Turn Photos + PDFs Into

Clean Data

no more typing orders by hand

Google Sheets

Orders

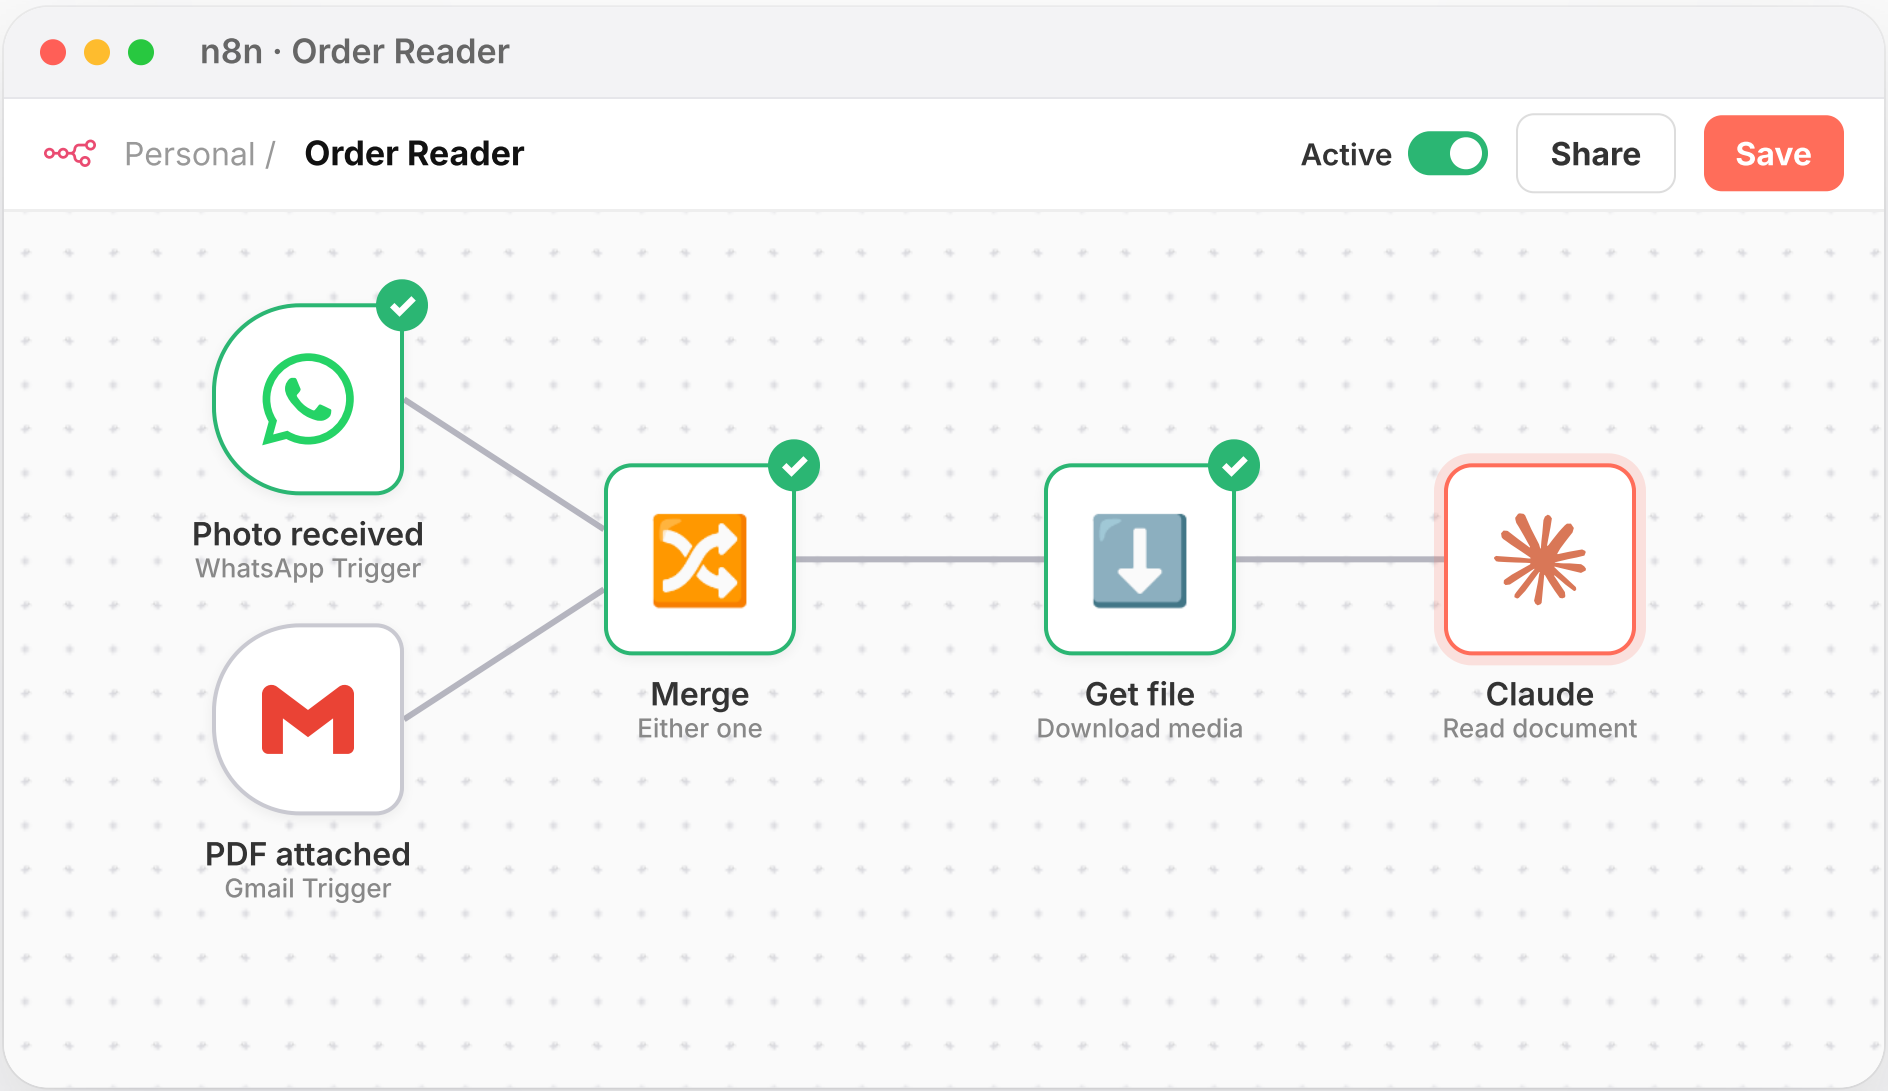

Item	Qty
Basmati rice 5 kg	10
Toor dal 1 kg	24
Sugar 1 kg	30

Swipe →

Step 1

Catch the File

A **WhatsApp photo** or a **Gmail PDF**. Both start the same workflow.

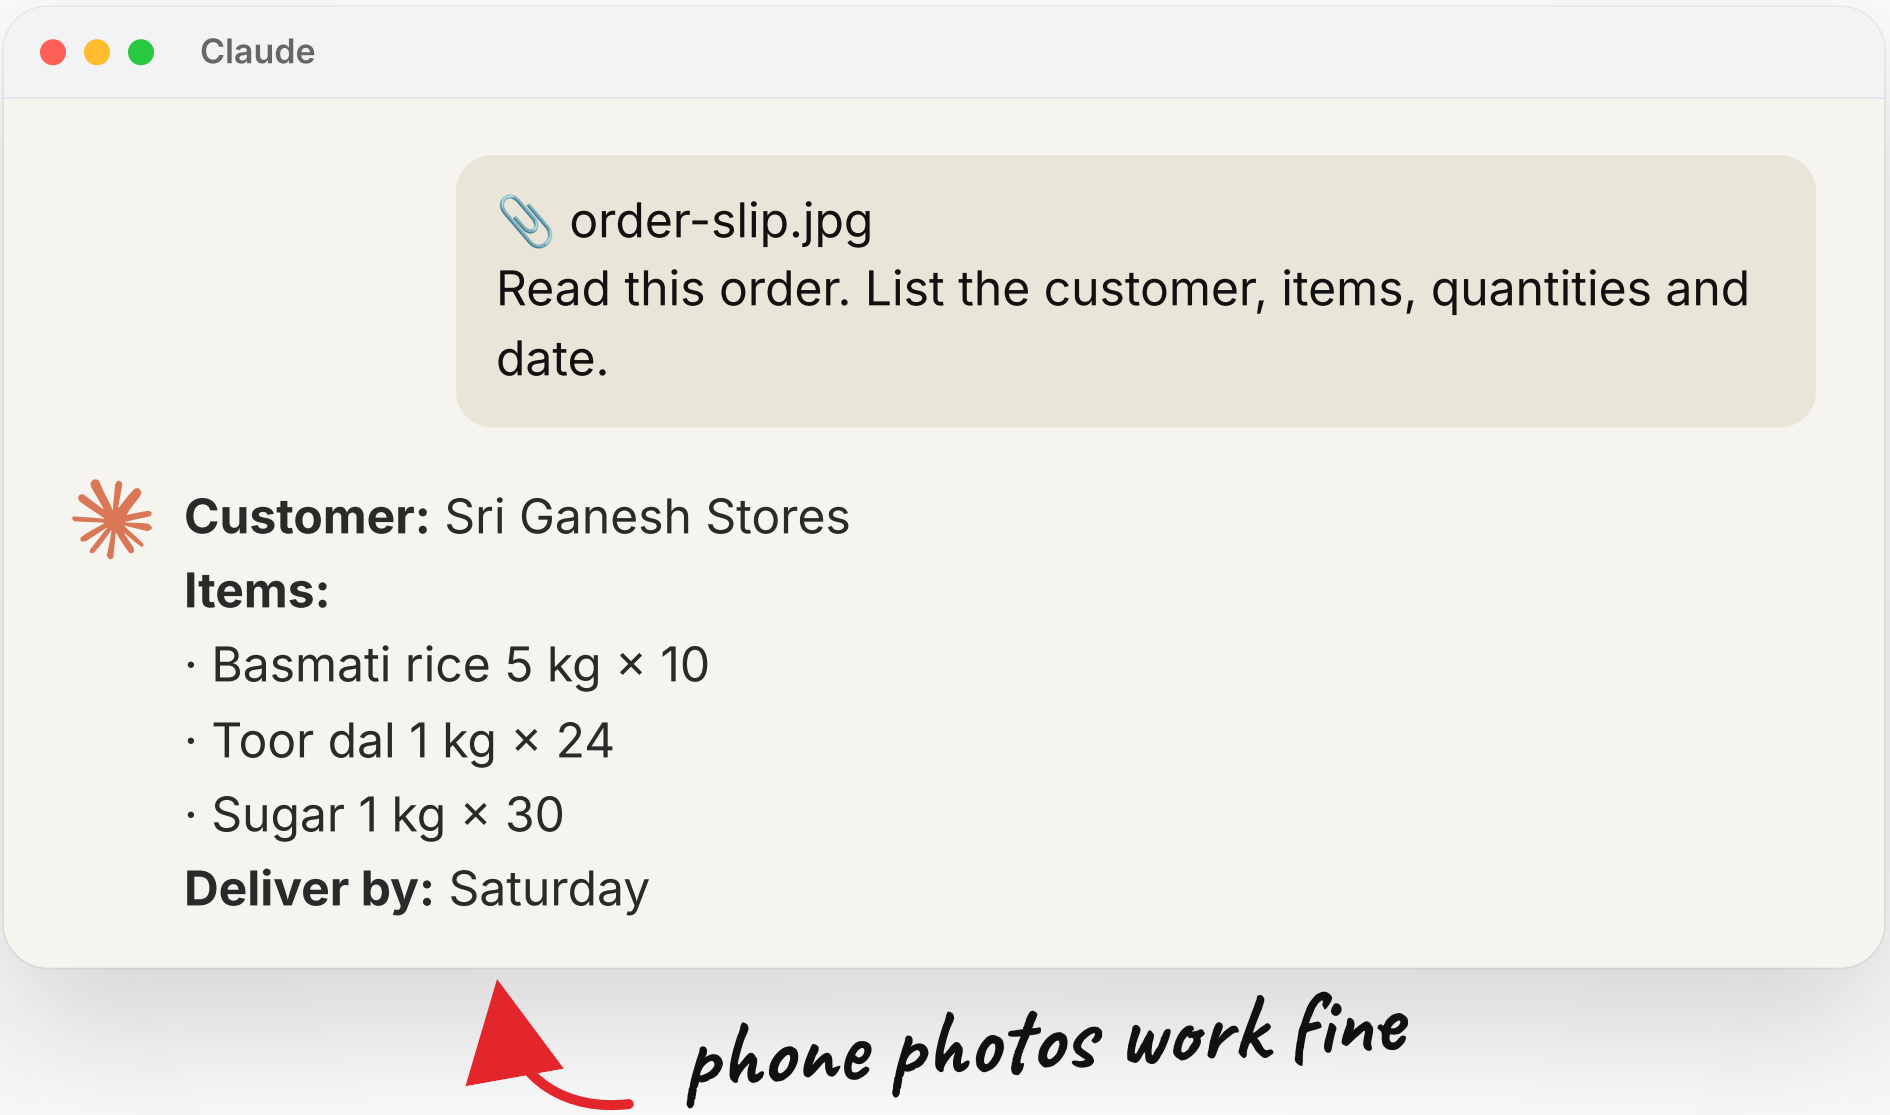

customers keep sending orders their way

Step 2

Send It to Claude

Pass the image or PDF to the **Anthropic** node. Claude reads the whole thing.

phone photos work fine

Step 3

Ask for Exact Fields

Name the fields. Say what to do when something is **unclear**.

System Message

Claude › Prompt

Expression

```
Read this order. Return JSON only:
customer, items[ name, qty, unit ], deliver_by

Can not read a word? Write "unclear".
Missing? Use null. Never guess.

// output
{ "customer": "Sri Ganesh Stores",
  "items": [{ "name": "Toor dal", "qty": 24 }, …],
  "deliver_by": "Saturday" }
```

"unclear" beats a guess

Step 4

Check Before Saving

AI reads well. Simple rule checks **catch the rare miss**.

Code node · checks 1 needs review

- ✓ Customer exists in the Customers tab
- ✓ Every quantity is a number
- ✓ Items match the product list
- ! 1 word marked **"unclear"** → ask a human

Pass → saved automatically · **Fail** → sent to you in Slack

AI + boring checks

Step 5

Save + Confirm

One row per item in Sheets, and a **confirmation** back to the customer.

Google Sheets

Orders

Item	Qty	By
Basmati rice 5 kg	10	Sat
Toor dal 1 kg	24	Sat
Sugar 1 kg	30	Sat

Original photo filed in **Drive › Orders › Nov**

Sri Ganesh Stores
customer

Got your order ✅
Basmati 5 kg × 10
Toor dal 1 kg × 24
Sugar 1 kg × 30
Delivery: **Saturday**
10:05

Perfect 🙏
10:06 ✓✓

the customer sees it was understood
