3 Lessons From My First Automations

(learned the slow way)

Lessons, learned slowly

1. Built every edge case on day one
2. No alerts
3. Wrote the prompt once, never again

Swipe →

Lesson 1

I Built for Every Edge Case on Day One

✅ Normal order

✅ Order with a note

💤 ~~Order in 3 currencies~~

💤 ~~Order split across 4 chats~~

💤 ~~Order sent by fax~~

half of them never happened

Lesson 2

I Didn’t Add Alerts

I found out something broke **from a customer**.

Then	Now
A customer tells you	Alert on day one
You find out late	You see it first
You apologise	You fix it calmly

Lesson 3

I Wrote the Prompt Once and Never Looked Again

Prompt

SYSTEM PROMPT · ORDER AGENT

Delivery takes 3 days

Prices from the old price list

Last reviewed: never

the business changed. the prompt didn't.

Today

What I Do Now

1. **Start small**
2. **Add alerts on day one**
3. **Review prompts every month**

cheaper than learning it the slow way
