Use AI Without Leaking

Customer Data

same answer, less risk

What gets pasted

Name: `Priya Shah`

Phone: `+91 98201 45678`

PAN: `ABCPS1234F`

Card: `4111 2222 3333 4444`

Ask: `Where is my order?`

What the AI needs

ID: `CUS-0001`

Phone: `XXXXXX5678`

PAN: `removed`

Card: `removed`

Ask: `Where is my order?`

Swipe →

Step 1

Map What You Send

List every field in the workflow. Ask: does the AI **really** need this?

Google Sheets

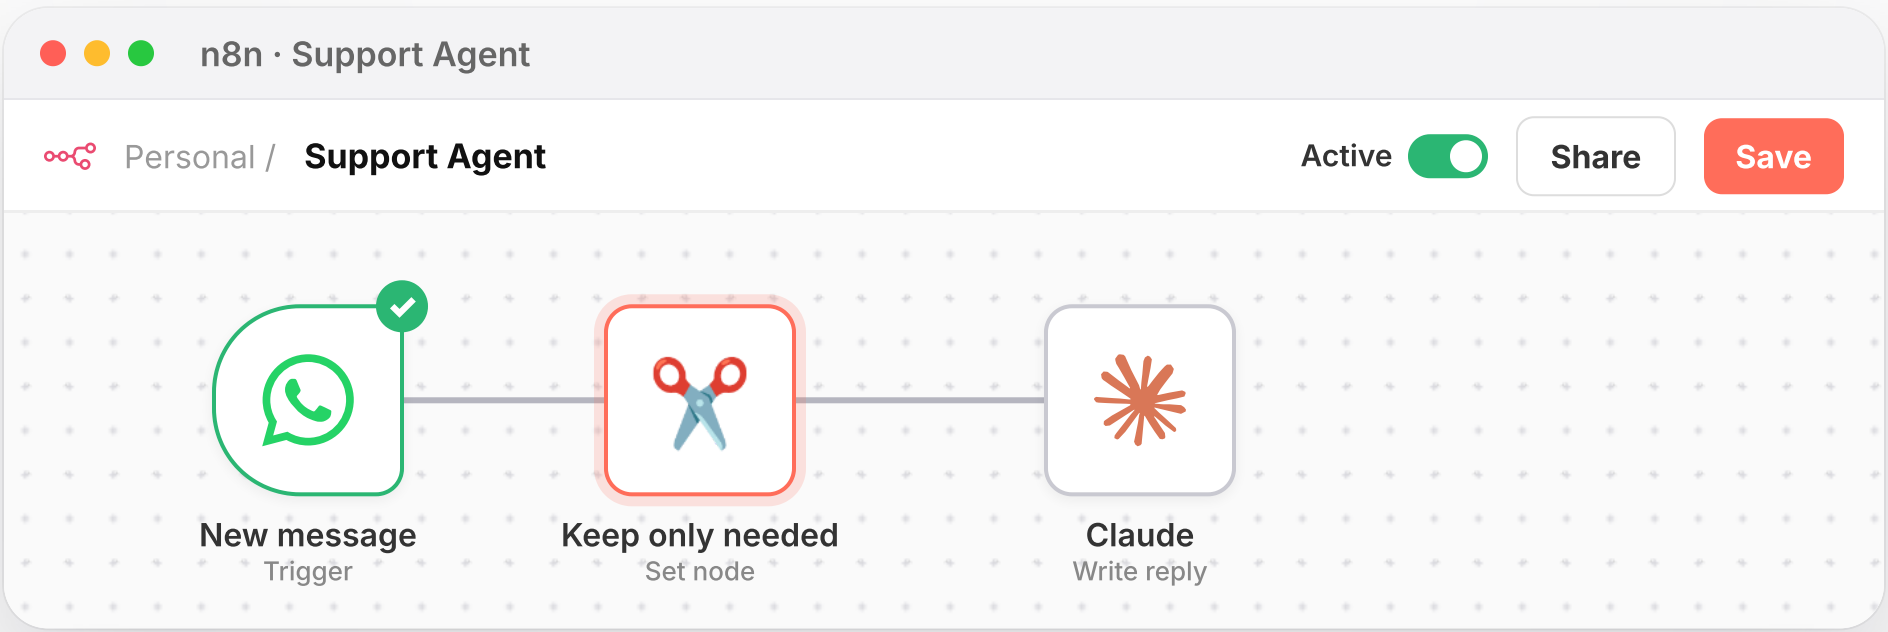

Data map

Field	Does the AI need it?
Message text	✅ Yes
Order ID	✅ Yes
Full name	❌ No (first name later)
Phone number	❌ No
PAN / Aadhaar	❌ Never
Card / bank details	❌ Never

Step 2

Strip It With a Set Node

Set · Keep Only Set Fields: ON

- ✔ `message`
- ✔ `order_id`
- ✔ `first_name`
- ✖ ~~`phone`~~
- ✖ ~~`pan`~~
- ✖ ~~`card_last4`~~
- ✖ ~~`address`~~

the AI never sees the rest

Step 3

Mask What's Left

If a number must go in, send only the **last 4 digits**.

Code

Code node › JavaScript

Expression

```
const mask = (s, keep = 4) ⇒
  s.slice(0, -keep).replace(/\d/g, 'X') + s.slice(-keep);

return {
  phone: mask($json.phone),
  account: mask($json.account_no),
  message: $json.message
};

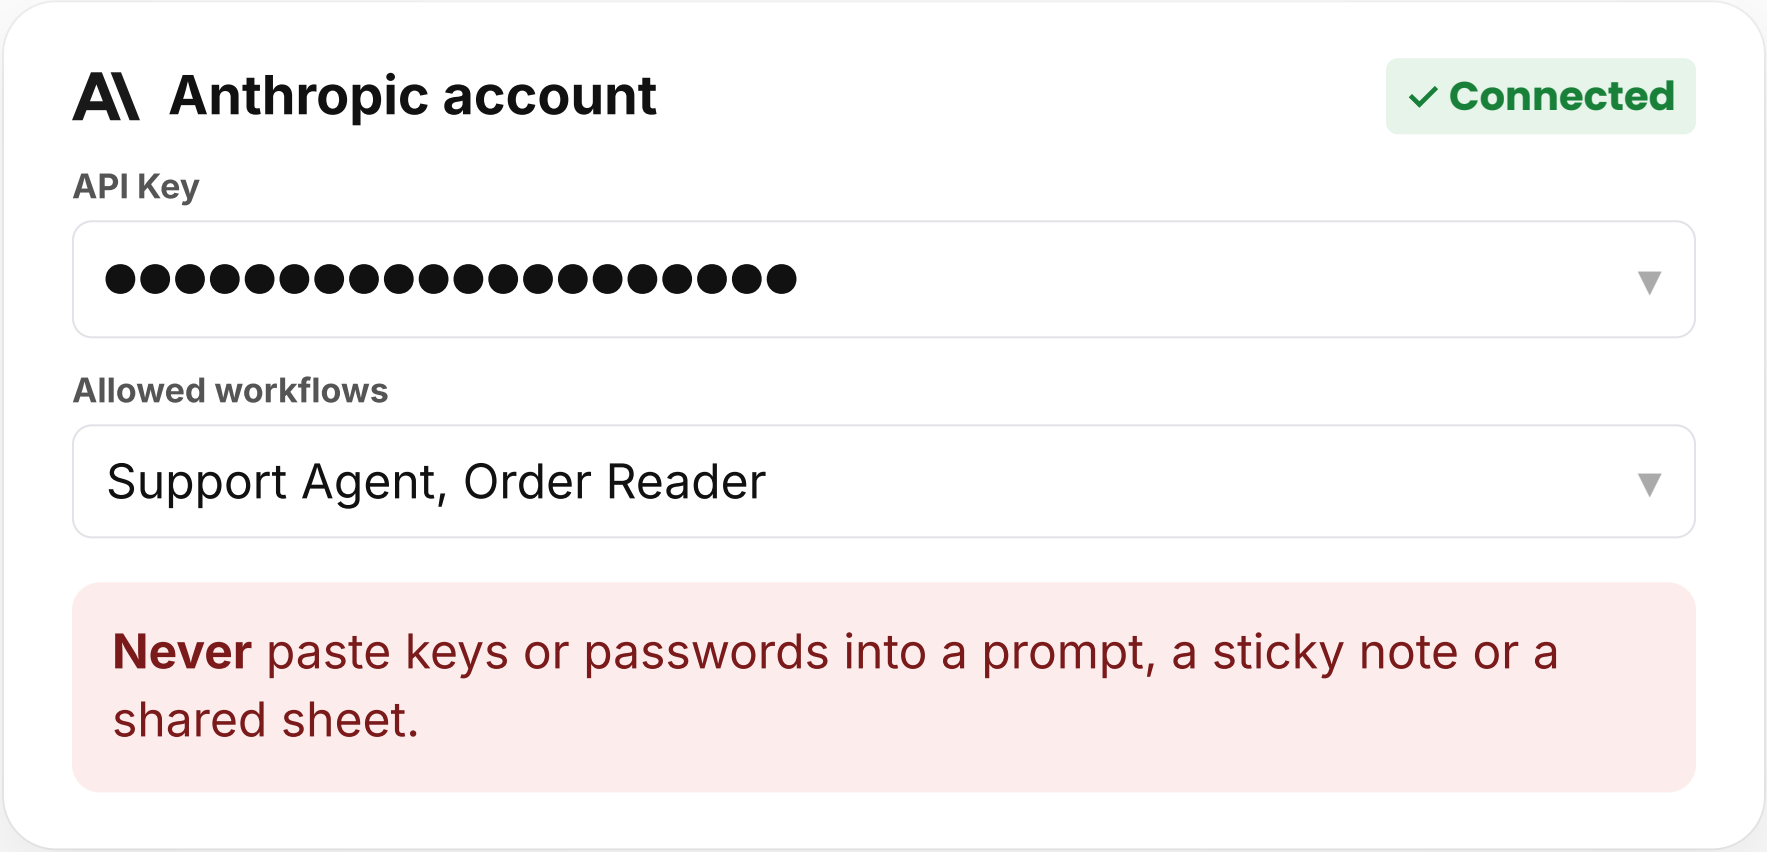

// +91 98201 45678 → +XX XXXXX X5678
```

mask before, not after

Step 4

Keys Live in Credentials

encrypted, and out of the prompt

Step 5

Fill In Details After

Claude writes with **placeholders**. n8n fills them in just before sending.

Claude

Write a reply for order_id ORD-1044. Use placeholders for personal details.

Hi **{{first_name}}**, your order **{{order_id}}** ships on Monday. Tracking comes by WhatsApp. 🚚

Hi Priya, your order **ORD-1044** ships on Monday. Tracking comes by WhatsApp. 🚚

10:12

AI writes, n8n personalises

Is customer data leaking into your AI?
