Is This Automation Worth It?

(a notebook + one week)

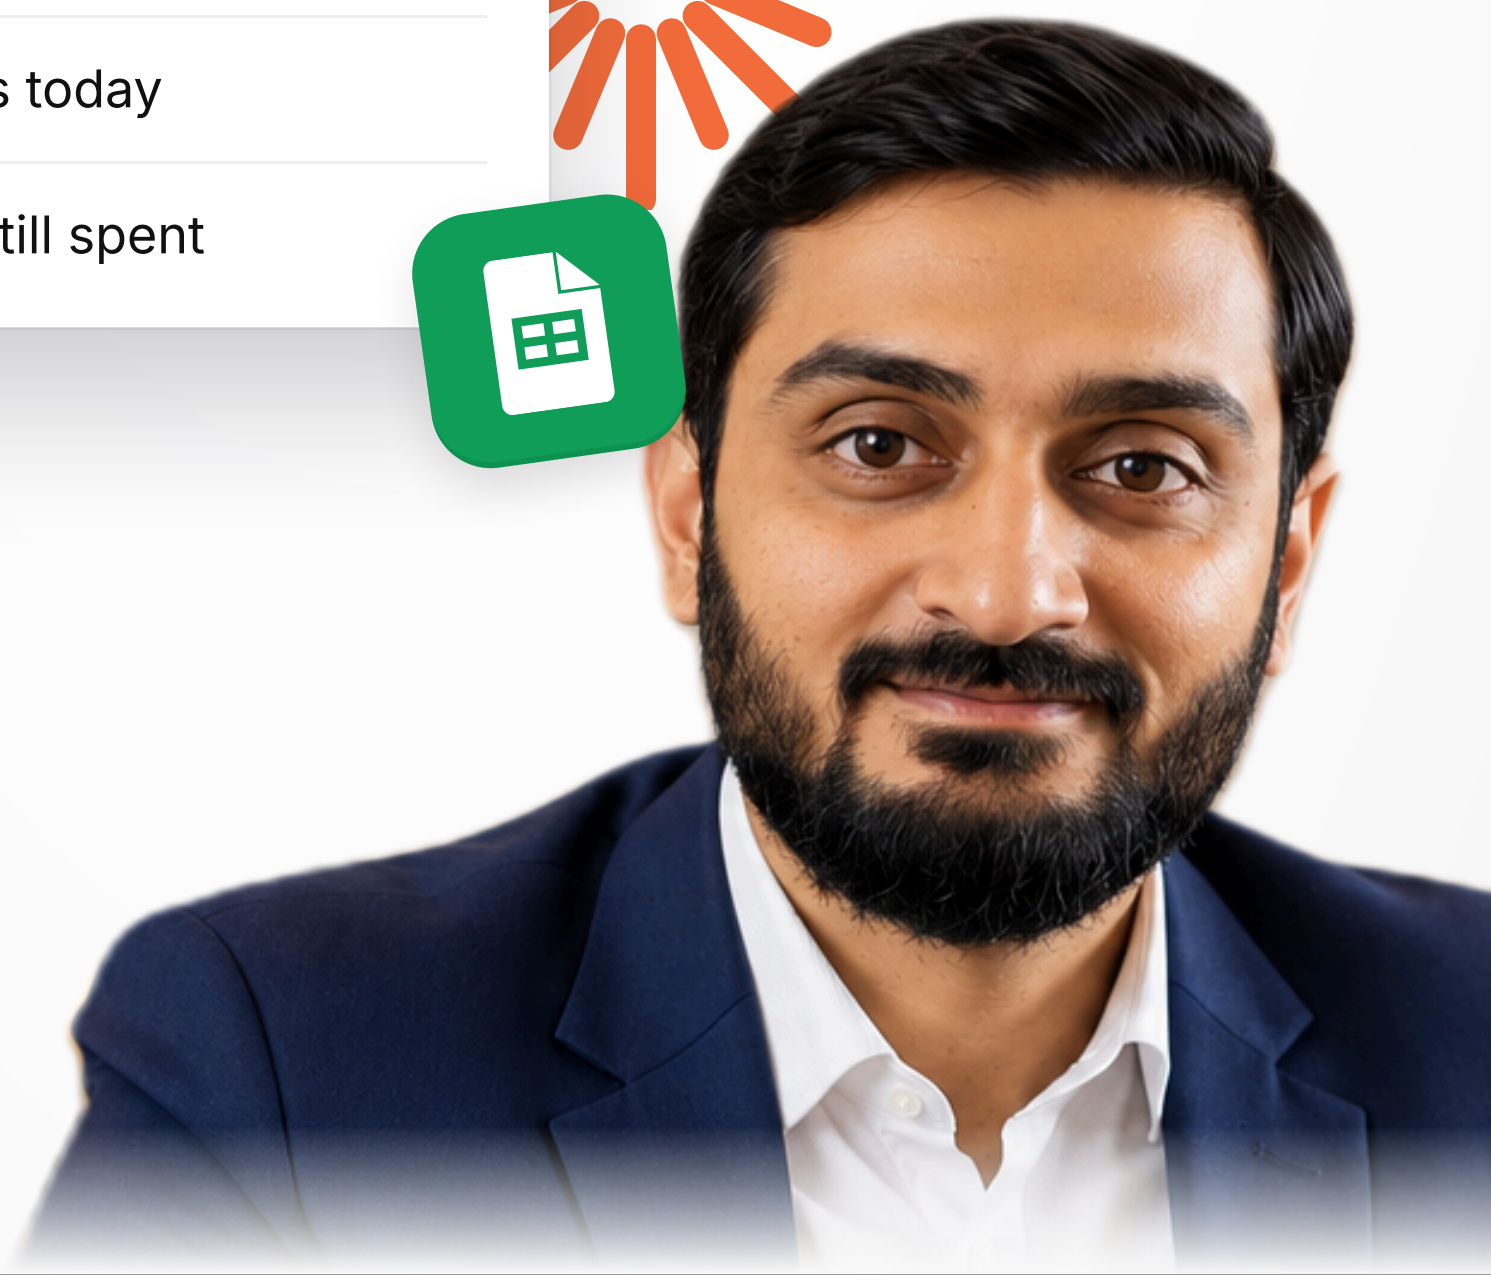

📓 **Time log · this week**

🔁 How many times?

⏱️ How long each?

✖️ Multiply = hours today

✅ After: minutes still spent

Swipe →

Before

Track the Task for One Week

Before building: **how many times**, and **how long each**.

Task: copying orders to the sheet

Mon ////

Tue ///

Wed //// /

Each one: about __ min

no finance model needed

Multiply

That's Your Hours per Week Today

🔁 **Times a week** ✖ ⏱️ **Minutes each** 〓 📓 **Hours today**

write this number down

After

Track the Minutes Still Spent

After going live, the work doesn’t drop to zero.

👀 **Reviews**
Checking what it did

🔧 **Fixes**
When something breaks

🧩 **Edge cases**
The ones it hands back to you

The Difference

Is the Real Time Saved

📓 **Before** — ⏱️ **After** = ✅ **Real time saved**

measured, not guessed

Be Honest

Two Things to Include

1

Build and maintenance time

Saves 20 min a week but needs an hour of fixing every month? Not a win yet.

2

What the saved time turns into

Hours only matter if they go to sales, customers or rest.

Do you know your "before" number?
