Automate the Process You Have

(not the one you wish you had)

📝 **How we handle orders today**

1 Order comes in on WhatsApp

📋 **Copy it into the sheet**

3 Check stock

4 Type the invoice

Swipe →

Step 1

Write Down Today's Steps

What your team does today, step by step, **warts and all**.

Orders, how we do it now:

1. Order comes on WhatsApp
2. Copy it into the sheet
3. Call the store for stock
4. Type the invoice
5. Send it on WhatsApp

messy is fine. real is the point.

Step 2

Find the Copy-Paste Step

The step where someone **moves the same data** from one place to another.

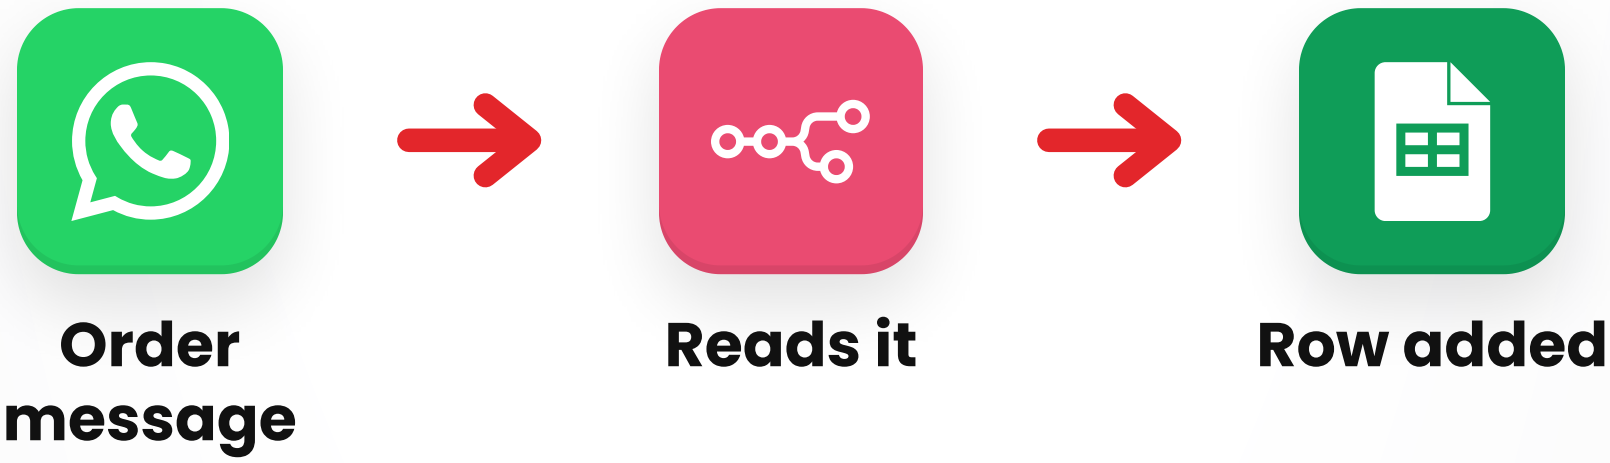

1. Order comes in on WhatsApp
2. **Copy it into the sheet** — copy-paste
3. Check stock with the store
4. Type the invoice
5. Send it back on WhatsApp

pure copy-paste = start here

Step 3

Automate Only That Step

Automated

Copy order into the sheet

By hand, for now

Stock check

Invoice

Sending

one step. live this week.

Step 4

Run It for Two Weeks

Let it run on **real work**. Watch it. Fix the small stuff.

Live test · 2 weeks

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
✔	✔	✔	✔	✔	✔	✔

Day 8	Day 9	Day 10	Day 11	Day 12	Day 13	Day 14
✔	✔	✔	✔	✔	✔	✔

real use beats a perfect plan

Step 5

Then Improve the Process Around It

Now you know **what the next step should be.**

Small, boring and live beats big, impressive and stuck in a slide deck.

the most common mistake: redesigning everything first

What's your most copy-paste step?
