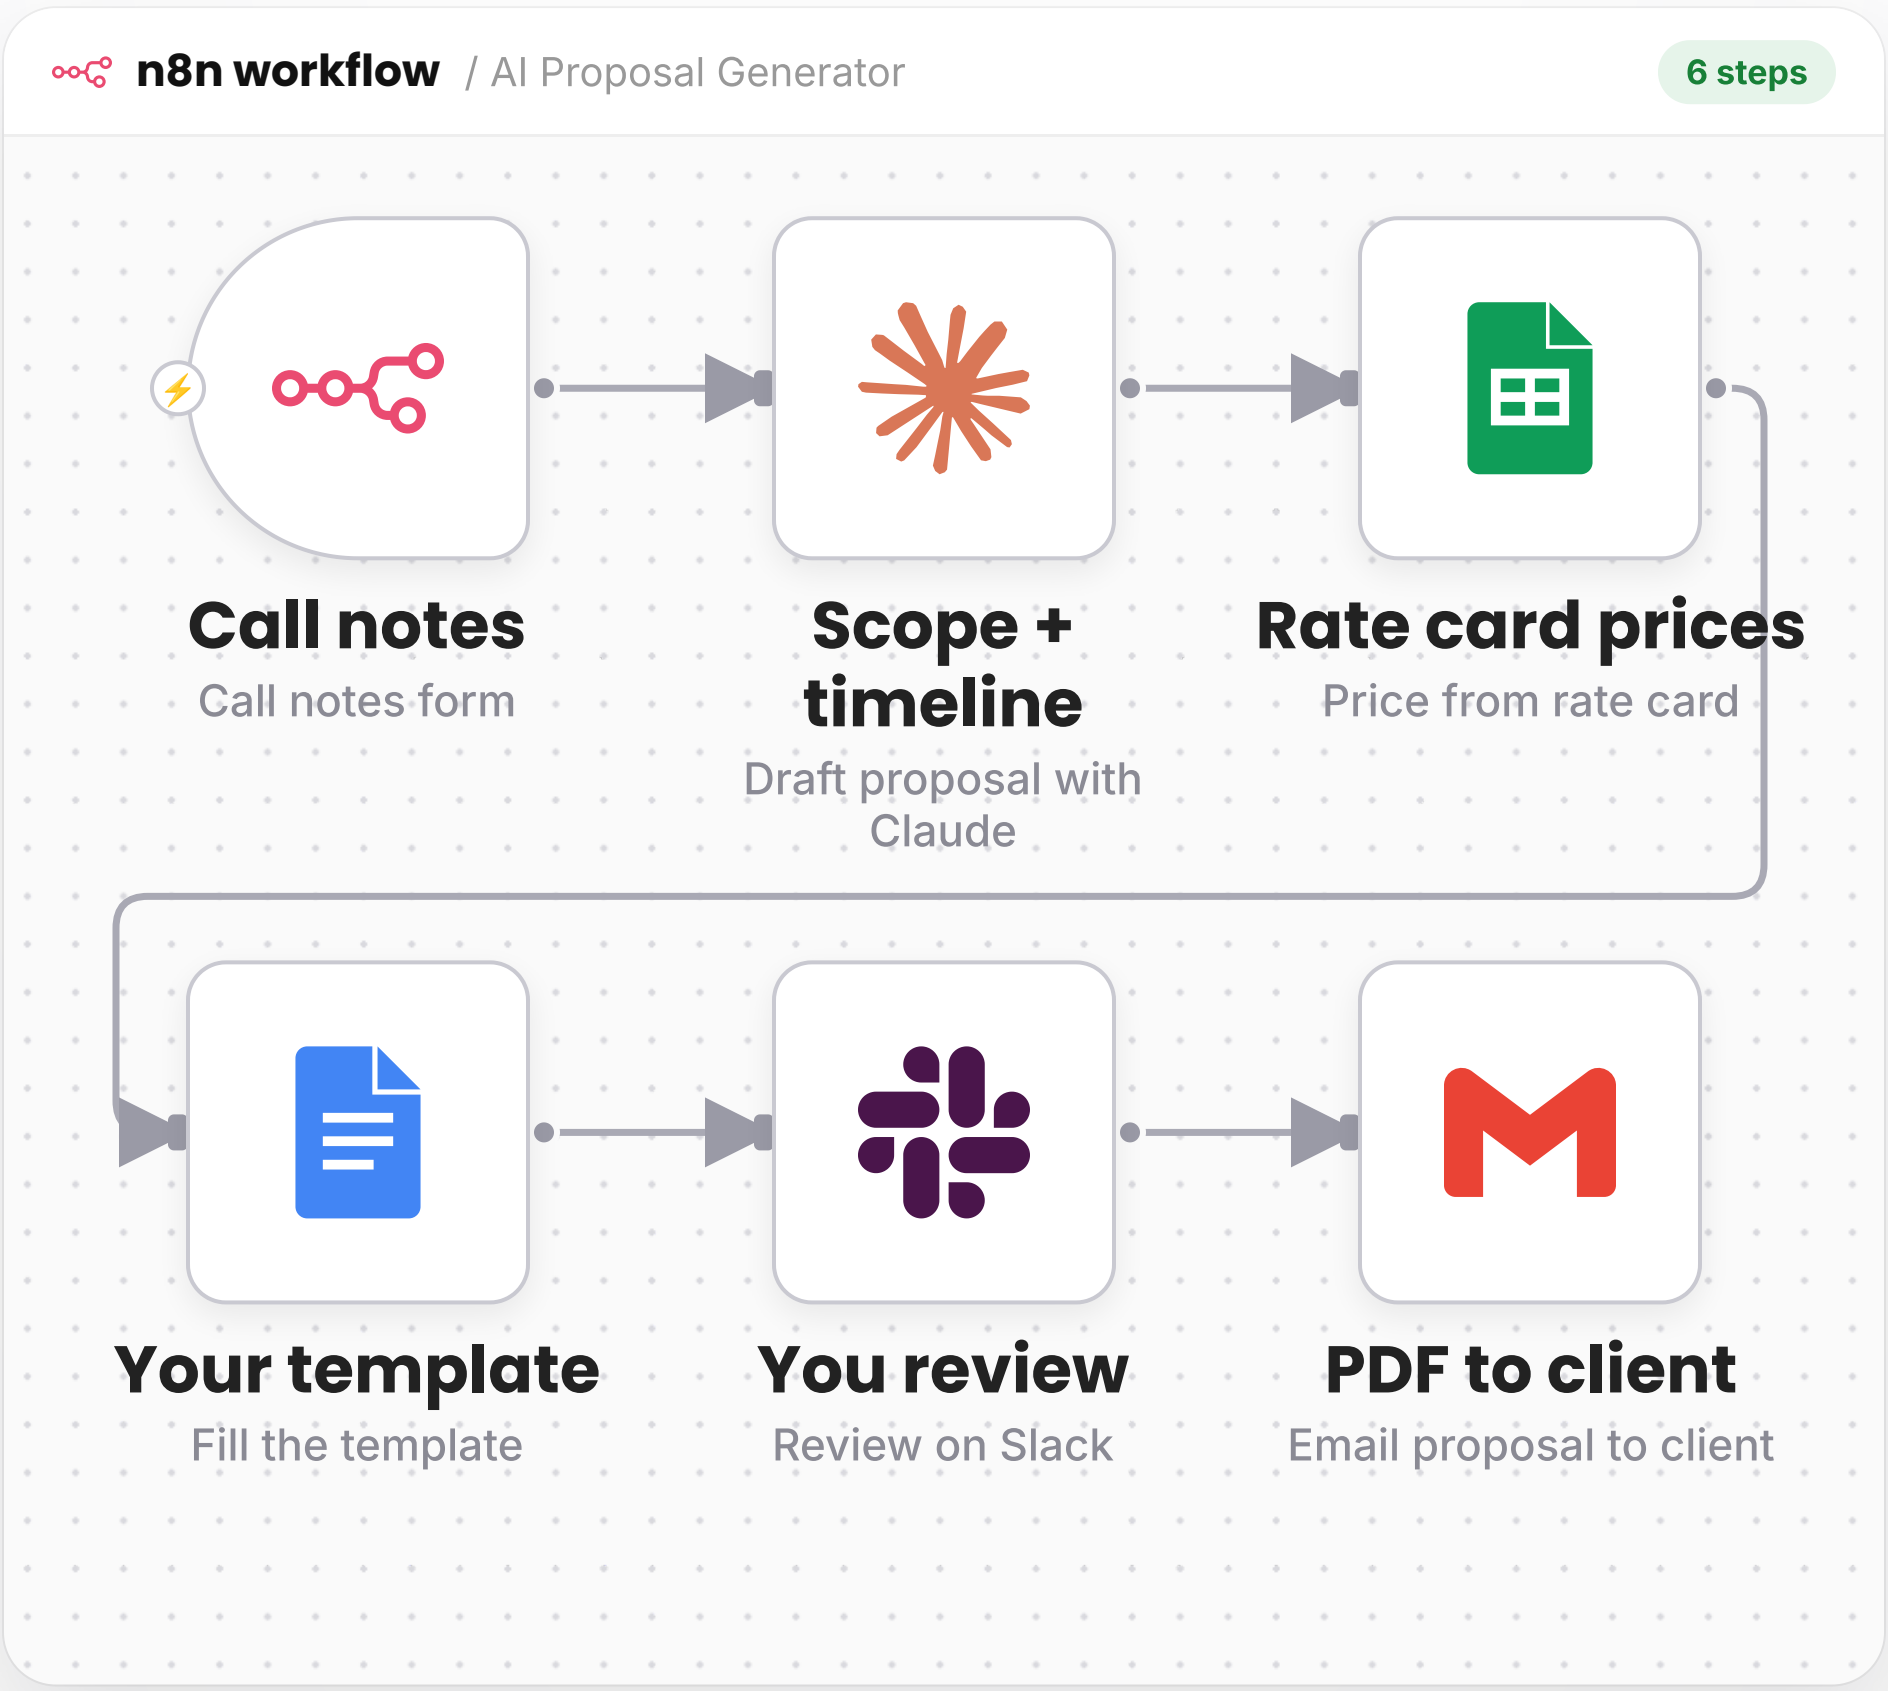

we have all done this

The Workflow

AI Proposal Generator

Every box below is a node in the free workflow.

Step 1

Notes in, right after the call

Paste your rough call notes into a short form: client, contact email, what they need, budget hints, deadline. Messy notes are fine. A guard stops the same proposal being made twice.

New proposal from call notes

Client

Riya Patel, Patel Foods

Email

riya@example.com

Notes

new site, 12 pages, Gujarati + English, Insta 3 ...

Budget

around 2.5 L

Deadline

live before Diwali sale

Submit

voice-to-text notes work too

N8N NODES

Call notes form

Clean up notes

Already drafted today?

Step 2

Claude drafts the scope

Claude reads your notes and your rate card and writes the scope, timeline, assumptions and what is out of scope. It can only pick services that exist in your rate card.

Claude

Draft a proposal from these notes

Need	Bilingual site + social
Scope	Website 12 pages, Social 3 months
Timeline	6 weeks, 3 phases
Out of scope	Paid ads budget
Ask client	Who writes Gujarati copy?

N8N NODES

Get rate card

Bundle rate card

Draft proposal with Claude

Claude

Proposal fields

Step 3

Prices come from your rate card

A code step prices every line from your rate card sheet, adds 18% GST and the total. Claude never sets a price. Your Google Docs template is copied and filled, and the proposal is logged.

Google Sheets

Rate card

	Service	Unit	Rate	Qty
1	**Website page**	**page**	**₹12,000**	**12**
2	Social media mgmt	month	₹26,000	3
3	Gujarati translation	page	₹1,500	12
4	GST 18%			₹43,200

AI writes, sheet prices

N8N NODES

Price from rate card

Copy proposal template

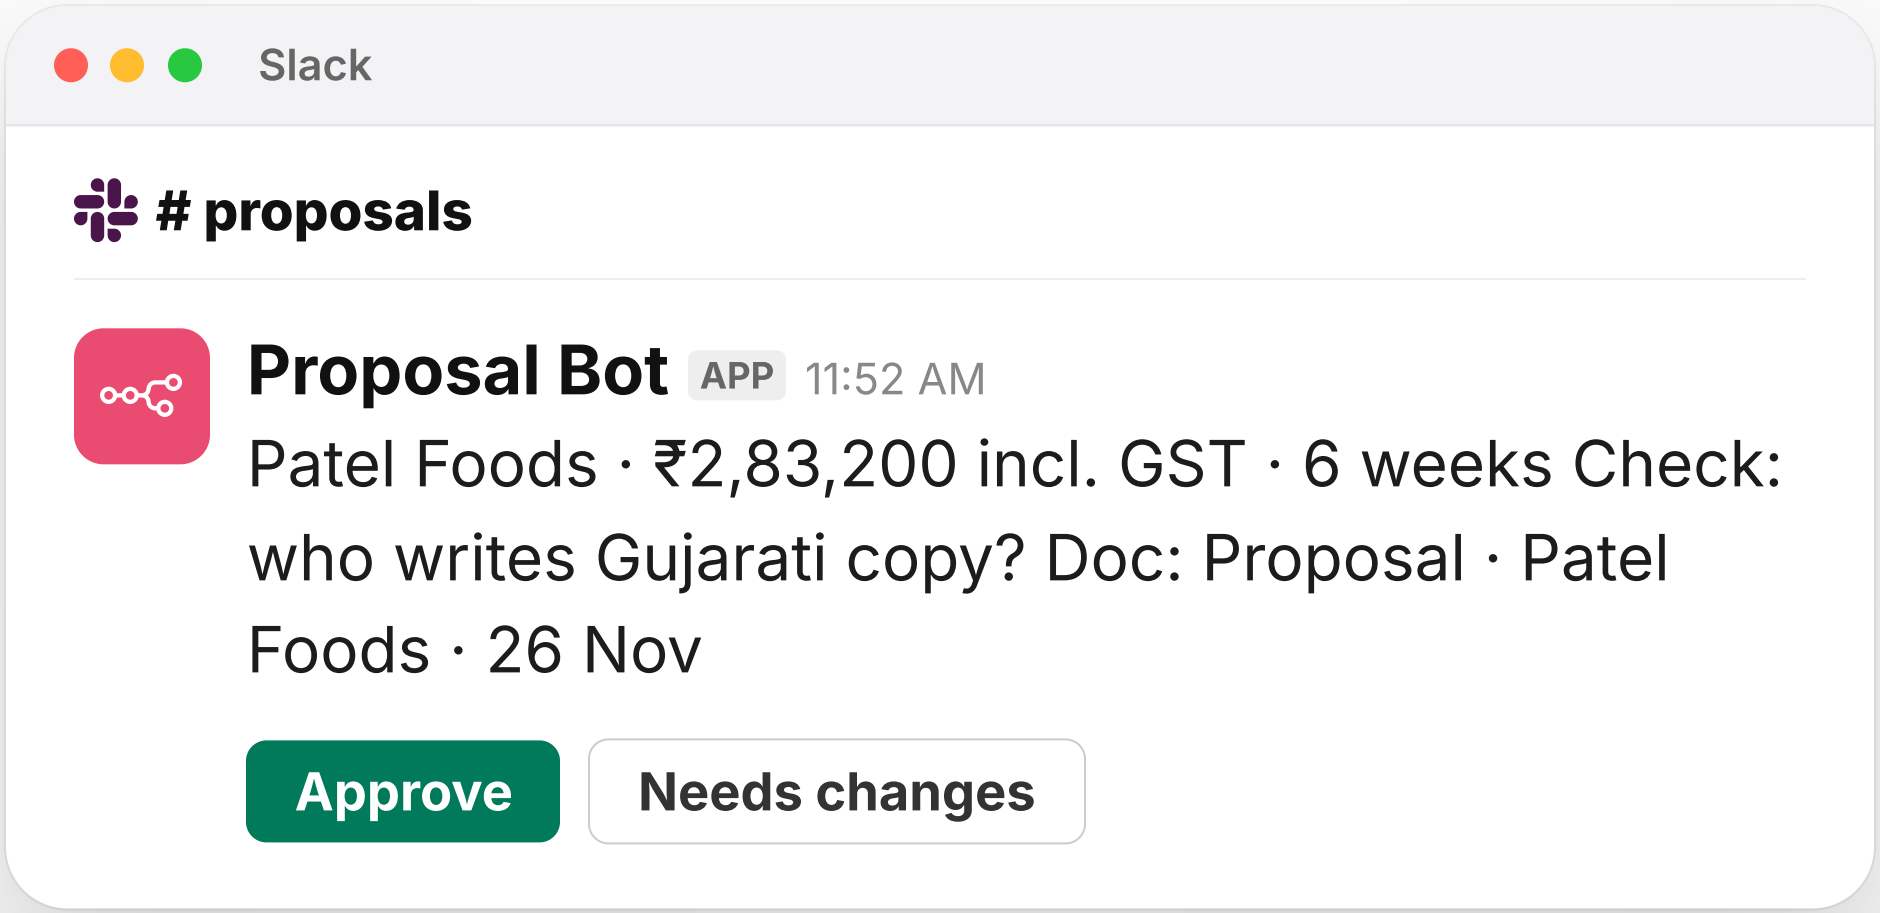

Fill the template

Log proposal

Step 4

You review it on Slack

You get the Google Doc link, the total and anything Claude was unsure about. Edit the doc if you like, then tap Approve. Needs changes keeps it as a draft.

N8N NODES

Review on Slack

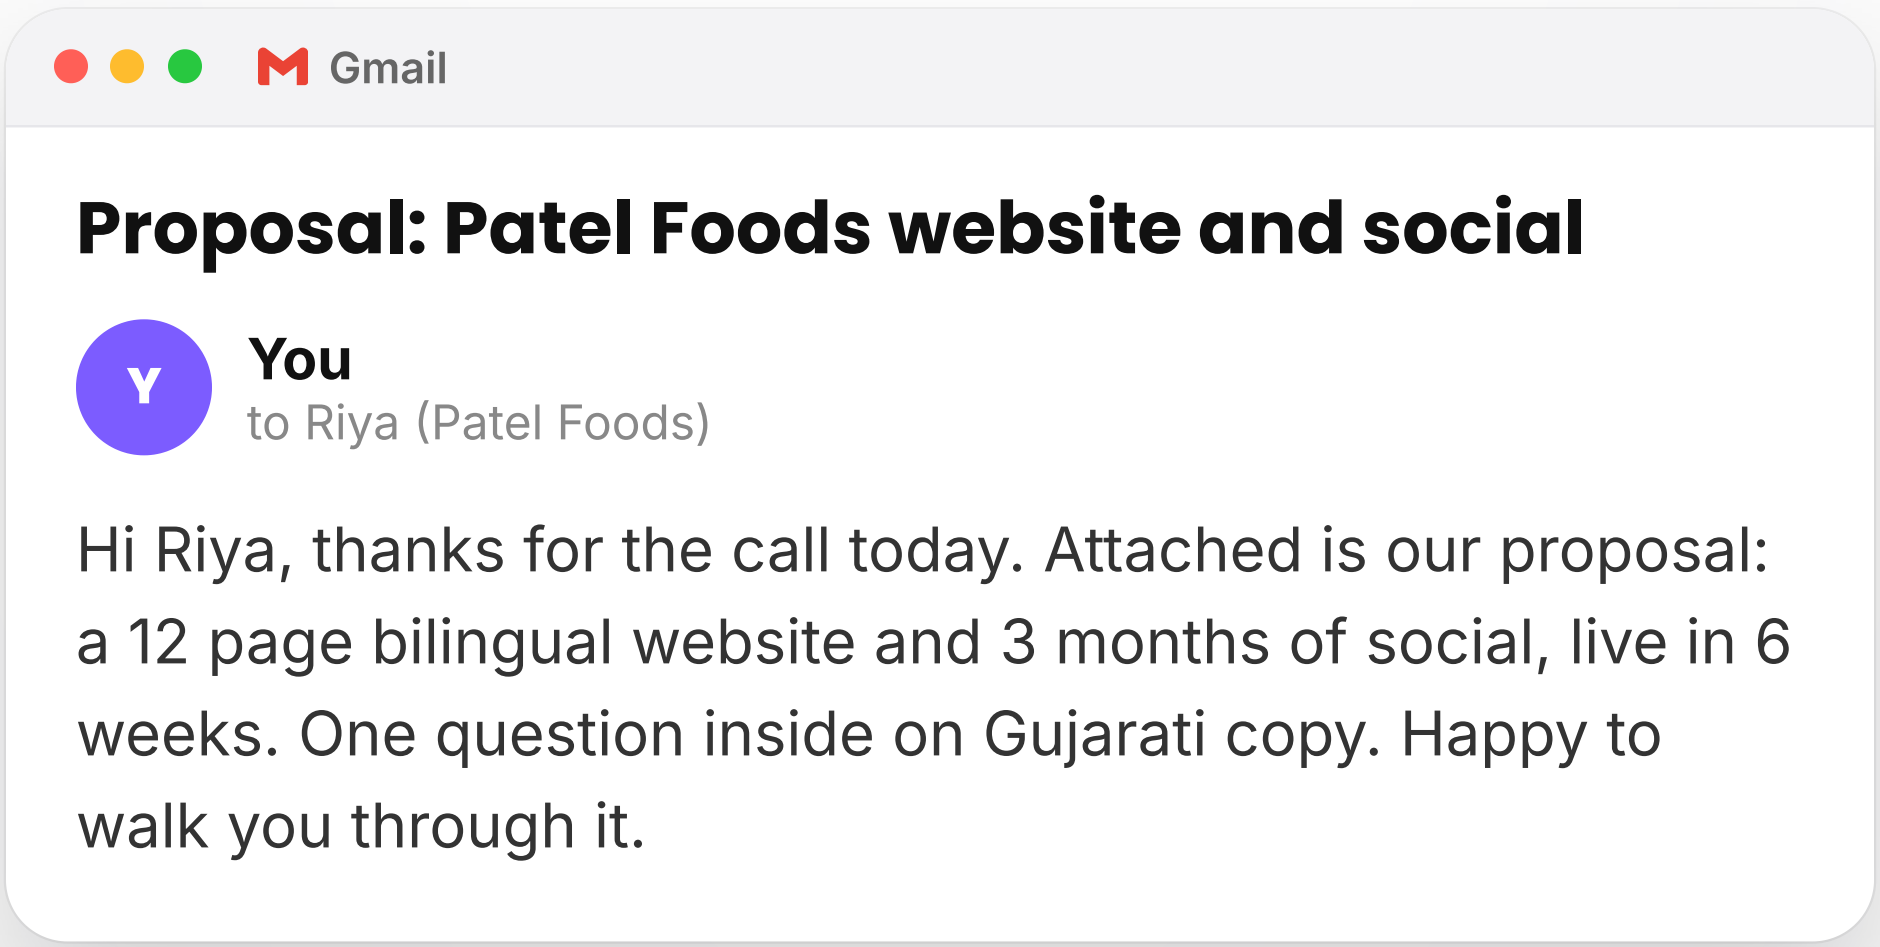

Approved?

Mark as needs changes

Step 5

PDF to the client

Approved proposals are exported as PDF and emailed to the client with a short cover note. If the email fails you get an alert, and the sheet shows Sent.

N8N NODES

- Export as PDF
- Email proposal to client
- Mark as sent
- Alert: email failed

What Changes

Before and after the workflow

BEFORE

- Proposal written at night
- Old proposal copied and edited
- Prices typed from memory

AFTER

- Draft in your template in minutes
- Every price from your rate card
- Sent only after your review

STAYS HUMAN

Nothing reaches the client until you tap Approve. Prices come only from your rate card, never from AI.
