Every Workflow Needs 2 Things

(Sunday tip)

Before it goes live

👤 **Owner:** one named person

⏸️ **Off switch:** one clear way to pause

🔔 Alert goes to the owner

Swipe →

Thing 1

An Owner

One **named person** who gets the alert when it breaks.

Order Updates · notes

WORKFLOW NOTES

Does: sends order updates on WhatsApp

Owner: Priya (ops)

Alerts go to: Slack #alerts

a name, not "the team"

Thing 2

An Off Switch

One clear way to **pause it without deleting** anything.

Order updates	Active
Review requests	Paused
Payment reminders	Active

in n8n it's just the Active toggle

Why Both?

Broken + Nobody Told
= Days of Wrong Messages

Slack

alerts

n8n alerts 9:02 AM

⚠️ **Order updates failed 3 times**

Owner: @Priya

To pause: switch **Active** off in n8n

the owner sees it, the switch stops it

Checklist

Before You Go Live

- [x] **Owner written in the notes**
  One person, by name
- [x] **Alert goes to that owner**
  Slack, WhatsApp or email
- [x] **Off switch tested**
  Pause it once before launch
- [x] **Nothing gets deleted**
  Pause first, fix, then switch back on

simple. but skip it and you'll feel it.
