The Safest Agent Asks First

(human-in-the-loop)

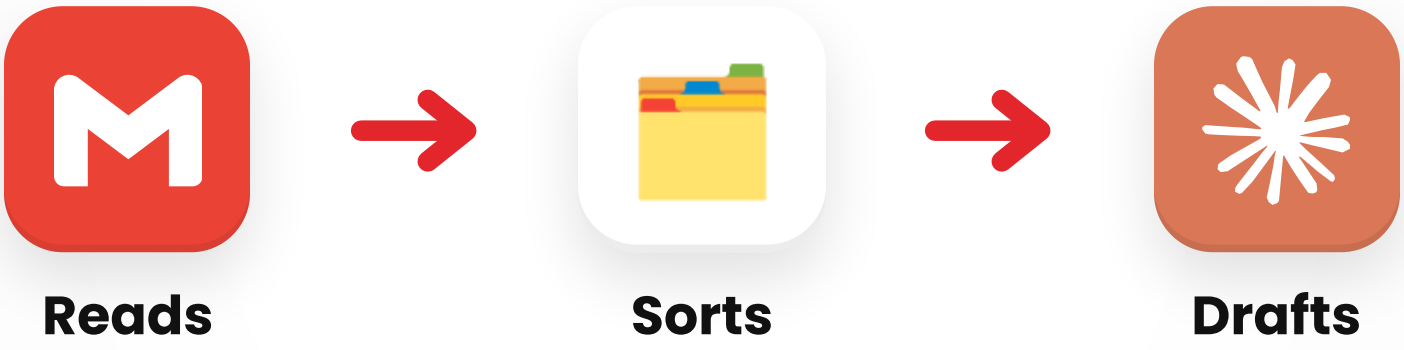

Swipe →

Step 1

The Agent Does the Busywork

Reads every new message
Email, WhatsApp, forms

Sorts it
Order, question, complaint

Drafts the reply
Ready to check, not sent

it never sends the risky stuff

Step 2

Risky Actions Wait for a Yes

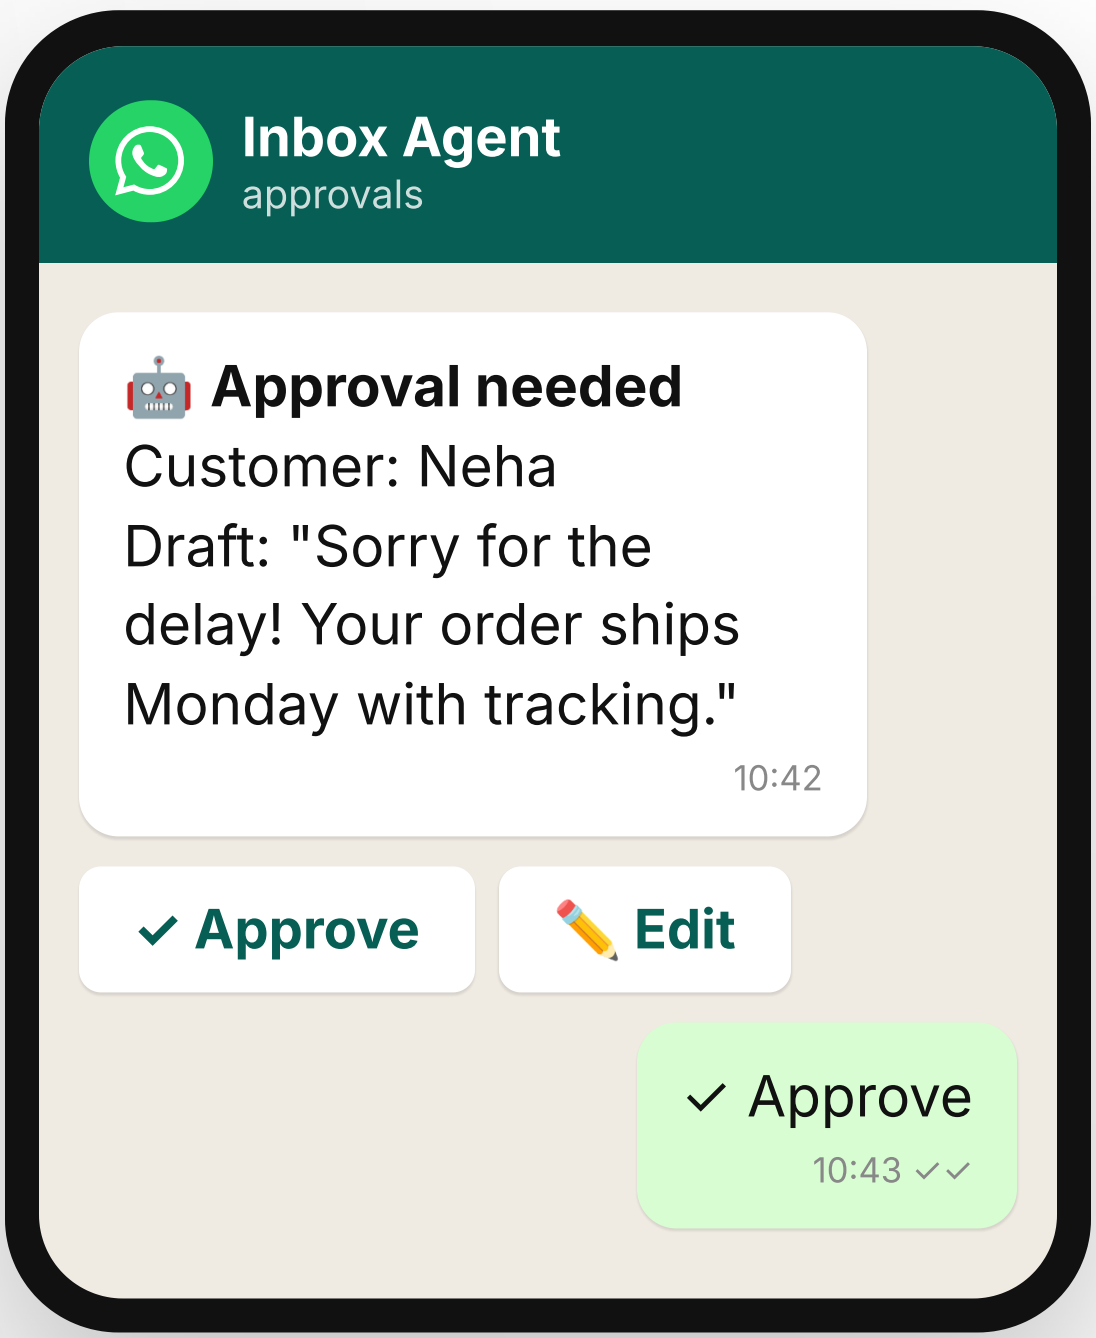

Anything that touches **money, a customer or a promise**.

Waits for a yes	Runs on its own
Refunds + discounts	Tagging + sorting
Quotes and prices	"Got your message"
Upset customers	Opening hours
Delivery promises	Saving to the sheet

Step 3

Approve in One Tap

The approval comes as a **WhatsApp or Slack** message with two buttons.

Approve or Edit. That is it.

The Rule

Where to Put the Approval Step

If a mistake here would need an apology, a human approves it.

not on everything. on what matters.

Step 4

Move Steps to Auto Over Time

As the agent gets things right, **trust is earned** one workflow at a time.

Google Sheets

Approval log

Message type	Your answer	Next
Order status	Approved as-is	→ move to auto
Opening hours	Approved as-is	→ move to auto
Refund request	Often edited	keep approval
New quote	Often edited	keep approval

goal: humans only where they add something

Where would you want an approval step?
